Our Cultural Cancer And Its Cure:

Public Philosophy and Political Science E. Robert Statham, 2002-01-01 The crisis of western civilization is a crisis of public philosophy This is the charge of Public Philosophy and Political Science a stunning new collection of essays edited by E Robert Statham Jr Vividly cataloging the decay of the moral and intellectual foundations of civic liberty the book portrays a generation of Americans alienated from institutions built on public philosophy The work exposes the failure of America s political scientists to acknowledge and understand this alarming crisis in the American body politic The distinguished contributors examine the evolution of public philosophy the inextricable relationship between politics and philosophy and the interplay between public philosophy the constitution natural law and government They reveal the dire threat to deliberative democracy and the fundamental order of constitutional society posed by public philosophy s waning power to refine cultivate and civilize The work is an indictment of a society which has discarded a way of life rooted in natural law democracy and the traditions of civility and is a denunciation of an educated elite that has divorced itself from the standards upon which public philosophy rests It is essential reading for philosophers and political and social scientists seeking to resurrect the standards of American public life Our Bodies Are Selves Philip Hefner, 2015-12-31 Our Bodies Are Selves is a look at what it means

to be human in a world where medical technology and emerging ethical insight force us to rethink the boundaries of humanity spirit and man machine This book gives us a fresh look at how our expanding biological views of ourselves and our shared evolutionary history shows us a picture that may not always illumine who and where we are as Christians Offering up Christian theological views of embodiment the authors give everyday examples of lives of love faith and bodily realities that offer the potential to create new definitions of what it means to be a faith community in an increasingly technological age of medicine **Health, Disease and Healing in Medieval Culture** Sheila Campbell, Bert Hall, David Klausner, 1992-03-14

This volume of studies seeks an anthropological view of medicine and the healing arts as they were situated within the lives of medieval people Miracle cures and charms as well as drugs and surgery fall within the scope of the authors represented here as does advice about diet and regimen As well the volume looks at wellness and illness in broad contexts avoiding the tendency of modern medicine to focus on the isolation and definition of pathological states **How Healing Works** Wayne

Jonas, M.D., 2018-01-09 Drawing on 40 years of research and patient care Dr Wayne Jonas explains how 80 percent of healing occurs organically and how to activate the healing process In How Healing Works Dr Wayne Jonas lays out a revolutionary new way to approach injury illness and wellness Dr Jonas explains the biology of healing and the science behind the discovery that 80 percent of healing can be attributed to the mind body connection and other naturally occurring processes Jonas details how the healing process works and what we can do to facilitate our own innate ability to heal Dr Jonas s advice will change how we consume health care enabling us to be more in control of our recovery and lasting wellness Simple line illustrations communicate statistics and take aways in a memorable way Stories from Dr Jonas s practice and studies further

illustrate his method for helping people get well and stay well after minor and major medical events Treating Cancer with Herbs Michael Tierra,2003 Cancer is the scourge of our age More than any other disease cancer has captured our fears and projected despair throughout society Our bodies have become the experimental real life testing grounds for countless chemical toxins pollutants refined foods and stresses These toxins are clearly exerting their effect in the rise of numerous forms of cancer striking every part of our bodies The medical profession is attempting to attack these cancers with every available form of chemical radiation and invasive surgery While modern medicine has long recognized the healing potential of herbs some of the most commonly used cancer medicines were originally developed from herbs we have been indoctrinated to believe that surgery radiation and chemical therapies are the only successful procedures even though they tend to fail much of the time and may actually destroy the quality of life to such a degree that many believe the cure is worse than the disease There is another approach to the treatment of cancer Finding cancer's root causes and applying a holistic understanding of lifestyle diet stress reduction and appropriate nutritional and herbal support can strengthen the body and its immune system restore the spirit and balance the psyche of the cancer patient With this integrative approach a healthy mental and emotional balance joins a healthy approach to life to truly treat cancer Not every cancer patient is cured but every patient is brought to a state of understanding which in many cases leads to what appear to be miraculous remissions In other cases it allows the individual to experience a quality of life and passing uncommon in our society the ability to face life and death with dignity and a sense of completion Book jacket *CANCER CURE AND MYSTRIES AND YOGA* Dr. NITIN UNKULE,2010-08-01 In this book I have described significant patterns in the life histories and emotional responses of cancer patients which suggested to me the notion of a Cancer Personality and then I came to know where the real Cancer in our society is There should be a certain resonance between therapist and patient as a decisive factor in psychotherapy which triggers the natural healing process Thus my basic interest is in paranormal phenomena while dealing with cancer and heart patients simply because evolution in Biology is outdated now the talk is about evolution of consciousness Changing the patient's belief system about cancer and the belief systems of the patient and the physician are crucial to the success of the therapy and can be used effectively to support the patient's potential for selfhealing **THE HEALING OF A CULTURE** Eugene Chiaverini,2010-01-21 *Diagnosis Narratives and the Healing Ritual in Western Medicine* James Meza,2018-07-17 The dominance of illness narratives in narrative healing studies has tended to mean that the focus centers around the healing of the individual Meza proposes that this emphasis is misplaced and the true focus of cultural healing should lie in managing the disruption of disease and death cultural or biological to the individual's relationship with society By explicating narrative theory through the lens of cognitive anthropology Meza reframes the epistemology of narrative and healing moving it from relativism to a philosophical perspective of pragmatic realism Using a novel combination of narrative theory and cognitive anthropology to represent the ethnographic data Meza's ethnography is a valuable contribution in a field where ethnographic

records related to medical clinical encounters are scarce The book will be of interest to scholars of medical anthropology and those interested in narrative history and narrative medicine **A Beginner's Guide to Targeted Cancer Treatments**
