6 Year Access David M. Hassenzahl, Linda R. Berg, Mary Catherine Hager, 2017-11-06      **Access Is Capture** Roderic N Crooks, 2024-09-03 Racially and economically segregated schools across the United States have hosted many interventions from commercial digital education technology edtech companies who promise their products will rectify the failures of public education. Edtech's benefits are not only trumpeted by industry promoters and evangelists but also vigorously pursued by experts, educators, students, and teachers. Why then has edtech yet to make good on its promises? In *Access Is Capture*, Roderic N Crooks investigates how edtech functions in Los Angeles public schools that exclusively serve Latinx and Black communities. These so-called urban schools are sites of intense ongoing technological transformation where the tantalizing possibilities of access to computing meet the realities of structural inequality. Crooks shows how data-intensive edtech delivers value to privileged individuals and commercial organizations but never to the communities that hope to share in the benefits. He persuasively argues that data-drivenness ultimately enjoins the public to participate in a racial project marked by the extraction of capital from minoritized communities to enrich the tech sector.

**Consular Notification and Access**, 2003 This booklet contains instructions and guidance relating to the arrest and detention of foreign nationals, deaths of foreign nationals, the appointment of guardians for minors or incompetent adults who are foreign nationals, and related issues pertaining to the provision of consular services to foreign nationals in the United States. This booklet is designed to help ensure that foreign governments can extend appropriate consular services to their nationals in the United States and that the United States complies with its legal obligations to such governments. The instructions and guidance herein should be followed by all federal, state, and local government officials, whether law enforcement, judicial, or other, insofar as they pertain to foreign nationals subject to such officials' authority or to matters within such officials' competence.

Introduction to Art Image Access Murtha Baca, 2002-07-25 With the proliferation of information on the World Wide Web and in other networked environments, one of the main things that users search for are images of works of art and architecture. End users generally try to search for images by subject, a process that often proves unsatisfactory and frustrating. Cataloging images of works of art has always been challenging, but now that end users need only have access to the Internet, the challenge is more daunting than ever. This illustrated book on using metadata standards and controlled vocabularies to catalog and provide accurate end-user access to images of works of art also focuses on decisions that must be made about the arrangement of visual records, descriptive principles and methodologies, and requirements for access. *Introduction to Art Image Access* addresses the issues that underlie a visual collection to make it accessible in an electronic environment. A glossary, selected bibliography, and list of acronyms and URLs are included.
