Public Space Design and Social Cohesion Patricia Aelbrecht, Quentin Stevens, 2019-01-22 Social cohesion is often perceived as being under threat from the increasing cultural and economic differences in contemporary cities and the increasing intensity of urban life Public space in its role as the main stage for social interactions between strangers clearly plays a role in facilitating or limiting opportunities for social cohesion But what exactly is social cohesion how is it experienced in the public realm and what role can the design of city spaces have in supporting or promoting it There are significant knowledge gaps between the social sciences and design disciplines and between academia and practice and thus a dispersed knowledge base that currently lacks nuanced insight into how urban design contributes to social integration or segregation This book brings together scholarly knowledge at the intersection of public space design and social cohesion It is based on original scholarly research and a depth of urban design practice and analyses case studies from a variety of cities and cultures across the

Constructing Singapore Public Space Limin Hee, 2016-09-21 This book presents possible alternatives and interpretations to the well established notion in the mostly western discourse on public space The discourse on public space as understood in the democratic rationalist tradition when applied to the Singaporean public space would offer much criticism but would not be adequate in identifying alternative processes that allow for transformative potentials in public space Thus said the objectives of this book are 1 To develop a conceptual frame of reference to construct the discourse on Singapore public space 2 To form a preliminary model of Singapore public space through analyzing case studies 3 To understand the modes methods of production and representation of these public spaces within the rapidly changing urban context 4 To situate these constructions of public space and its possible trajectories within the larger discourse on public

space and to examine the viability of such a construction and interpretive model of public space
