scholars of all levels studying the rapidly developing interdisciplinary field of criminology Prosecuting War Crimes James Gow, Rachel Kerr, Zoran Pajic, 2013-09-23 This volume examines the legacy of the International Criminal Tribunal for the former Yugoslavia ICTY which was created under Chapter VII of the UN Charter as a mechanism explicitly aimed at the restoration and maintenance of international peace and security As the ICTY has now entered its twentieth year this volume reflects on the record and practices of the Tribunal Since it was established it has had enormous impact on the procedural jurisprudential and institutional development of international criminal law as well as the international criminal justice project This will be its international legacy but its legacy in the region where the crimes under its jurisdiction took place is less clear research has shown that reactions to the ICTY have been mixed among the communities most affected by its work Bringing together a range of key thinkers in the field Prosecuting War Crimes explores these findings and discusses why many feel that the ICTY has failed to fully engage with people's experiences and meet their expectations This book will be of much interest to students of war crimes international criminal law Central and East European politics human rights and peace and conflict studies **The China Crisis** James R. Gorrie, 2013-05-08 A controversial look at the impending Chinese economic collapse the history behind it its contemporary causes and its dire implications for the global economy All the experts agree the 21st century belongs to China Given America's looming insolvency and the possibility of the collapse of the U S dollar who can doubt that China is poised to take over the role of economic superpower Written by political economist and leading financial journalist James Gorrie this book offers a highly controversial contrarian view of contemporary China Drawing upon a wealth of historical and up to the minute data Gorrie makes a strong case that China itself is on the verge of an economic crisis of epic proportions He explains how caught in a recurrent boom bust cycle that has played itself out several times over the past sixty years China is again approaching total economic and social collapse But with one important difference this time they may very well take the entire global economy down with them Explores the Chinese communist party's unfortunate history of making costly and very bloody mistakes on an enormous scale One by one Gorrie analyzes those critical mistakes and explains how they may lead to economic collapse in China and global depression Describes Chinese cannibal capitalism and where its massive abuse of the country's environment people and arable lands is leading that country and the world economy Chronicles China's history of recurring economic crisis and explains why all the evidence suggests that history is about to repeat itself Stacie E. Goddard, 2009-11-04 This book challenges the conventional wisdom that territorial conflicts in Jerusalem and Northern Ireland were inevitable Stacie Goddard's research shows that it was radical political rhetoric and not ancient hatreds that rendered these territories indivisible preventing negotiation and compromise and leading to violence and war Electoral Violence, Corruption, and Political Order Sarah Birch, 2020-07-21 A comprehensive look at how violence has been used to manipulate competitive electoral processes around the world since World War II Throughout their history political elections have been threatened by conflict and the use of force has in the past several

decades been an integral part of electoral processes in a significant number of contemporary states. However, the study of elections has yet to produce a comprehensive account of electoral violence. Drawing on cross-national data sets together with fourteen detailed case studies from around the world, *Electoral Violence, Corruption and Political Order* offers a global comparative analysis of violent electoral practices since the Second World War. Sarah Birch shows that the way power is structured in society largely explains why elections are at risk of violence in some contexts but not in others. Countries with high levels of corruption and weak democratic institutions are especially vulnerable to disruptions of electoral peace. She examines how corrupt actors use violence to back up other forms of electoral manipulation, including vote buying and ballot stuffing. In addition to investigating why electoral violence takes place, Birch considers what can be done to prevent it in the future, arguing that electoral authority and the quality of electoral governance are more important than the formal design of electoral institutions. Delving into a deeply influential aspect of political malpractice, *Electoral Violence, Corruption and Political Order* explores the circumstances in which individuals choose to employ violence as an electoral strategy.

Accounting for Carbon Neutrality Assunta Di Vaio, Tayyab Ali, 2025-02-19. Despite the progress made so far, the links between environmental, social, and governance (ESG) sustainability pillars remain underexplored, particularly in the context of firms investing in hydrogen for decarbonization. In essence, hydrogen is a lynchpin connecting engineering ingenuity, economic viability, and strategic business decisions. Its multifaceted role underscores its significance in addressing contemporary challenges, driving innovation, and shaping a sustainable future through the accounting system. This book unravels the complexities of carbon control practices, offering insights into financial, operational, and sustainable dimensions. From the challenges of sustainability transitions and technology adoption to utilizing renewable resources and disclosing decarbonization practices, the book explores the critical role of accounting tools and international regulatory frameworks like the United Nations 2030 Agenda, the European Union Green Deal, and the Paris Agreement as organizational collective responsibility in shaping a sustainable future. By incorporating stakeholder stewardship, legitimacy, institutional resource dependency theories, the book bridges gaps in academic research and offers a fresh perspective on decarbonization in the hydrogen sector. The qualitative methodology provides a unified vision from strategies to implementation, guiding companies toward the contribution of the carbon neutrality goal in the hydrogen economy while ensuring accountability for their actions, conduct, and sustainability reporting.

Constitutional Courts, Media and Public Opinion Angioletta Sperti, 2023-11-16. This book explores how constitutional courts have transformed communication and overcome their reluctance to engage in direct dialogue with citizens. How has the information revolution affected the relationship of constitutional courts with the public and the media? The book looks in detail at the communication strategies of the US Supreme Court, the Supreme Court of Canada, and in Europe, the German Federal Constitutional Tribunal, the French Conseil Constitutionnel, and the Italian Constitutional Court, arguing that when it comes to the relationship between courts and the media, different jurisdictions

share many similarities It focuses on the consequences of the communication revolution of courts both in terms of their relationship with public opinion and of the legitimacy of judicial review of legislation Some constitutional courts have attracted criticism by engaging in proactive communication and therefore arguably yielding to the temptation of public support The book argues that objections to the developing institutional communications employed by courts come from a preconceived notion of public opinion It considers the burden the communication revolution has placed on constitutional courts to achieve a balance between transparency and seclusion proximity and distance from public opinion It puts forward important arguments for how this balance can be achieved The book will interest scholars in constitutional law and public comparative law sociologists historians political scientists and scholars of media law and communication studies Rev Iheanyi Hycenth Iruoma, 2010-08 Church politics is a battle among Moses Aaron and Hur pastors in which they determine through un biblical and unhealthy means whose hands should be raised in the church It is a rivalry in which they determine whose rod blossoms It is a bone thrown out to the church leaders cum pastors and workers by the devil to keep them busy while the devil himself sneaks into the church to destroy it

Popular Governance of Post-Conflict Reconstruction

Matthew Saul, 2014-07-24 Under what conditions does a post conflict government have authority What challenges to its legitimacy does it face To what standards can it be held accountable Via case studies of Sierra Leone and Afghanistan and detailed accounts of extant international law Matthew Saul explores the international legal framework which regulates popular governance of post conflict reconstruction **Collective Resistance in China** Yongshun Cai, 2010-02-17 Although academics have paid much attention to contentious politics in China and elsewhere research on the outcomes of social protests both direct and indirect in non democracies is still limited In this new work Yongshun Cai combines original fieldwork with secondary sources to examine how social protest has become a viable method of resistance in China and more importantly why some collective actions succeed while others fail Cai looks at the collective resistance of a range of social groups peasants to workers to homeowners and explores the outcomes of social protests in China by adopting an analytical framework that operationalizes the forcefulness of protestor action and the cost benefit calculations of the government He shows that a protesting group s ability to create and exploit the divide within the state mobilize participants or gain extra support directly affects the outcome of its collective action Moreover by exploring the government s response to social protests the book addresses the resilience of the Chinese political system and its implications for social and political developments in China

Immigration and Integration Policy in Europe Tim Bale, 2013-10-18 The role of political parties in immigration control and integration policy in Europe is underestimated and parties on the centre right are particularly important and interesting in this respect They make up many European governments and therefore help determine state and EU policy Moreover even before the rise of the populist radical right immigration and integration were matters of genuine ideological and practical concern for Europe s market liberal conservative and Christian Democratic parties Exploiting such issues for electoral gain may make superficial sense but too hard a line risks alienating their supporters in business and in civil society as well as undermining party unity It is a difficult balance but one that makes a big difference both to the parties involved and the public policies they help produce This volume brings together experts on both migration and political parties fields that have not always interacted as much as they could or should have done in order to study the impacts dilemmas and trade offs involved This book is based on the special issue of the Journal of European Public Policy
