Other Perennial Philosophy A Metaphysical Dialectic:

The Other Perennial Philosophy Alan M. Laibelman, 2000-10-25 The Other Perennial Philosophy A Metaphysical Dialectic seeks to synthesize the many fields within science philosophy and religion to achieve the most comprehensive picture ever constructed to incorporate universally held beliefs about God man and the universe This book attempts to accomplish several interrelated purposes to describe the Perennial Philosophy in its depth to analyze the critical elements contained within such a body of thought to bring to light the vast literature of views which are oppositional at least on some level to those contained in the Perennial Philosophy to synthesize these seemingly discordant thoughts into a new vision of the nature of reality to dissect the implications of this new model and lastly and perhaps most importantly to demonstrate that intellect has no innate constraints This book rigorously explores the connections to be made by weaving together the threads of philosophy religious theology mysticism mythology mathematics physics and biochemistry In this study is both a critique and an homage to Perennial Philosophy In evoking a new vision of reality which is at the same time a modernized version of an old image The Other Perennial Philosophy A Metaphysical Dialectic seeks to entice readers to rethink their own views on a subject of crucial importance to all This book will appeal to anyone interested in philosophy and religion

Discreteness, Continuity, & Consciousness Alan M. Laibelman, 2007 This volume is the third in elaboration of a self consistent and comprehensive philosophical system comprising the areas of metaphysics volume one ethics volume two and epistemology volume three Consciousness is conceived as the principal transcendental agency bringing all of manifestation into existence The current work focuses on methods of cognition sensory representations ratiocination intuition mystical revelation and the parapsychological skills pertaining to telepathy clairvoyance and precognition The discipline of psychophysics is conceived as the unifier for all modalities There is developed both a qualitative and a quantitative mechanism for gaining knowledge Knowledge accumulation was proposed in volume two to be the ethical goal of all lifeforms The purpose toward which that goal is placed in service is in resolution of the metaphysical crisis detailed in volume one

Going Against the Flow Alan M. Laibelman, 2004 Most contemporary efforts in philosophy treat metaphysics and ethics as isolated arenas of thought Critical analytical exploration of a multitude of ethical theories emanating from historically diverse philosophical and theological traditions demonstrates that a consistent and comprehensive ethic depends upon a solid metaphysical foundation Building upon a metaphysical scheme first explicated in The Other Perennial Philosophy A Metaphysical Dialectic Alan M Laibelman elaborates on a syncretistic ethical system incorporating elements from many cross cultural sources and also develops an extensive theory of consciousness inclusive of both transcendental and existential components

Maintaining the Sacred Center Rusmir Mahmutcehajic, 2011-09-01 In his fascinating new book Bosnian academic and former statesman Rusmir Mahmutcehajic explores how men and women traditionally ordered their communities architecture and habits of life to reflect the divine order and how this order is coming under attack in an

increasingly secularized modern world In reflecting on how his own hometown of Stolac Bosnia has been destroyed and then rebuilt in the aftermath of the tragic Bosnia war he offers explanations as to how different religious communities can live peacefully together in the future *Soviet Historiography of Philosophy* Evert van der Zweerde,2013-06-29 Scientific history of philosophy was one of the professional branches of Soviet philosophy and a place where philosophical culture was preserved in an often hostile environment Situated between the ideological exigencies of the Soviet system with its Marxist Leninist theoretical foundation and the need for an objective account of philosophy s past Soviet history of philosophy displays the characteristic features of Soviet philosophy as a whole including a forceful reappearance of its Hegelian background This book is the only Western monograph on this important part of Soviet philosophy thus filling the last main gap in Western Philosophical Sovietology At the same time it offers the first survey of Soviet philosophy after the disappearance of the Soviet system itself embarking on an historical and meta philosophical investigation of Soviet philosophical culture The book will be of interest to students of Soviet and Russian philosophy historians of philosophy and specialists in Soviet studies **Spiritual Dialectics** Swami Mukundananda,2013-04-18 What is Destiny What is Karma Yog Why do bad things happen to good people What does the soul look like Dialectics is a method of investigating into the nature of the Truth through discussions in the form of questions and answers Many a times resolution of the doubt creates an experience that is nothing short of an epiphany a sudden enlightenment or an intuitive leap of realization The satisfaction of having a troubling question answered after many years of intellectual discomfort is much like the gratification of taking off a tight shoe after wearing it all day except that the latter is a physical relief while the former is an intellectual deliverance Over the last 25 years Swami Mukundananda has been asked hundreds of thousands of questions from people across the world on diverse topics related to religion spirituality and God These discussions with devotees seekers and learners are now available as a source of guidance for sincere seekers worldwide The book is a compilation of answers to some of the most challenging questions regarding spirituality the goal of life philosophy the holy scriptures and more *Psychology and the Perennial Philosophy* Samuel Bendeck Sotillos,2013-02-26 Modern psychology is at an impasse as it searches anxiously for new therapies to address the increasing occurrence of mental illness in contemporary society In this groundbreaking anthology leading authors from the perennialist school including Huston Smith Seyyed Hossein Nasr and Frithjof Schuon draw on the age old insights of the world s wisdom traditions to argue that modern psychology behaviorism psychoanalysis humanistic and transpersonal psychology overlooks the specifically spiritual factors contributing to mental health and illness **The Dialectics of Ecology** John Bellamy Foster,2024-04 Today the fate of the earth as a home for humanity is in question and yet contends John Bellamy Foster the reunification of humanity and the earth remains possible if we are prepared to make revolutionary changes As with his prior books *The Dialectics of Ecology* is grounded in the contention that we are now faced with a concrete choice between ecological socialism and capitalist exterminism and rooted in insights drawn from the

classical historical materialist tradition In this latest work Foster explores the complex theoretical debates that have arisen historically with respect to the dialectics of nature and society He then goes on to examine the current contradictions associated with the confrontation between capitalist extractivism and the financialization of nature on the one hand and the radical challenges to these represented by emergent visions of ecological civilization and planned degrowth on the other

In Pursuit of the Inconceivable Peter Jones, 2025-09-30 A comprehensive explanation of the relationship between formal scholastic metaphysics and the philosophical foundation of mysticism and the Perennial philosophy Ultimate Reality and Meaning, 2003 Material Christianity Christopher Ocker, Susanna Elm, 2020-02-26 This collection of essays offers a series of rigorously focused art historical and philosophical studies that examine ways in which materiality has posed and still poses a religious and cultural problem The volume examines the material agency of objects artifacts and environments art ritual pilgrimage food and philosophy It studies the variable senses of materiality the place of materiality in the formation of modern Western religion and its role in Christianity's dialogue with non Western religions The essays present new interpretations of religious rites and outlooks through the focus on their material components They also suggest how material engagement theory a new movement in cultural anthropology and archeology may shed light on the cultural history of Christianity in medieval and early modern Europe and the Americas It thus fills an important lacuna in the study of western religion by highlighting the longue durée from the Middle Ages to the Modern Period of a current dilemma namely the divide between materialistic and what might broadly be called hermeneutical or cultural critical approaches to religion and human subjectivity **Lectures on Negative Dialectics** Theodor W. Adorno, 2014-11-05 This volume comprises one of the key lecture courses leading up to the publication in 1966 of Adorno's major work *Negative Dialectics* These lectures focus on developing the concepts critical to the introductory section of that book They show Adorno as an embattled philosopher defining his own methodology among the prevailing trends of the time As a critical theorist he repudiated the worn out Marxist stereotypes still dominant in the Soviet bloc he specifically addresses his remarks to students who had escaped from the East in the period leading up to the building of the Berlin Wall in 1961 Influenced as he was by the empirical schools of thought he had encountered in the United States he nevertheless continued to resist what he saw as their surrender to scientific and mathematical abstraction However their influence was potent enough to prevent him from reverting to the traditional idealisms still prevalent in Germany or to their latest manifestations in the shape of the new ontology of Heidegger and his disciples Instead he attempts to define perhaps more simply and fully than in the final published version a negative i.e. critical approach to philosophy Permeating the whole book is Adorno's sense of the overwhelming power of totalizing dominating systems in the post Auschwitz world Intellectual negativity therefore commits him to the stubborn defence of individuals both facts and people who stubbornly refuse to become integrated into the administered world These lectures reveal Adorno to be a lively and engaging lecturer He makes serious demands on his listeners but always manages

to enliven his arguments with observations on philosophers and writers such as Proust and Brecht and comments on current events Heavy intellectual artillery is combined with a concern for his students progress
