

A man is seen from behind, sitting on a dark bench in a room with a large, multi-paned window. He is looking out at a tropical beach with palm trees and a body of water. The scene is bathed in warm, golden light, suggesting late afternoon or early morning. A small dog is sitting on the floor near the man's feet. The overall mood is contemplative and serene.

Scales, 2012-12-06 According to the study conducted by Gallup Organization only a minority of Americans experience consistent normative motivation for engaging with other people's children Social norms theory suggests that adults are more likely to get deeply involved if that involvement is viewed as highly important and if they perceive a social expectation to do so This volume examines the nature of social norms in general and in relationship to children and adolescents The book examines the complex dynamics of understanding the appropriate roles of parents and other adults in young people's healthy development The volume also presents the study's findings in detail including numerous areas of consensus among American adults differences among American adults and the gap between perceived importance and actual engagement A wide ranging literature synthesis suggests implications for both personal and collective actions with potential to change norms that inhibit engagement and to strengthen values that encourage engagement      *Praeger Handbook on Understanding and Preventing Workplace Discrimination* Michele A. **Men** Bob Pease, 2000-02-02 One of the most central issues for women's prospects for equality is whether man can and will change. Changing the social relations of gender will involve changing men's subjectivities as well as their daily practices. This book asks whether this is possible. Bob Pease examines how men who are supportive of feminism are responding to the feminist challenge through an exploration of their experiences and dilemmas in trying to live out their feminist commitment and resist hegemonic forms of masculinity. The book is driven by practical as well as theoretical concerns and aims to develop strategies that will promote the process of change towards equality in gender relations. Drawing on a critical postmodern theoretical framework, Pease argues that it is possible for men to reposition themselves in patriarchal discourses and to reformulate their interests in challenging gender domination. *Recreating Men* is an invaluable reading for academics and students of gender studies and of interest to students of sociology, psychology and political sociology.

***When a Baby Dies of SIDS*** Karen Martin, 2017-07-12 The cause of the number one killer of apparently healthy infants between the ages of one week and one year, Sudden Infant Death Syndrome (SIDS), continues to defy science. This cruel mystery intensifies an already painful experience for bereaved parents who frequently blame themselves for their baby's death. This book explores how parents grieve the meanings and casual explanations they attribute to a SIDS death, the effects of their grief on family relationships and the strategies they use to cope and carry on. Karen Martin's grounded theory study describes in detail the experiences of mothers and fathers whose babies died of SIDS, ranging from less than one to over twenty-five years after the baby's death. Her work makes an important contribution to health fields and to the social science of medicine and is a critical resource for family doctors, public health nurses, counsellors, ministers and all those working with grieving parents.

***Gender Roles*** Janice W. Lee, 2005 Gender encompasses biological sex but extends beyond it to the socially prescribed roles deemed appropriate for each sex by the culture in which we live. The gender roles we each carry out are highly individualistic, built on our biological and physical traits, appearance and personality, life experiences such as childhood, career and education and history of sexual and romantic interactions. Each element influences perceptions and expectations. Gender-related experiences influence and shape the ways we think about others and ourselves, including self-image, behaviour, mood, social advancement and coping strategies. This new book brings together leading international research devoted to this subject.
