The Unnaming of Kroeber Hall Andrew Garrett,2023-12-12 A critical examination of the complex legacies of early Californian anthropology and linguistics for twenty first century communities In January 2021 at a time when many institutions were reevaluating fraught histories the University of

California removed anthropologist and linguist Alfred Kroeber's name from a building on its Berkeley campus. Critics accused Kroeber of racist and dehumanizing practices that harmed Indigenous people; university leaders repudiated his values. In *The Unnaming of Kroeber Hall*, Andrew Garrett examines Kroeber's work in the early twentieth century and his legacy today, asking how a vigorous opponent of racism and advocate for Indigenous rights in his own era became a symbol of his university's failed relationships with Native communities. Garrett argues that Kroeber's most important work has been overlooked: his collaborations with Indigenous people throughout California to record their languages and stories. *The Unnaming of Kroeber Hall* offers new perspectives on the early practice of anthropology and linguistics and on its significance today and in the future. Kroeber's documentation was broader and more collaborative and multifaceted than is usually recognized. As a result, the records Indigenous people created while working with him are relevant throughout California as communities revive languages, names, songs, and stories. Garrett asks readers to consider these legacies, arguing that the University of California chose to reject critical self-examination when it unnamed Kroeber Hall.

[Literature and Justice in Mid-Twentieth-Century Britain](#) Victoria Stewart, 2022-12-20 *Literature and Justice in Mid-Twentieth Century Britain: Crime and War Crimes* examines how ideas about crime, criminality, and judicial procedure that had developed in a domestic context influenced the representation and understanding of war crimes trials, victims of war crimes, and war criminals in post-Second World War Britain. The representation of Belsen concentration camp and the subsequent British-run trial of its personnel are a particular focal point. Drawing on a range of source material, including life writing, journalism, and detective fiction, as well as criminological and sociological works from this period, this book explains why the fate of the Jews and other victims of the Nazis was sometimes brought starkly into focus and sometimes marginalised in public discourse at this period. What remain are glimpses of the events now called the Holocaust, but glimpses that can be as powerful and as meaningful as more direct or explicit representations.
