Punch Down Under:

The Transnational Voices of Australia's Migrant and Minority Press Catherine Dewhirst, Richard Scully, 2020-11-13
This edited collection invites the reader to enter the diverse worlds of Australia's migrant and minority communities through the latest research on the contemporary printed press spanning the mid nineteenth century to our current day. With a focus on the rare radical and foreign language print culture of multiple and frequently concurrent minority groups newspaper ventures this volume has two overarching aims: firstly to demonstrate how the local experiences and narratives of such communities are always forged and negotiated within a context of globalising forces, the global within the local; and secondly to enrich an understanding of the complexity of Australian voices through this medium not only as a means for appreciating how the cultural heritage of such communities were sustained but also for exploring their contributions to the wider society.

Concrete Pavement Design, Construction, and Performance Norbert J. Delatte, 2014-05-22
This second edition of *Concrete Pavement Design, Construction and Performance* provides a solid foundation for pavement engineers seeking relevant and applicable design and construction instruction. It relies on general principles instead of specific ones and incorporates illustrative case studies and prime design examples to highlight the material. *Punch*, 1861

Concrete Pavement Design, Construction, and Performance Norbert Delatte, 2018-10-08
Addressing the interactions between the different design and construction variables and techniques, this book illustrates best practices for constructing economical long life concrete pavements. The book proceeds in much the same way as a pavement construction project. First, different alternatives for concrete pavement solutions are outlined. The desired performance and behaviour parameters are identified. Next, appropriate materials are outlined and the most suitable concrete proportions determined. The design can be completed and then the necessary construction steps for translating the design into a durable facility are carried out. Although the focus reflects highways as the most common application, special features of airport, industrial and light duty pavements are also addressed. Use is made of modeling and performance tools such as HIPERPAV and LTPP to illustrate behavior and performance along with some case studies. As concrete pavements are more complex than they seem and the costs of mistakes or of over design can be high, this is a valuable book for engineers in both the public and private sectors. *A Portrait of the Artist as Australian* Paul Matthew St. Pierre, 2004
This book is the first critical assessment of Humphries' entire oeuvre, especially his career as an author. Arguing that Humphries is one of Australia's greatest writers, the author reveals a multi-faceted artist whose success is rooted in the British music hall tradition, Dadaism and grotesquerie. Being Australian has also fundamentally shaped the performer and writer, and the author's defence of Humphries against charges of expatriatism is pertinent to the debate on Australian national identity.
