## **Los Alamos Wildfires Wildfires Environmental Disasters Milwaukee Wis:**

**Los Alamos Wildfires** Nichol Bryan, 2003-07 The massive wildfire racing down a mountain toward a nuclear research center in New Mexico wasn't caused by carelessness. It was deliberately set by the U.S. National Park Service on May 4, 2000 as a controlled burn to prevent future forest fires. Instead, it quickly blazed out of control, destroying acres of forests, consuming homes, and causing the evacuation of Los Alamos and other cities. Learn how firefighters worked to contain this environmental disaster and see why fire control remains a controversial practice. Book jacket **Facts on File World News Digest Yearbook**, 2000 **Library Journal** Melvil Dewey, Richard Rogers Bowker, L. Pylodet, Charles Ammi Cutter, Bertine Emma Weston, Karl Brown, Helen E. Wessells, 2007 Includes beginning Sept 15, 1954 and on the 15th of each month Sept-May a special section. School library journal. ISSN 0000-0035 called Junior Libraries. 1954-May 1961. Also issued separately.

**Who's Who in America** Marquis Who's Who, Inc., 2002 **Inferno by Committee** Tom Ribe, 2010-05-12 Tom Ribe's clear, scrupulous and thorough account of the Los Alamos Bandelier fire of 2000 is a white-knuckle narrative yet meticulously accurate. Roger G. Kennedy, former Director of U.S. National Park Service, Director Emeritus of the National Museum of American History, Smithsonian Institution, and author of *Wildfire and Americans*, *Inferno by Committee* tells the story of America's worst prescribed fire disaster: the Cerro Grande Fire of 2000, which burned 250 homes in Los Alamos, New Mexico. The fire started with a National Park Service prescribed fire that went out of control and ended up burning 42,000 acres of the Santa Fe National Forest. A thorough review of the investigations of the fire and the policy changes that resulted from this seminal event in American fire history are also an integral part of this examination. Prescribing fire on the landscape involves risk. Sometimes, as with the Cerro Grande Fire, the risk taken results in disaster. For land managers, there really is no option but to prescribe fire and take risk to restore fire to a landscape where fire is native and necessary for the survival of biological systems. Cerro Grande showed us both the consequences of taking a risk with fire and, more dramatically, the consequences of avoiding that risk. *Fire Management* Barry Thomas Hill, 2000 **Fire management lessons learned from the Cerro Grande (Los Alamos) fire**, **Inferno by Committee** Tom Ribe, 2010 Tom Ribe's clear, scrupulous and thorough account of the Los Alamos Bandelier fire of 2000 is a white-knuckle narrative yet meticulously accurate. W. Koch, R. G. Balice, 2004 To support efforts to protect facilities and property at Los Alamos National Laboratory from damages caused by wildfire we completed a multiyear project to develop a system for modeling the behavior of wildfires in the Los Alamos region This was accomplished by parameterizing the FARSITE wildfire behavior model with locally gathered data representing topography fuels and weather conditions from throughout the Los Alamos region Detailed parameterization was made possible by an extensive monitoring network of permanent plots weather towers and other data collection facilities We also incorporated a database of lightning strikes that can be used individually as repeatable ignition points or can be used as a group in Monte Carlo simulation exercises and in

other randomization procedures The assembled modeling system was subjected to sensitivity analyses and was validated against documented fires including the Cerro Grande Fire The resulting modeling system is a valuable tool for research and management It also complements knowledge based on professional expertise and information gathered from other modeling technologies However the modeling system requires frequent updates of the input data layers to produce currently valid results to adapt to changes in environmental conditions within the Los Alamos region and to allow for the quick production of model outputs during emergency operations Fire Management U S Government Accountability Office (G,U. S.

Government Accountability Office (,2013-06 Pursuant to a congressional request GAO discussed the circumstances surrounding the Los Alamos wildfire focusing on 1 the events leading up to the prescribed fire and how it was managed and 2 what fire management policies or practices need to be improved GAO noted that 1 the Cerro Grande fire exposed policy implementation issues that need to be addressed for managing prescribed fires 2 most of the issues involved procedural gaps or a lack of clarity about how policies are to be implemented 3 these issues affected both the planning and implementation of the burn 4 some of the issues are specific to Bandelier National Monument and the National Park Service 5 however others involve other federal agencies and 6 those problems that are not site or agency specific raise questions about the readiness of the federal land management agencies to effectively support and administer prescribed burns as a forest management tool

**In Fire's Way** Tom Wolf,2003-01-24 A fire fighting tool for homeowners and firefighters alike this guide discusses both the properties of wildfires and ways to minimize damage Authored by an environmental journalist with advanced degrees in forestry it is a must have book designed to help westerners understand the Wildfire Danger Zone **Proposed Future**
