Our Hollywood:

Hollywood's America Stephen P Powers, 2018-02-19 American motion pictures still dominate the world market with an impact that is difficult to measure Their role in American culture has been a powerful one since the 1930s and is a hallmark of our culture today Though much has been written about the film industry there has been very little systematic attention paid to the ideology of its creative elite How does the outlook of that elite impact on the portrayals of America that appear on the screen How do their views interact with the demands of the market and the structure of the industry to determine the product that is seen by mass audiences Hollywood s America is a marvellously rich and careful discussion of these questions It combines a meticulous systematic content analysis of fifty years of top grossing films with a history of the changing structure of the industry To that mixture it adds an in depth survey of Hollywood s creative elite comparing them to other leadership groups The result is a balanced discussion of unique breadth and depth on a subject of national importance Placing the film industry in the context of American society as a whole the authors point out that Hollywood s creative leadership impacts the larger society even as it is influenced by that society The creators of films cannot remove themselves too far from the values of the audiences that they serve However the fact that films are made by a relatively small number of people who as the authors demonstrate tend to share a common outlook means that over time motion pictures have had an undeniable impact on the beliefs lifestyles and action of Americans This study contributes to the debate over the role and influence of those who create and distribute the products of mass culture in the United States The book also contains a devastating critique of the poststructuralist theories that currently dominate academic film criticism demonstrating how they fail in their attempt to explain the political significance of motion pictures

Hollywood's Others Katherine Fusco, 2025-09-02 We tend to think about movie stars as either glamorous or relatable But in the 1920s and 1930s when the Hollywood star system was taking shape a number of unusual stars appeared on the silver screen representing groups from which the American mainstream typically sought to avert its eyes What did it mean for a white entertainment columnist to empathize with an ambiguously gendered Black child star Or for boys to idolize Lon Chaney famous for portraying characters with disabilities *Hollywood's Others* explores the affective ties between white non-disabled audiences and the fascinatingly different stars with whom they identified but only up to a point Katherine Fusco argues that stardom in this era at once offered ways for viewers to connect across group boundaries while also policing the limits of empathy Examining fan magazines alongside film performances she traces the intense audience attachment to atypical celebrities and the ways the film industry sought to manage it Fusco considers Shirley Temple's career in light of child labor laws and changing notions of childhood shows how white viewers responded to Black music in depictions of the antebellum South and analyzes the gender politics of conspiracy theories around celebrity suicides Shedding light on marginalized stardoms and the anxieties they provoked *Hollywood's Others* challenges common notions about film's capacity to build empathy
