D. Hirsch,2020-08-11 From the bestselling author of Cultural Literacy a passionate and cogent argument for reforming the way we teach our children Why after decades of commissions reforms and efforts at innovation do our schools continue to disappoint us In this comprehensive book educational theorist E D Hirsch Jr masterfully analyzes how American ideas about education have veered off course what we must do to right them and most importantly why He argues that the core problem with American education is that educational theorists especially in the early grades have for the past sixty years rejected academic content in favor of child centered and how to learning theories that are at odds with how children really learn The result is failing

schools and widening inequality as only children from content rich usually better off homes can take advantage of the schools educational methods Hirsch unabashedly confronts the education establishment arguing that a content based curriculum is essential to addressing social and economic inequality A nationwide specific grade by grade curriculum established in the early school grades can help fulfill one of America s oldest and most compelling dreams to give all children regardless of language religion or origins the opportunity to participate as equals and become competent citizens Hirsch not only reminds us of these inspiring ideals he offers an ambitious and specific plan for achieving them Hirsch s case is clear and compelling His book ought to be read by anyone interested in the education and training of the next generation of Americans Glenn C Altschuler The Boston Globe Hirsch once again challenges the prevailing child centered philosophy championing a return to a subject centered approach to learning Publishers Weekly **Forest and Stream** ,1901
