Grindon,2022-09-05 In Country Rambles and Manchester Walks and Wild Flowers Leo H Grindon intricately weaves a tapestry of nature local geography and personal reflection that invites readers to explore the lush landscapes and urban flora of England during the Victorian era This work is characterized by its lyrical prose and keen observations blending natural history with poetic appreciation As readers traverse the countryside and cityscapes alongside Grindon they encounter rich descriptions of wildflowers which serve as a lens through which to appreciate both the beauty of the natural world and the changes brought by industrialization within the burgeoning context of ecological awareness emerging in this period Grindon a botanist and educated gentleman was deeply immersed in the natural sciences and Victorian culture which undoubtedly informed his writings His passion for botany and

the outdoors led him to document the flora and fauna of the regions he explored particularly as urban expansion threatened natural habitats Such insights reveal a profound connection to the environment and reflect the growing public interest in nature as both a refuge and a subject for intellectual inquiry in a transforming society Recommended for nature enthusiasts historians and literary aficionados alike Grindon's work serves not only as a guide to the natural environment but also as an evocative meditation on the interplay between humanity and nature Country Rambles and Manchester Walks and Wild Flowers is a timeless read that encourages reflection on the beauty of the world around us **Shami Tree** Narayan G Hegde,2022-04-01 Sham an aspiring youth from a prosperous rural family narrates the conflict between ancient cultural values and the emerging modern lifestyle He realises that in the process of receiving good education to tap new opportunities and lead a lavish life the new generation has been chasing materialistic acquisition at the cost of social inequality and environmental destruction ending up in stress and frustration Realising the erosion of traditional values the enlightened villagers with the advice of their spiritual leader try to strike a balance between moral obligations cultural values and emerging opportunities of the new world to live happily and in harmony with nature The Shami tree in Hindu mythology is a symbol of strength and endurance which sacrifices its own life to save other lives while inspiring human beings to search for self realisation It also demonstrates its importance in the food chain and in the conservation of biodiversity This self help fiction motivates young parents to understand their moral obligations and promote spiritual and cultural values among their growing children **Report of the Director to the Board of Trustees - Chicago. Standefer,2020-11-10 This utterly spectacular book weighs the impact modern medical technology has had on the author's life against the social and environmental costs inevitably incurred by the mining that makes such innovation possible Rachel Louise Snyder author of No Visible Bruises What if a lifesaving medical device

causes loss of life along its supply chain That s the question Katherine E Standefer finds herself asking one night after being suddenly shocked by her implanted cardiac defibrillator In this gripping intimate memoir about health illness and the invisible reverberating effects of our medical system Standefer recounts the astonishing true story of the rare diagnosis that upended her rugged life in the mountains of Wyoming and sent her tumbling into a fraught maze of cardiology units dramatic surgeries and slow painful recoveries As her life increasingly comes to revolve around the internal defibrillator freshly wired into her heart she becomes consumed with questions about the supply chain that allows such an ostensibly miraculous device to exist So she sets out to trace its materials back to their roots From the sterile labs of a medical device manufacturer in southern California to the tantalum and tin mines seized by armed groups in the Democratic Republic of the Congo to a nickel and cobalt mine carved out of endemic Madagascar jungle Lightning Flowers takes us on a global reckoning with the social and environmental costs of a technology that promises to be lifesaving but is in fact much more complicated Deeply personal and sharply reported Lightning Flowers takes a hard look at technological mythos healthcare and our cultural relationship to medical technology raising important questions about our obligations to one another and the cost of saving one life

*Multispecies Storytelling in Intermedial Practices* Ida Bencke, Jørgen Bruhn, 2022-03-08 *Multispecies Storytelling in Intermedial Practices* is a speculative endeavor asking how we may represent relay and read worlds differently by seeing other species as protagonists in their own rights What other stories are to be invented and told from within those many tongued chatters of multispecies collectives Could such stories teach us how to become human otherwise Often the human is defined as the sole creature who holds language and consequently is capable of articulating representing and reflecting upon the world And yet the world is made and remade by ongoing and many tongued conversations between various organisms reverberating with sound movement gestures hormones and electrical signals Everywhere life is making itself known heard and understood in a wide variety of media and modalities Some of these registers are available to our human senses while some are not Facing a

not so distant future catastrophe which in many ways and for many of us is already here it is becoming painstakingly clear that our imaginaries are in dire need of corrections and replacements How do we cultivate and share other kinds of stories and visions of the world that may hold promises of modest yet radical hope If we keep reproducing the same kind of languages the same kinds of scientific gatekeeping the same kinds of stories about our place in nature we remain numb in the face of collapse Multispecies Storytelling in Intermedial Practices offers steps toward a self critical multispecies philosophy which interrogates and qualifies the broad and seemingly neutral concept of humanity utilized in and around conversations grounded within Western science and academia Artists activists writers and scientists give a myriad of different interpretations of how to tell our worlds using different media and possibly gives hints as to how to change it too
