the largest and smallest animals Mathews shows us the world through the animals eyes and ears and noses His convincing portrayals of their intelligence recall the fiction of Jack London and Ernest Thompson Seton Like these literary ancestors Mathews originally intended his nature stories for boys but the stories transcend boundaries of age gender and geography Mathews writes not just to inspire his readers with nature s beauty but also to demonstrate the interrelatedness of humans animals and the landscapes in which they interact Timely and relevant to discussions of ecology and the environment his stories will reach a wide audience today more than fifty years after they were written These stories show Mathews s ability to write precise descriptions of a coyote catching a field mouse a crane eating a frog a mountain lion playing A hunter himself Mathews understood both the animals readiness to fight and man s instinct to survive And he let readers share the dignity of the animal characters and their refusal to acquiesce to their own extinction particularly in the face of human ignorance and carelessness Susan Kalter s afterword provides a poignant portrait of Mathews and traces the inspirations for the short stories in this collection Thoughtfully annotated these stories are the only published examples of Mathews s hitherto unknown short fiction and will add to his stature as an important American Indian writer
