Puritanismus Und Pioniergeist:

Puritanismus und Pioniergeist Ulrike Brunotte, 2000 Mit der berfahrt der Mayflower 1620 begann die neuenglische Geschichte als ein puritanisches Gr ndungsexperiment inmitten der Wildnis Anhand von Selbstzeugnissen wird die bewegte Geschichte der religionspolitischen Anf nge Nordamerikas rekonstruiert *Solidarity* Hauke Brunkhorst, 2005 A political sociologist examines the concept of universal egalitarian citizenship and assesses the prospects for developing democratic solidarity at the global level British Protestant Missions and the Conversion of Europe, 1600-1900 Simone Maghenzani, Stefano Villani, 2020-09-14 This book is the first account of British Protestant conversion initiatives directed towards continental Europe between 1600 and 1900 Continental Europe was considered a missionary land another periphery of the world whose centre was imperial Britain British missions to Europe were informed by religious experiments in America Africa and Asia rendering these offensives against Europe a true form of imaginary colonialism British Protestant missionaries often understood themselves to be at the forefront of a civilising project directed at Catholics and sometimes even at other Protestants Their mission was further reinforced by Britain becoming a land of compassionate refuge for European dissenters and exiles This book engages with the myth of International Protestantism questioning its early origins and its narrative of transnational belonging while also interrogating Britain as an imagined Protestant land of hope and glory In the history of western Christianities converting Europe had a role that has not been adequately investigated This is the story of the attempted and ultimately failed effort to convert a continent Aesthetics of Religion Alexandra K. Grieser, Jay Johnston, 2017-12-18 This volume is the first English language presentation of the innovative approaches developed in the aesthetics of religion The chapters present diverse material and detailed analysis on descriptive methodological and theoretical concepts that together explore the potential of an aesthetic approach for investigating religion as a sensory and mediated practice In dialogue with yet different from other major movements in the field material culture anthropology of the senses for instance it is the specific intent of this approach to create a framework for understanding the interplay between sensory cognitive and socio cultural aspects of world construction The volume demonstrates that aesthetics as a theory of sensory knowledge offers an elaborate repertoire of concepts that can help to understand religious traditions These approaches take into account contemporary developments in scientific theories of perception neuro aesthetics and cultural studies highlighting the socio cultural and political context informing how humans perceive themselves and the world around them Developing since the 1990s the aesthetic approach has responded to debates in the study of religion in particular striving to overcome biased categories that confined religion either to texts and abstract beliefs or to an indisputable sui generis mode of experience This volume documents what has been achieved to date its significance for the study of religion and for interdisciplinary scholarship **Protestants** C. Scott Dixon, 2010-10-11 Protestants A History from Wittenberg to Pennsylvania 1517 1740 presents a comprehensive thematic history of the rise and influence of the branches of Christianity

that emerged out of the Protestant Reformation Represents the only English language single volume survey of the rise of early modern Protestantism from its Lutheran beginnings in Germany to its spread to America Offers a thematic approach to Protestantism by tracing its development within the social political and cultural context of early modern Europe Introduces innovative argument that the central dynamic of Protestantism was not its struggle with Catholicism but its own inner dynamic Breaks from traditional scholarship by arguing that the rise of Reformation Protestantism lasted at least two centuries Unites Old World and New World Protestant histories

Virtual Immortality - God, Evolution, and the Singularity in Post- and Transhumanism Oliver Krüger, 2021-10-01 In recent years ideas of post and transhumanism have been popularized by novels TV series and Hollywood movies According to this radical perspective humankind and all biological life have become obsolete Traditional forms of life are inefficient at processing information and inept at crossing the high frontier outer space While humankind can expect to be replaced by their own artificial progeny posthumanists assume that they will become an immortal part of a transcendent superintelligence Krüger's award winning study examines the historical and philosophical context of these futuristic promises by Ray Kurzweil Nick Bostrom Frank Tipler and other posthumanist thinkers

Critical Theory of Legal Revolutions Hauke Brunkhorst, 2014-06-19 This unique work analyzes the crisis in modern society building on the ideas of the Frankfurt School thinkers Emphasizing social evolution and learning processes it argues that crisis is mediated by social class conflicts and collective learning the results of which are embodied in constitutional and public law First the work outlines a new categorical framework of critical theory in which it is conceived as a theory of crisis It shows that the Marxist focus on economy and on class struggle is too narrow to deal with the range of social conflicts within modern society and posits that a crisis of legitimization is at the core of all crises It then discusses the dialectic of revolutionary and evolutionary developmental processes of modern society and its legal system This volume in the Critical Theory and Contemporary Society by a leading scholar in the field provides a new approach to critical theory that will appeal to anyone studying political sociology political theory and law
