Purposive Diversification And Economic Performance:

Purposive Diversification and Economic Performance John T. Scott, 1993-06-25 This book examines product line diversification of large manufacturing firms. It introduces and applies methodology that discerns groups of manufacturing industries related by complementarities in production, marketing, distribution, and research and development activities. Manufacturing firms intentionally vary production to exploit these complementarities, and Professor Scott uses evidence from U.S. manufacturing to explore hypotheses about such purposive diversification and ensuing economic performance, including product diversification's effects on both static efficiency and the optimality of R & D investment. This study yields new perspectives on the policy debate about cooperation versus competition among firms: will industrial performance be better if leading firms cooperate on research, production, and marketing? Professor Scott shows that the answers depend on circumstances that vary with different industrial environments. His analysis offers insights about business strategy and public policy toward business combinations in conglomerate, vertical, and horizontal mergers, and in cooperative R & D ventures.

Entrepreneurial Complexity Matthias Dehmer, Frank Emmert-Streib, Herbert Jodlbauer, 2019-02-25 *Entrepreneurial Complexity: Methods and Applications* deals with theoretical and practical results of Entrepreneurial Sciences and Management (ESM), emphasising qualitative and quantitative methods. ESM has been a modern and exciting research field in which methods from various disciplines have been applied. However, the existing body of literature lacks the proper use of mathematical and formal models. Individuals who perform research in this broad interdisciplinary area have been trained differently. In particular, they are not used to solving business-oriented problems mathematically. This book utilises formal techniques in ESM as an advantage for developing theories and models which are falsifiable. Features: Discusses methods for defining and measuring complexity in entrepreneurial sciences. Summarises new technologies and innovation-based techniques in entrepreneurial sciences. Outlines new formal methods and complexity models for entrepreneurship. To date, no book has been dedicated exclusively to use formal models in Entrepreneurial Sciences and Management.
