Paul Lauritzen

Pursuing Parenthood Ethical Issues In Assisted Reproduction:

Pursuing Parenthood Paul Lauritzen,1993 Begins by identifying the basic objections that have been raised to reproductive technology by the Catholic Church and others and shows why many of these criticisms are misplaced This book argues that critics of reproductive technology have too frequently assumed that genetic connection is the sole basis of parental obligation

Pursuing parenthood Paul Lauritzen,1993 **Ethics and Economics of Assisted Reproduction** Maura A. Ryan,2003-06-11 For those who undergo it infertility treatment is costly time consuming invasive and emotionally and physically arduous yet technology remains the focus of most public discussion of the topic Drawing on concepts from medical ethics feminist theory and Roman Catholic social teaching Maura A Ryan analyzes the economic ethical theological and political dimensions of assisted reproduction Taking seriously the experience of infertility as a crisis of the self the spirit and the body Ryan argues for the place of reproductive technologies within a temperate affordable sustainable and just health care system She contends that only by ceasing to treat assisted reproduction as a consumer product can meaningful questions about medical appropriateness and social responsibility be raised She places infertility treatments within broader commitments to the common good thereby understanding reproductive rights as an inherently social rather than individual issue Arguing for some limits on access to reproductive technology Ryan considers ways to assess the importance of assisted reproduction against other social and medical prerogatives and where to draw the line in promoting fertility Finally Ryan articulates the need for a compassionate spirituality within faith communities that will nurture those who are infertile

A Christian Response to the New Genetics David H. Smith,Cynthia B. Cohen,2003 Life is a gift that includes powers to be used and celebrated but that doesn t necessarily justify the use of every new power that comes along This volume appeals to both secular and religious readers in the centre of the great debate over our new genetic powers These essays affirm many traditional Christian perspectives and virtues while also

introducing new insights transfer genetic manipulation patenting health insurance and the moral status of embryos They conclude that it is naive to either to reject outright or wholeheartedly embrace the new genetic powers In fact sometimes the best we can expect is to learn how to cope with moral uncertainty

Parental Obligations and Bioethics Bernard G. Prusak,2013-10-15 This book examines the question of what parental obligations procreators incur by bringing children into being Prusak argues that parents as procreators have obligations regarding future children that constrain the liberty of would be parents to do as they wish Moreover these obligations go beyond simply respecting a child s rights He addresses in turn the ethics of adoption child support gamete donation surrogacy prenatal genetic enhancement and public responsibility for children

Legal and Ethical Issues in Human Reproduction Bonnie Steinbock,2002 This collection of essays by thirteen leading international scholars in bioethics law philosophy and public health addresses many of the most difficult and intriguing issues surrounding today s advances in reproductive medicine

The Online World of Surrogacy Zsuzsa Berend,2016-09-01 Zsuzsa Berend presents a methodologically innovative ethnography of SurroMomsOnline com the largest surrogacy support website in the United States Surrogates views emerge from the stories debates and discussions that unfold online The Online World of Surrogacy documents these collective meaning making practices and explores their practical emotional and moral implications In doing so the book works through themes of interest across the social sciences including definitions of parenthood the symbolic role of money reproductive loss altruism and the moral valuation of relationships

Sex, Gender, and Christian Ethics Lisa Sowle Cahill,1996-08-28 This book endorses feminist critiques of gender yet upholds the insight of traditional Christianity that sex commitment and parenthood are fulfilling human relations Their unity is a positive ideal though not an absolute norm Women and men should enjoy equal personal respect and social power In reply to feminist critics of oppressive gender and sex norms and to communitarian proponents of Christian morality Cahill argues that effective intercultural criticism of injustice requires a modest defence of moral objectivity She thus adopts a critical realism as its moral foundation drawing on Aristotle and Aquinas Moral judgment should be based on reasonable practical prudent and cross culturally nuanced reflection on human experience This is combined with a New Testament model of community centred on solidarity compassion and inclusion of the economically or socially marginalised

Theological Bioethics Lisa Sowle Cahill,2005-11-16 The field of bioethics was deeply influenced by religious thinkers as it emerged in the 1960s and early 1970s Since that time however a seemingly neutral political liberalism has pervaded the public sphere resulting in a deep suspicion of those bringing religious values to bear on questions of bioethics and public policy As a theological ethicist and progressive Catholic Lisa Sowle Cahill does not want to cede the religious perspective to fundamentalists and the pro life movement nor does she want to submit to the gospel of a political liberalism that champions individual autonomy as holy writ In Theological Bioethics Cahill calls for progressive religious thinkers and believers to join in the effort to reclaim the best of their traditions through jointly engaging political forces at both community and national

levels In Cahill's eyes just access to health care must be the number one priority for this type of participatory bioethics She describes a new understanding of theological bioethics that must go beyond decrying injustice beyond opposing social practices that commercialize human beings beyond painting a vision of a more egalitarian future Such a participatory bioethics she argues must also take account of and take part in a global social network of mobilization for change it must seek out those in solidarity those involved in a common calling to create a more just social political and economic system During the past two decades Cahill has made profound contributions to theological ethics and bioethics This is a magisterial and programmatic statement that will alter how the religiously inclined understand their role in the great bioethics debates of today and tomorrow that yearn for clear thinking and prophetic wisdom
