Our Common Journey:

Our Common Journey National Research Council, Policy and Global Affairs, Policy Division, Board on Sustainable Development, 1999-11-09 World human population is expected to reach upwards of 9 billion by 2050 and then level off over the next half century How can the transition to a stabilizing population also be a transition to sustainability How can science and technology help to ensure that human needs are met while the planet's environment is nurtured and restored Our Common Journey examines these momentous questions to draw strategic connections between scientific research technological development and societies efforts to achieve environmentally sustainable improvements in human well being The book argues that societies should approach sustainable development not as a destination but as an ongoing adaptive learning process Speaking to the next two generations it proposes a strategy for using scientific and technical knowledge to better inform future action in the areas of fertility reduction urban systems agricultural production energy and materials use ecosystem restoration and biodiversity conservation and suggests an approach for building a new research agenda for sustainability science Our Common Journey documents large scale historical currents of social and environmental change and reviews methods for what if analysis of possible future development pathways and their implications for sustainability The book also identifies the greatest threats to sustainability in areas such as human settlements agriculture industry and energy and explores the most promising opportunities for circumventing or mitigating these threats It goes on to discuss what indicators of change from children's birth weights to atmosphere chemistry will be most useful in monitoring a transition to sustainability Our Common Journey, 1999 *Pilgrims at the Crossroads* Princeton Forum on Asian Indian Ministries (U.S.). Consultation (2009 : Princeton), 2009-11-30 **English Grammar for Everyone**, **Transitioning Toward Sustainability** National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, Policy and Global Affairs, Science and Technology for Sustainability Program, Committee on Transition Toward Sustainability After 15 Years: Where Do We Stand in Advancing the Scientific Foundation, 2016-08-25 In 1999 the National Academies of Sciences Engineering and Medicine released a landmark report Our Common Journey A Transition toward Sustainability which attempted to reinvigorate the essential strategic connections between scientific research technological development and societies efforts to achieve environmentally sustainable improvements in human well being 1 The report emphasized the need for place based and systems approaches to sustainability proposed a research strategy for using scientific and technical knowledge to better inform the field and highlighted a number of priorities for actions that could contribute to a sustainable future The past 15 years have brought significant advances in observational and predictive capabilities for a range of natural and social systems as well as development of other tools and approaches useful for sustainability planning In addition other frameworks for environmental decision making such as those that focus on climate adaptation or resilience have become increasingly prominent A careful

consideration of how these other approaches might intersect with sustainability is warranted particularly in that they may affect similar resources or rely on similar underlying scientific data and models To further the discussion on these outstanding issues the National Academies of Sciences Engineering and Medicine convened a workshop on January 14 15 2016 Participants discussed progress in sustainability science during the last 15 years potential opportunities for advancing the research and use of scientific knowledge to support a transition toward sustainability and challenges specifically related to establishing indicators and observations to support sustainability research and practice This report summarizes the presentations and discussions from the workshop

Tug of War Wilmer G. Villacorta, 2017-07-14 A treatment of power vulnerability and suffering in the life and ministry of mid career leaders offers a reminder of the need to rethink power The push and pull of power dynamics unless acknowledged and surrendered can impact leaders spirituality relationships character and ultimately their faithfulness in ministry To supplement countless books on leadership models techniques and motivation this book offers a counter narrative of power informed by and embedded in the message of the cross it elaborates on a humble use of power and proposes a reframing of power as seen in Christ s downward ascent and cruciform strength This book is of critical importance in the field of ministry formation local and global because it probes to the very core of our human condition illuminating one of the chief perils in lives of position and leadership the misconstrual and misuse of power a reality that can be particularly destructive in spiritual and ministry contexts The larger Christian community will also find relevance in this message as leaders of every ilk share common challenges in the struggles of power and control You will find a very personal and deeply reflective treatment on our common human condition and an invitation to admit our inner and external struggles over the use and practice of power in ministry

Leave Love with Me William Lawton, 2023-09-19 Desire for beauty is at the heart of human existence Some find this meaning out of their religious or spiritual perspective Some find it at the edge of their traditions And others find it outside any recognizable tradition This book speaks especially to the second and third groups of people Desire releases us to explore difference and to honor alternatives Desire shapes our lives in unique ways It centers our energies for personal and relational change where difference can be debated and variety permitted We might transcend circumstances that limit us Desire is more than meaningfulness it is captivation of mind and spirit to life s possibility In my discovery desire is an abandonment to beauty

Politics of Empathy Anthony M. Clohesy, 2013-09-05 The Politics of Empathy argues that empathy is a necessary condition for ethical subjectivity and the emergence of a more compassionate world One of the reasons empathy is important is because it gives us a sense of what it is like to be someone else However to understand its ethical significance we need to look elsewhere This book claims that empathy is ethically significant because uniquely it allows us to reflect critically on the nature of our own lives and sense of identity More specifically it allows us to reflect critically on the contingency finitude and violence that define existence It is argued that without this critical reflection a more ethical and democratic world cannot come into being Our challenge today therefore is to establish the social and political conditions in which empathy can flourish This will be a difficult task because powerful political and cultural forces are reinforcing the divisions between us rather than encouraging us to come together in a cosmopolitan community of mutual recognition and

solidarity However despite these limits there is hope for a brighter future The book argues that this can only come about if the Left accepts its responsibility to articulate the contours of a new politics of internationalism and establish the foundations of a sustainable ethical community in which strangers will be accepted unconditionally This work will be of interest to students and scholars of political theory multiculturalism and international relations
