**Secure Key Establishment** Kim-Kwang Raymond Choo, 2008-10-25 Research on Secure Key Establishment has become very active within the last few years Secure Key Establishment discusses the problems encountered in this field This book also introduces several improved protocols with new proofs of security Secure Key Establishment identifies several variants of the key sharing requirement Several variants of the widely accepted Bellare and Rogaway 1993 model are covered A comparative study of the relative strengths of security notions between these variants of the Bellare Rogaway model and the Canetti Krawczyk model is included An integrative framework is proposed that allows protocols to be analyzed in a modified version of the Bellare Rogaway model using the automated model checker tool Secure Key Establishment is designed for advanced level students in computer science and mathematics as a secondary text or reference book This book is also suitable for practitioners and researchers working for defense agencies or security companies

**Cryptographic Protocol** Ling Dong, Kefei Chen, 2012-06-20 Cryptographic Protocol Security Analysis Based on Trusted Freshness mainly discusses how to analyze and design cryptographic protocols based on the idea of system engineering and that of the trusted freshness component A novel freshness principle based on the trusted freshness component is presented this principle is the basis for an efficient and easy method for analyzing the security of cryptographic protocols The reasoning results of the new approach when compared with the security conditions can either establish the correctness of a cryptographic protocol when the protocol is in fact correct or identify the absence of the security properties which leads the structure to construct attacks directly Furthermore based on the freshness principle a belief multiset formalism is presented This formalism's efficiency rigorousness and the possibility of its automation are also presented The book is intended for researchers engineers and graduate students in the fields of communication computer science and cryptography and will be especially useful for engineers who need to analyze cryptographic protocols in the real world Dr Ling Dong is a senior engineer in the network construction and information security field Dr Kefei Chen is a Professor at the Department of Computer Science and Engineering Shanghai Jiao Tong University
