Comparative Education Research Mark Bray, Bob Adamson, Mark Mason, 2007-08-21 Approaches and methods in comparative education research are of obvious importance but do not always receive adequate attention This book contributes new insights within the longstanding traditions of the field A particular feature is the focus on different units of analysis Individual chapters compare places systems times cultures values policies curricula and other units These chapters are contextualised within broader analytical frameworks which identify the purposes and strengths of the field The book includes a focus on intra national as well as cross national comparisons and highlights the value of approaching themes from different angles The book will be of great value not only to producers of comparative education research but also to consumers who wish to understand more thoroughly the parameters and value of the field

Education and Society in Comparative Context Eija Kimonen, 2015-12-17 What was the interrelationship between education and society during the twentieth century in the United States and India What is the

essence of the historical development of educational policies and social systems in these two countries What philosophical views and developmental courses underlie their outdoor oriented education What are their aims of outdoor oriented education What procedures are connected with their outdoor oriented education These questions are examined in this unique volume This book is divided into three parts The first part creates a context for the comparison of the issues concerning education and society The central point of departure used here regards education as being closely related to the totality of culture and human activity The dialectic process between education and society is realized differently in accordance with the value objectives that provide the background for different societies This comparative educational study uses a historico hermeneutical approach The second part analyzes the social systems and educational policies of the United States and India following their developmental trends and patterns The nature of the relationship between education and society for each country is further brought into focus when it is interpreted from the perspective of the philosophical views pedagogical aims and procedures of twentieth century outdoor oriented education The case studies provide an interesting insight into how changes in educational policy have been reflected in the every day pedagogical procedures used in schools in the United States and India The third part is an analysis and comparison of the phenomena previously presented that are related to education and society through the lenses suggested by sociological theories It compares the dimensions of the interrelationship between education and society from the standpoint of outdoor oriented education in the two countries during the twentieth century This thought provoking volume is intended for anybody interested in the interplay between education and society in all its complexity It offers a fascinating journey into the past and present of the issues that have defined the development of education and society in the United States and India

Other Schools and Ours Edmund James King, 1967 *Beyond the Comparative* John C. Weidman, W. James Jacob, 2012-01-01 We are pleased to introduce this inaugural volume in the PSCIE Series *Beyond the Comparative Advancing Theory and Its Application to Practice* which expands on the life work of University of Pittsburgh Professor Rolland G Paulston 1929 2006 Recognized as a stalwart in the field of comparative and international education Paulston's most widely recognized contribution is in social cartography He demonstrated that mapping comparative international and development education CIDE is no easy task and depending on the perspective of the mapper there may be multiple cartographies to chart The 35 contributors to this volume representing a range of senior and junior scholars from various CIDE backgrounds and perspectives celebrate the life and work of Paulston by addressing issues perspectives and approaches related to charting the future course of the field The volume reports on new research in several genres as well as conceptual analysis As the title suggests authors were encouraged to go beyond established canons of CIDE The cover art *The CIDE Theoretical Compass* was conceptualized by the editors and depicts that theory selection and theory generation are an ongoing and important process in comparative international and development education CIDE The image was designed by artist Natalie Jacob which positions the CIDE Theoretical Compass over Rolland

Students Learning in Communities Eija Kimonen, Raimo Nevalainen, 2022-04-04 This book examines the interplay

between education and society in the 20th and early 21st centuries and addresses philosophical views and educational aims with their associated values for community based learning in the U S A India Russia and China The philosophical background of community based learning in these countries relies both on national philosophical traditions and on reformist ideas in international schools of thought over time opposition to certain international pedagogical ideas surfaced in these countries The authors offer a comprehensive picture of community based learning in education and demonstrate how teachers can make learning more functional and holistic so that students can work in new situations within their complex worlds School specific descriptions reveal how teachers and students implemented community based projects at different times *Faith Schools and Society* Jo Cairns,2009-06-26 An engaging and insightful monograph that examines the fit between personal spiritual and academic goals in contemporary educational experience and individual school cultures **Politics, Markets, and America's Schools** John E. Chubb,Terry M. Moe,2011-09-01 During the 1980s widespread dissatisfaction with America s schools gave rise to a powerful movement for educational change and the nation s political institutions responded with aggressive reforms Chubb and Moe argue that these reforms are destined to fail because they do not get to the root of the problem The fundamental causes of poor academic performance they claim are not to be found in the schools but rather in the institutions of direct democratic control by which the schools have traditionally been governed Reformers fail to solve the problem when the institutions ARE the problem The authors recommend a new system of public education built around parent student choice and school competition that would promote school autonomy thus providing a firm foundation for genuine school improvement and superior student achievement International Yearbook of Education ,1986 Content of yearbooks originates in the sessions of the International Conference on Education ICE *Routledge Revivals: Vocational Education and Training in the Developed World (1979)* Leonard Cantor,2017-11-22 First published in 1989 this book primarily sets out to provide detailed accounts of the policy towards and the provision of vocational education and training in five countries of the developed world Japan Australia the United States the Federal Republic of Germany and the United Kingdom Professor Cantor concentrates on the training of skilled personnel at operative craft and technician levels and describes provision both within public and private institutions such as further education colleges and in industry and business Comparisons are drawn between each country for example between the British traditions of vocational education and training in Australia and the United Kingdom and the more entrepreneurial approach of Japan and the United States **Primary Education on the Threshold of the Twenty-first Century** José Luis García Garrido,1986 **Other Schools and Ours** Edmund James King,1973 *Poetic Knowledge* James S. Taylor,1998-01-01 Reveals the neglected mode of knowing and learning from Socrates to the middle ages and beyond that relies more on the integrated powers of sensory experience and intuition rather than on modern narrow scientific models of education The Sociology of Education Jeanne Ballantine,Floyd M Hammack,2015-07-22 A comprehensive and cross cultural look at the sociology of education The text

integrates important and diverse topics in the field by showing how they are related The Sociology of Education A Systematic Analysis provides a sociological analysis of education using several theoretical approaches The authors include practical applications and current educational issues to discuss the structure and processes that make education systems work Learning Goals Upon completing this book readers should be able to Learn diverse theoretical approaches in the sociology of education Assess important current or emerging topics including higher education informal education climate and the hidden curriculum the school environment education around the world and educational movements and alternatives Understand how change takes place and what role sociologists play Become involved with educational systems where they can put to use the knowledge available in textbooks **Journal of Issues in Technical Teacher Education** ,1997
