Love As God Had Intended: A High School Science Teacher Is Given Lessons in Goodness By Native American Teenagers

Harry Cralle, This is a true story about the kind of love for one another that God had intended It is a love that arose between a young white man the author and a group of Native American high school students in an experimental school in Chicago in the early 1970s I was a volunteer general science teacher who attempted to teach science with a spiritual dimension within the guide lines of a public school There are many instances of humorous and serious classroom events However most of the book is devoted to dramatic events outside the school involving sports violence crime police sexual abuse attempted suicide attempted murder and great acts of self sacrificing love On two occasions adult Native Americans put me in mortal danger I was saved in one case by two male Native American teenagers ages 14 and 15 and in the other case by the 15 year old male and a 14 year old female They risked their lives to save my life These experiences show how the love that God had intended overcame all social and historical barriers all anger and jealousy all bitterness and resentment to generate goodness and the courage to battle and defeat evil When we see the moon or planets we see the reflected light of the Sun In the love and goodness of these heros I saw the reflection of the love and goodness of God From 1983 to 2017 I had a professorship in teaching and research at Texas A M University in the Department of Soil Crop Sciences In my 34 years at TAMU I taught more than 13 000 students and supervised more than 300 graduate teaching assistants I taught courses in agricultural ethics history of farming in the Great Plains world food and fiber crops sustainable crop production agricultural extension and international agricultural development My research areas were the interaction of crops and weeds biological nitrogen fixation and the distribution of the products of photosynthesis within plants I am now retired In this book I show how deeply my teaching and understanding of life was affected by these young Native Americans **The Science and Theology of**

Godly Love Matthew T. Lee,Amos Yong,2012-06-15 Arguing that there are ways to move beyond the limitations of methodological atheism without compromising scientific objectivity the essays gathered in The Science and Theology of Godly Love explore the potential for collaboration between social science and theology They do so within the context of the interdisciplinary study of Godly Love which examines the perceived experience of loving God being loved by God and thereby being motivated to engage in selfless service to others This volume serves as an introduction to and a call for further research in this new field of study offering ten methodological perspectives on the study of Godly Love written by leading social scientists and theologians Drawing on the work of Douglas Porpora and others the contributors contend that agnosticism is the appropriate methodological stance when religious experience is under the microscope Godly Love does not force a theistic explanation on data instead these essays show that it sensitizes researchers so that they can take seriously the faith and beliefs of those they study without the assumption that these theologies represent an incontestable truth **On**

Science, Necessity, and the Love of God Simone Weil, 1968 Science, Scripture, and Same-Sex Love Michael B. Regele, 2014-10-31 Some church leaders assert that same sex practices are incompatible with Christian teaching The issues threaten to divide our churches and our nation Michael B Regele explores current scientific findings in biological brain research psychology and sociology which he compares with scriptural teaching from the Bible to show that a faithful reading of the Scriptures is consistent with Christian teaching that affirms same sex love leading to same sex marriage and full participation of LGBT people in church leadership Regele offers compelling research and well supported answers to common place questions such as Is sexual orientation a choice that individuals make Is same sex attraction sinful in itself Is it true that lesbian gay bi sexual and transgender LGBT people are more promiscuous than heterosexual people Is it true that same sex relationships do not last as long as hetero sex relationships Is abstinence for life the only choice for a Christian LGBT person Or can they enter into intimate and sexual relationships and still be active participants in a Christian community Is same gender marriage acceptable from a Christian standpoint **SCIENCE FICTION Ultimate Collection: 140+**

Islam and Science Robert Morrison, 2007-09-17 In examining the work of eminent fourteenth century Iranian Shiite scholar Nizam al Din al Nisaburi, this book is the first rigorous attempt to explain the cross fertilization of scientific and religious thought in Islamic civilization. Nisaburi did not consider himself a scientist alone; being commissioned by his patrons to work in a variety of fields. *Islam and Science* examines in detail the relationship between the metaphysics of Nisaburi's science and statements he made in his Qur'an commentary and in other non-scientific writings. Sources suggest that Nisaburi was inspired to begin his scientific career by the inclusion of basic science in a religious madrasa education. By mid-career, he had found methodological similarities between theoretical astronomy and Islamic jurisprudence. Morrison concludes that while Nisaburi believed science could give one a taste of God's knowledge, he realised that the study of science and natural philosophy alone could not lead him to a spiritual union with God. Only Sufi practice and Sufi theory could accomplish that. Morrison's work is remarkable in synthesizing the history of Islamic science with other areas of Islamic studies. It will be of interest to students and scholars of religion and the history of science, as well as readers with a more general interest in Middle Eastern studies. Winner of the Iranian World Prize for Book of the Year in Islamic Studies 2009.

basic terms as natural goods natural and moral law and conscience Scientific and religious belief systems are then compared thoroughly and by logical deduction and verisimilitude One main argument is that every kind of belief system has an upper and a lower bound of credibility yet a degree of credibility that leads to the impossibility of rational justification for scientific belief systems must not be required from religious belief systems Further topics are internal and external consistency local refutation mutual complementation between religion and theory of evolution as well as a comparison of the five world religions leading to general features of religion It is shown that one main yet basic axiom of morality is the principle of charity Finally the book concludes with the credibility requirements of science towards religion and those of religion towards science

Signs, Science and Symbols of the Prophecy Aspen Christian College, 2008-10 The real mystery of the movement of God's Spirit and Words can be found subtly spoken in the foundation of the Church on the day of Pentecost In the book of Acts chapter 2 where the Apostle Peter quotes the prophet Joel who said in last days that God would pour out in spirit on all people and that non clerical people sons and daughters would be revealed mysteries of God Such is so with the Author of this book Although he is not a member of the clergy Andrew the Prophet is receiving many revelations from God and how they relate to Science and current world events
