Publish Your Own Novel:

Self-Publishing Guide for Independent Authors Anthony Ekanem, 2016-10-17 If you have always dreamed of being a writer you can live your dreams by writing your own book and then self publishing Self publishing is the way that many writers today are choosing to get their book out to the public Self publishing today is not the same as it was years ago when you had to spend thousands of dollars to publish your book You can self publish a book for as little as 500 when you choose a good self publishing service online The first thing that you need to do is to know your genre The one rule of writing is that you should write about what you know If you have a specific genre that you read chances are that this is what you will want to write about Take a look at your interests and the type of books that you read before you decide on your genre Your book should never be just about making money it should be about something for which you have a passion There are many different genres available in both fiction and non fiction Before you start your book have a plan of what it will be about and the genre it will fill You need to have a specific genre when you are writing a book so that you will be able to market it properly Some books will cross genre lines such as paranormal and romance Some books will fit neatly into a specific genre It should be clear what the book is about to the reader so that they will be interested in what you have written enough to buy the book Most readers have types of books that they like to read and tend to stick to one or two genres If you are writing a non fiction book there are also genres You need to make your book stand out among the rest in a way that will set it apart from other books of the same genre *Just Do It! You Can't Publish Your Own Book* Leo Donaldson, 2017-05-02 A Well Crafted Book On How To Go About Getting Your Own Book Published JUST DO IT YOU CAN PUBLISH YOUR OWN BOOK Is a well written book that will teach you to publish your own work Each page has a number of links to websites where you can find even more information on what is discussed You will learn that to Self Publish is relatively easy the problem is that finding all the information that is scattered all over the Internet could take a long time This book has all of the basics covered and more It provides the information that will help you to get your book published in no time Pretty soon you will have your very own Published book Here are some of the chapters that you ll find inside the Book How to Self Publish Who To Distribute Through And How Is A Website For Your Book Important The Importance Of Building An E mail List Authorship Easy Publishing Kindle Unlimited Marketing Your Newly Published Book Tips And Much More Having gone the route of having a traditional publisher as well as self publishing my own work I decided to save you some time and money by putting all the information that you might need to get yourself started in the world of self publishing into an easy to read book I know that it can be a daunting task to try and figure out which route would be the easiest and or most feasible That is why I wrote this book Everything you need to know to get started is right here Self publishing has never been easier than right now

Publish Your Own Book (and Pocket the Profits) Jacquelyn Peake, 2000-12 This is an easy to read volume that shows just how any writer can become the published author of his or her own book Using information from her own experiences the

author of Publish Your Own Book shows the reader how to copyright a book and get the Library of Congress number work with a printer choose and eye catching cover determine a profitable cover price get free publicity promote the book on radio and television work with a co author if desired get the book reviewed in major newspapers sell through the mail sell through distributors and much more Getting a book accepted and published today by one of the major publishing houses is difficult and for many excellent writers nearly impossible For that reason hundreds of authors are choosing to self publish their own books This book shows how to do just that Self-Publishing Guide for Independent Authors Anthony Ekanem,2020-04-29 If you have ever dreamed of writing and publishing your own book you can realise that dream through self publishing Self publishing is the route many writers choose these days to make their works available to the reading public Self publishing today is different from what it used to be many years ago when authors had to spend a lot of money to publish their book Today authors can self publish their book for free or for as little as 100 depending on the self publishing platform they choose As a soon to be author the first thing you need to do to self publish a book is to know your genre One of the rules of writing is that you should write about what you know If you have a specific genre that you enjoy reading chances are that that is the genre you will want or like to write about Consider your interests and the types of book that you read before you decide on the genre you want to venture into Your major aim of writing a book should not be to make money It should be about something you have interest and passion for There a lot of genres available in both fiction and non fiction writing Before you start writing your book have a plan of what the book will be about and the genre it will fit in You need to focus on a specific genre when you are writing a book so you can market it Some books may cross genre lines such as paranormal and romance books while some books will fit neatly into a genre What your book is about should be very clear to the would be reader so they will be interested in what you have written to want to buy the book Most readers have the types of books they like to read and have a habit of sticking to a few genres There are different genres for both fiction and non fiction books You need to make sure your book stands out from other books in the same category If you are writing a romance novel for instance how do you make it stand out from other romance novels that are already in the bookstores This is a question you must answer Once you have determined your genre and know exactly what you want to write about you should begin to think of marketing your book Make it something that prospective readers will choose when they see it in bookstores or online This will set it apart from other books of the same kind and lure readers to buy it You can make a career out of self publishing your books and marketing them to the right audience After you have decided on what you are going to write about and what will make your book stand out from the rest you can then begin to outline your book You should write down an outline of the book and the points you are trying to make Well written books convey a message Make sure your book conveys a good message to the readers that they can take away from the book While you may like the free form method of writing which is writing without doing any sort of outline you must still have an idea of the ending of the book in mind If you are writing a fiction book

characters come alive as you write The ending you have in mind may change as you rewrite the book so it is important to be very flexible The way you write depends on the type of person you are If you wish to have everything ironed out for your book then you must write down an outline that will tell you where you are heading This is like having a roadmap for a car trip Get a copy of this well written book to learn all you need to know about self publishing and how you can use it to your advantage
