International Law and its Others Anne Orford, 2006-11-02 Institutional and political developments since the end of the Cold War have led to a revival of public interest in and anxiety about international law Liberal international law is appealed to as offering a means of constraining power and as representing universal values This book brings together scholars who draw on jurisprudence philosophy legal history and political theory to analyse the stakes of this turn towards international law Contributors explore the history of relations between international law and those it defines as other other traditions other logics other forces and other groups They explore the archive of international law as a record of attempts by scholars bureaucrats decision makers and legal professionals to think about what happens to law at the limits of modern political organisation The result is a rich array of responses to the question of what it means to speak and write about international law in our time *The Object of Literature* Pierre Macherey, 1995-03-16 This 1995 book by Pierre Macherey was his first dealing with literature and theory since his seminal A Theory of Literary Production Continuing the project of Althusserian theory Macherey engages in a series of close exegeses of classical texts in French literature and philosophy from the late eighteenth century down to the 1970s that explore the historically variable but thematically similar ways in which literary texts represent philosophical ideas Rejecting the simple notion that literature deploys philosophical topoi in an unmediated manner Macherey shows the conceptual sophistication and broad intellectual influence that literary art has displayed in the modern period At once a theoretical meditation of great originality and a historical work of scrupulous scholarship The Object of Literature will entrench Pierre Macherey's already considerable reputation as one of the most significant contemporary theoreticians of literature History of Politics and Economics Howard Jason Rogers, 1906 *The Oxford Handbook of Comparative Law* Mathias Reimann, Reinhard Zimmermann, 2019-03-26 This fully revised and updated second edition of The Oxford Handbook of Comparative Law provides a wide ranging and diverse critical survey of comparative law at the beginning of the twenty first century It summarizes and evaluates a discipline that is time honoured but not easily understood in all its dimensions In the current era of globalization this discipline is more relevant than ever both on the

academic and on the practical level The Handbook is divided into three main sections Section I surveys how comparative law has developed and where it stands today in various parts of the world This includes not only traditional model jurisdictions such as France Germany and the United States but also other regions like Eastern Europe East Asia and Latin America Section II then discusses the major approaches to comparative law its methods goals and its relationship with other fields such as legal history economics and linguistics Finally section III deals with the status of comparative studies in over a dozen subject matter areas including the major categories of private economic public and criminal law The Handbook contains forty eight chapters written by experts from around the world The aim of each chapter is to provide an accessible original and critical account of the current state of comparative law in its respective area which will help to shape the agenda in the years to come Each chapter also includes a short bibliography referencing the definitive works in the field

Dialogues on Human Rights and Legal Pluralism René Provost,Colleen Sheppard,2012-08-10 Human rights have transformed the way in which we conceive the place of the individual within the community and in relation to the state in a vast array of disciplines including law philosophy politics sociology geography The published output on human rights over the last five decades has been enormous but has remained tightly bound to a notion of human rights as dialectically linking the individual and the state Because of human rights dogged focus on the state and its actions they have very seldom attracted the attention of legal pluralists Indeed some may have viewed the two as simply incompatible or relating to wholly distinct phenomena This collection of essays is the first to bring together authors with established track records in the fields of legal pluralism and human rights to explore the ways in which these concepts can be mutually reinforcing delegitimizing or competing The essays reveal that there is no facile conclusion to reach but that the question opens avenues which are likely to be mined for years to come by those interested in how human rights can affect the behaviour of individuals and institutions
