**Our Daughter Learns to Read and Write** Marcia Baghban, 1984      Handbook of Early Childhood Literacy Nigel Hall, Joanne Larson, Jackie Marsh, 2003-12-06

This volume examines early literacy research on a global scale and puts social cultural and historical analyses in the front seat without losing sight of individual and family level matters in the process. It is comprehensive, ground breaking and provocative and should help literacy researchers to think differently about the field. Marjorie Faulstich Orellana, School of Education and Social Policy, Northwestern University. No other publication that I am aware of brings together views from such diverse disciplines contributing to a comprehensive statement about early childhood literacy. The Handbook not only reviews the current field of situated literacy but presents some important and exciting new research. It is a significant resource which promises to become a landmark text. Eve Bearne, University of Cambridge, Faculty of Education. This Handbook brings together an astonishing array of writers who explore contemporary political, cultural and cognitive understandings of early childhood literacy. Literacy and literacy acquisition are broadly defined here to encompass not just traditional notions of reading and writing but multimodalities, multiliteracies and critical literacies. It is rich and comprehensive, an invaluable resource for scholars, educators and students of early childhood literacy. Elsa Auerbach, Professor of English, University of Massachusetts Boston. This book is unique in its broad consideration of topics and its global focus. I particularly appreciate how the Editors have situated current research in an historical context. They have also included development issues, pedagogy research and the newest areas of interest: critical literacy and popular culture. Diane Barone, University of Nevada, Reno. The editors and their contributors place a strong emphasis on literacy as a social practice that occurs outside school settings. This broad interpretation is a healthy counterblast to the current political views and legislation in many developed countries and should be welcomed by practitioners. Another very welcome dimension is the can-do approach that celebrates young children's literacy achievements. This is an informative and insightful text for researchers and students to dip into and think about for some years to come. Marian Whithead, writing in *Nursery World*. An inspired and stimulating read aimed at researchers, academics, professionals and students in the fields of early years education and research and early childhood literacy. It will also be of interest to those working in other disciplines such as cultural studies and sociology. I think this collection of work by the range of authors, some of which are the most distinguished and renowned in the field, not only represents real value for money but also makes an essential, in-depth, perceptive and invaluable contribution to this relatively new and dynamic field. It offers some cutting-edge, contemporary and exciting material combined with well-founded wisdom and indeed excellent sources for further reading. *British Journal of Educational Studies*. In recent years there has been a virtual revolution in early childhood studies with a mass of books and papers seeking to re-examine and reposition childhood. At the same time an equally significant area has developed within literacy studies reflecting a growing interest in the nature of literacy as a socially situated phenomenon. There is increased interest in

literacy as a multimodal concept in which symbolic meaning is a central concept rather than more conventional and narrower notions of literacy The Handbook of Early Childhood Literacy is central in providing access to all these different perspectives The Handbook offers a way through the vast diversity of publications on early childhood literacy by providing comprehensive and up to date reviews of research and thinking in early childhood literacy The arrangement of chapters reflects a contemporary perspective on research into early childhood literacy Major sections include the global world of early childhood literacy childhood literacy and family community and culture the development of literacy in early childhood pedagogy and early childhood literacy and researching early childhood literacy Contributions by leading authorities focus on literacy as a socially situated and global experience one that is evolving in relation to changes in contemporary culture and technological innovation
