Citizenship and Democratization: Perspectives from Different Gender-Theoretical Approaches Eva Maria

Hinterhuber, Jana Günther, 2024-01-30 The year 1918 was significant in many ways seeing the end of World War 1 At the same time the impact and transformational effects of this event enabled civil society activists and politically institutionalised actors in European countries to pick up the threads of democratic social movements and parliamentary aspirations and make use of political opportunity structures to obtain citizen rights for larger parts of the population One result of this process albeit with a difference between European states was that more groups in society gained suffrage Amongst those were large sections of the working class and women While the vote was won for some new social groups in European societies others were still excluded After one centennium of struggle for political participation we would like to discuss specific problems of politics of belonging The question concerning the full recognition of citizen rights was and continually is connected to ideas of a specific membership of a nation state a fact that denotes the particular problem of membership and non membership and of inside and outside This Research Topic will take account of this special field of tension of democratisation e g inclusion through exclusion from a perspective of social history political science gender studies and intersectionality approaches This analytical foil shall be used to examine the relationship between state or government action and civil society as well as the reproduction of social and political inequality despite increasing democratisation movements Origins of the Other Samuel Moyn, 2005 In Origins of the Other Moyn offers new readings of the work of a host of crucial thinkers such as Hannah Arendt Karl Barth Karl Lowith Gabriel Marcel Franz Rosenzweig Jean Paul Sartre and Jean Wahl who help explain why Levinas's thought evolved as it did Jacket **Information Technology Ethics: Cultural Perspectives** Hongladarom, Soraj, Ess, Charles, 2006-12-31 This book is the first publication that takes a genuinely global approach to the diverse ethical issues evoked by Information and Communication Technologies and their possible resolutions Readers will gain a greater appreciation for the problems and possibilities of genuinely global information ethics which are urgently needed as information and communication technologies continue their exponential growth Provided by publisher **Unravelling the Mystery of the Atomic Nucleus** Bernard Fernandez, Georges Ripka, 2012-09-28 Unravelling the Mystery of the Atomic Nucleus is a history of atomic and nuclear physics It begins in 1896 with the discovery of radioactivity which leads to the discovery of the nucleus at the center of the atom It follows the experimental discoveries and the theoretical developments up to the end of the Fifties Unlike previous books regarding on history of nuclear physics this book methodically describes how advances in technology enabled physicists to probe the physical properties of nuclei as well as how the physical laws which govern these microscopic systems were progressively discovered The reader will gain a clear understanding of how theory is inextricably intertwined with the progress of technology Unravelling the Mystery of the Atomic Nucleus will be of interest to physicists and to historians of physics as well as those interested development of science *American journal of*

Rudolf Carnap: Studies in Semantics Steve Awodey,Greg Frost-Arnold,2024-07-18 Volume 7 of the Collected Works of Rudolf Carnap presents Studies in Semantics which comprises three interlocking books Introduction to Semantics 1942 Formalization of Logic 1942 and Meaning and Necessity 1947 Along with textual notes the editors introduction places

Carnap's whole semantic project in its various contexts **In Between** Espen Dahl, 2011-04-06 Thanks to the recent return to religion the holy has become a relevant issue in public debate as is suggested by concepts such as re-sacralization and re-enchantment Holy war and religiously motivated terrorist attacks the fascination in popular culture for subjects such as the Holy Grail as in Dan Brown's *Da Vinci Code* new spiritual longings both within and outside institutional religion all testify to the new religious climate This situation calls for a reassessment of both classical and new theories about the holy Espen Dahl offers a theoretical account of the holy Central to its approach is the idea that the holy cannot be reduced to one stable essence but is fundamentally composite and takes place in between This means that the typical modern dichotomies between the holy and the profane the pure and the impure the pious and the violent cannot be drawn as sharply as scholars once did Instead the manifestation of the holy takes place in the interstice between those spheres Such a position is not strong it attests to the weakness of the holy Through a critical dialogue with the most influential recent contributions various theories and responses to them are presented on the basis of the book's overall perspective Espen Dahl deals with various theoretical perspectives corresponding to the numerous dimensions of the holy Phenomenology plays the principal role because it offers the best means to preserve the experiential dimensions which are essential to the holy From this perspective the book discusses theories from religious science theology philosophy and psychology **Journal** ,1881 **Motor Traction** ,1912

Majesty and Meekness John Braisted Carman, 1994 *A Theory of Sentience* Austen Clark, 2000 Austen Clark offers a general account of the forms of mental representation that we call sensory To sense something one must have some capacity to discriminate among sensory qualities but there are other requirements What are they and how can they be put together to yield full blown sensing Drawing on the findings of current neuroscience Clark proposes and defends the hypothesis that the various modalities of sensation share a generic form that he calls feature placing Sensing proceeds by picking out place times in or around the body of the sentient organism and characterizing qualities features that appear at those place times Such feature placing is a primitive kind probably the most primitive kind of mental representation Once its peculiarities have been described many of the puzzles about the intentionality of sensation and the phenomena that lead some to label it pseudo-intentional can be resolved The hypothesis casts light on many other troublesome phenomena including the varieties of illusion the problem of projection the notion of a visual field the location of after images the existence of sense data and the role of perceptual demonstratives *A Theory of Sentience* will interest anyone interested in the topics of sensation representation or phenomenal consciousness
