Lordship In France 500 15:

Lordship in France, 500-1500 James Lowth Goldsmith, 2003 Lordship in France 500 1500 presents a new interpretation of lordship in medieval France based on recent ground breaking research on the Merovingian Carolingian and Capetian eras of lordship in medieval France In the standard interpretation lordship emerged around the year 1000 when landed magnates and armed adventurers usurped public authority from the collapsing Carolingian state This book argues instead that lordship emerged roughly 500 hundred years earlier with the disintegration of the Roman Empire Politically and socially lordship expressed the collegial ruling authority of kings and aristocrats not the usurped public authority of a failed centralized state Institutionally lordship was essentially a fiscal apparatus that perpetuated remnants of the late Roman tax system Lordship, Capitalism, and the State in Flanders (c. 1250-1570) Frederik Buylaert, Miet Adriaens, 2025-03-30 This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Until recently historians tended to assume that in the late medieval period local lordship was effectively crushed between strong cities and states Developing recent debates to the contrary Lordship Capitalism and the State in Flanders draws on qualitative and quantitative evidence from the county of Flanders to reconsider the ways in which lordship continued to be a cornerstone of life in rural Europe across this period Flanders is an extreme example of a scenario in which seigneuries were not so much vehicles for the elite interests of lords but dynamic instruments for village communities and lordship here was as important if not moreso at the start of the Dutch Revolt in 1567 than it was around the mid thirteenth century where this study begins As a forerunner in the commercialization and urbanization of society Flanders saw the rise of mighty towns who provided the inhabitants of their hinterlands with a shield against seigneurial oppression up to the point that the seigneurial administration could only continue to function if it was closely aligned with the interests of peasants Next to this the Low Countries including Flanders became part of the mighty Burgundian Habsburg polity Rather than undermining seigneurial lordship however the princely administration increasingly relied on the peasant aldermen of seigneuries to provide justice and governance to villages The self rule of Flemish peasantries through lordship meant that the seigneurie was the forum in which contemporaries made a critical decision that being how to respond to the new and all encompassing phenomenon of agrarian capitalism a mode of agricultural production that first emerged in the Low Countries and Flanders before spreading to the rest of the globe The persistence and transformation of seigneurial lordship into what might be called middle class lordship thus had great consequences for Flemish society across the late medieval period and beyond and this story helps scholars to understand more generally how power relations between lords and peasants differed from one region to the next in dialogue with different trajectories in urbanization economic change and state formation *Agrarian Change and Crisis in Europe, 1200-1500* Harilaos Kitsikopoulos, 2012-03-15 Agrarian Change and Crisis in Europe 1200 1500 addresses one of

the classic subjects on economic history the process of aggregate economic growth and the crisis that engulfed the European continent during the late Middle Ages This was not an ordinary crisis During the period 1200 1500 Europe witnessed endemic episodes of famine and a wave of plague epidemics that amounted to one of its worst health crises rivaled only by the Justinian plague in the sixth century These challenges called into question the production of goods and services and the distribution of wealth opening the possibility of fundamental systemic change This book offers an empirical synthesis on a host of economic demographic and technological developments which characterized the period 1200 1500 It covers virtually the entire continent and places equal emphasis both on providing a solid factual framework and comparing and contrasting various theoretical interpretations The broad geographical and conceptual scope of the book renders it indispensable not only for undergraduate students who take courses relating to the economic and social life of the Middle Ages but also to more advanced scholars who often specialize in only one country or region

Lordship and the Decentralized State in Late Medieval Europe Erika Graham-Goering, Jim van der Meulen, Frederik Buylaert, 2025-01-23 Lordship and the Decentralized State in Late Medieval Europe rethinks the rise of modern European states as a process of decentralization The idea that states made lordships obsolete is challenged by showing how the distribution of authority among local lords reinforced the development of new political systems
