Otto Benesch Eva Benesch,1973 *Conceptual Art After Modernism* Robert Bailey,2025-05-30 This study provides a new interpretation of art after modernism by foregrounding the importance of conceptual thinking as a pervasive force for change in art and art history since 1950 Robert Bailey shows how distinctions between art and art history gave way as conceptual thinking provided artists and art historians with a common means to reassess what art could be and do in the world Bailey assesses the results of artful and scholarly inquiries combining creative activity with intellectual rigor to proffer new approaches to a variety of social and environmental concerns ranging from questions about human identity including race class gender and sexuality to activist efforts to redress everything from abortion access to migrants rights to climate change This book provides both a historical overview of these developments and close analyses of key works and texts spanning 1950 to the present and encompassing broad geographic scope with special attention paid to Indigenous art The book will be of interest to scholars working in art history and contemporary art **Otto Benesch Collected Writings** Otto Benesch,1971 The Publishers' Trade List Annual ,1976 **German Paintings in the Metropolitan Museum of Art, 1350-1600** Maryan W. that surveys the Dutch paintings found in the Metropolitan Museum of Art **Grand Design** Elizabeth A. H. Cleland, 2014-10-06 Pieter Coecke van Aelst 1502-1550 was renowned throughout Renaissance Europe as a draftsman, painter, and publisher of architectural treatises. The magnificent tapestries he designed were acquired by the wealthiest clients of the day, up to and including rulers such as Emperor Charles V, King Francis I of France, King Henry VIII of England, and Grand Duke Cosimo I de' Medici of Tuscany. At the same time, Coecke was remarkable not only for the complexity and unparalleled quality of his tapestries but also for his fluency in various media. This lavishly illustrated volume examines the full range of his work, from tapestry and stained glass window designs to panel paintings, prints, drawings, and architectural treatises. Though only forty-eight when he died, Coecke was one of the greatest Netherlandish artists of the sixteenth century. His paintings and drawings, initially wrought in the style of the Antwerp Mannerists, evolved through his enthusiastic response to Italian Renaissance design and influenced generations of artists in his wake. This comprehensive study explores Coecke's stylistic development as well as his substantial contribution to the body of great Renaissance art in Flanders. Featuring twenty monumental tapestries along with many of their cartoons and preparatory sketches, plus seven paintings, additional drawings, and printed matter, many of them newly photographed for this volume, *Grand Design* provides a thorough reappraisal of Coecke's work, amply justifying the high regard in which Coecke's work was held and its wide dissemination long after his death. Etched on the Memory Isadora Rose-de Vriejo, Janie Cohen, Museum Het Rembrandthuis (Amsterdam, Netherlands), 2000 Both Goya and Picasso were endowed with extremely inquisitive, all-seeing and all-absorbing gazes; their power to retain and recall visual impressions was extraordinarily acute. Each one spent many hours scrutinizing the etchings of Rembrandt and, in their distinctive ways, absorbed formal and technical lessons from the admired 17th-century master, which then emerged in their own works. In this study, the authors reconstruct the gazes of these two great Spanish visual geniuses onto the work of the timeless Dutch artist in order to illuminate these remarkable relationships. **Albrecht Altdorfer and the Origins of Landscape** Christopher S. Wood, 2013-07-15 In the early sixteenth century, Albrecht Altdorfer promoted landscape from its traditional role as background to its new place as the focal point of a picture. His paintings, drawings, and etchings appeared almost without warning and mysteriously disappeared from view just as suddenly. In *Albrecht Altdorfer and the Origins of Landscape*, Christopher S. Wood shows how Altdorfer transformed what had been the mere setting for sacred and historical figures into a principal venue for stylish draftsmanship and idiosyncratic painterly effects. At the same time, his landscapes offered a densely textured interpretation of that quintessentially German locus, the forest interior. This revised and expanded second edition contains a new introduction, revised bibliography, and fifteen additional illustrations. **The Image of the Black in Western Art** David Bindman, 2010 A pioneering work in the field of art history, *The Image of the Black in Western Art* is a comprehensive series of ten books which offers a lavishly illustrated history of the representations of people of African descent from antiquity to the present. Each book includes a series of essays
