The Automaticity of Everyday Life Robert S. Wyer, Jr., 2014-02-25 As Skinner argued so pointedly the more we know about the situational causes of psychological phenomena the less need we have for postulating internal conscious mediating processes to explain those phenomena Now as the purview of social psychology is precisely to discover those situational causes of thinking feeling and acting in the real or implied presence of other people it is hard to escape the forecast that as knowledge progresses regarding social psychological phenomena there will be less of a role played by free will or conscious choice in accounting for them In other words because of social psychology's natural focus on the situational determinants of thinking feeling and doing it is inevitable that social psychological phenomena increasingly will be found to be automatic in nature This 10th book in the series addresses automaticity and how it relates to social behavior The lead article written by John Bargh argues that social psychology phenomena are essentially automatic in nature as opposed to being mediated by conscious choice or reflection Bargh

maintains that an automatic mental phenomenon is that which occurs reflexively whenever certain triggering conditions are in place when those conditions are present the process runs off autonomously independently of conscious guidance In his lead article he focuses on these preconscious automatic processes that can be contrasted with postconscious and goal dependent forms of automaticity which depend on more than the mere presence of environmental objects or events Because social psychology like automaticity theory and research is also largely concerned with phenomena that occur whenever certain situational features or factors are in place social psychology phenomena are essentially automatic Students and researchers in social and cognitive psychology will find this to be a provocative addition to the series

Class and Everyday Life Kirsteen Paton, 2023-11-28 Exploring the issues of class through in depth studies of housing sport art music and politics in Britain Class and Everyday Life persuasively demonstrates the pervasive influence of class on everyday life and the need to centre a radical understanding of class within emancipatory political movements The need for a more expansive understanding of class is politically urgent There is a disconnect between descriptive and analytical approaches to class and the politics of class and realities around how class is lived Discourse has been shaped by top down frameworks of analysis and measurements which have stripped the study of class of its political radicalism This book makes the case for a sociology of class which is informed by a politics of class based upon using the everyday as the point of enquiry It presents a sociology of class from the bottom up which focuses on everyday life and the point at which class is made and remade In doing so it advocates for an attentiveness to class and everyday life through a conjunctural analysis Using an everyday lens this book examines how the shifting conjunctures manifest in everyday spaces in classed ways and how such changes are negotiated resisted and shape the working class subject and communities This is based upon an understanding of everyday classed experiences which identifies and challenges inequalities while also recognising value and hope This perspective aims to offer a recognition of both the opportunities and challenges of class as a way of developing a stronger more politicised understanding of class which takes solidarity and class community power seriously to resist inequality and develop emancipatory politics This urgent and impassioned book will be essential reading for students academics and activists with an interest in the lived experience of class in Britain today
