

## **I. Topic: Industrial Revolution**

*Images from [www.sutori.com](http://www.sutori.com)*

## **II. Objectives**

After reading and doing the tasks in this module, you should be able to

- A. Discuss the impact of industrial revolution to economy and world view
- B. Describe the interaction between science and technology during the industrial revolution
- C. Identify the stages of the continuing industrial revolution
- D. Name the dominant technologies in the different stages of industrial revolution

## **III. Introduction**

Science can change the worldview of society but it is a long process as shown in the medieval scientific revolution and the Darwinian revolution. Science's influence on technology, and technology's impact to society however are different stories. This module discusses how application of science in technology played a role in the industrial revolution. The advancement in technology since the industrial revolution went through different stages. How these stages are characterized and how they impacted society are also discussed in this module.

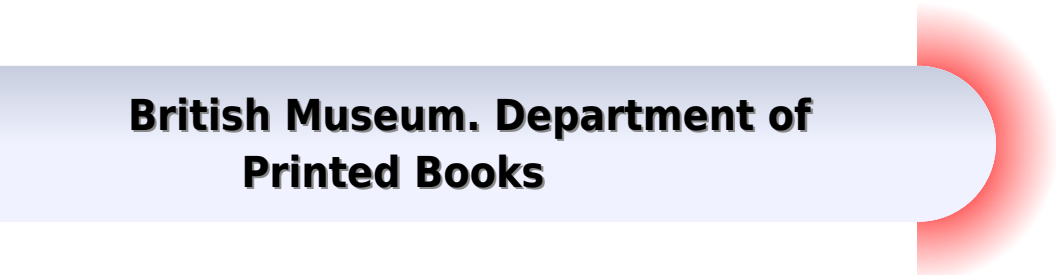

## **IV. Discussion**

### ***The Industrial Revolution***

The industrial revolution started in the textile industry in Britain in 1750. Textile production was greatly improved by the spinning jenny (1764) which allowed textile workers to work eight times faster than the single-spindle method. Figure 1 shows the single-spindle foot powered spinning wheel and the spinning jenny. The main difference between the two technologies is the numerous spindle frame in the spinning jenny. Both machines were operated manually. The advancement in iron founding led to the development of bigger mills driven by water. Later on these mills would be driven by steam engines.
