The Lost Worlds Romance Allienne R. Becker, 1992-06-17 These romances reflect the developing natural and social sciences of the times in which they were written The themes of evolution teleportation human longevity euthanasia other dimensions reincarnation uses of radium utopian and dystopian societies among many others play a prominent part Darwin Marx and Freud have influenced the authors of these romances Becker demonstrates that at a time when the sexual mores of mainstream fiction were fairly repressed writers of the Lost Worlds Romance were permitted much liberty with the erotic imagination The treatment given to women in these romances is explored **Dark Vanishings** Patrick Brantlinger, 2014-01-15 Patrick Brantlinger here examines the commonly held nineteenth century view that all primitive or savage races around the world were doomed sooner or later to extinction Warlike propensities and presumed cannibalism were regarded as simultaneously noble and suicidal accelerants of the downfall of other races after contact with white civilization Brantlinger finds at the heart of this belief the stereotype of the self exterminating savage or the view that savagery is a sufficient explanation for the ultimate disappearance of savages from the grand theater of world history Humanitarians according to Brantlinger saw the problem in the same terms of inevitability or doom as did scientists such as Charles Darwin and Thomas Henry Huxley as well as propagandists for empire such as Charles Wentworth Dilke and James Anthony Froude Brantlinger analyzes the Irish Famine in the context of ideas and theories about primitive races in North America Australia New Zealand and elsewhere He shows that by the end of the nineteenth century especially through the influence of the eugenics movement extinction discourse was ironically applied to the great white race in various apocalyptic formulations With the rise of fascism and Nazism and with the gradual renewal of aboriginal populations in some parts of the world by the 1930s the stereotypic idea of fatal impact began to unravel as did also various more general forms of race based thinking and of social Darwinism Electric Sheep Slouching Towards Bethlehem Harry Eiss, 2014-03-25 On Monday 8 15 a m August 6 1945 the world changed forever In the single largest act of destruction ever initiated by humans a bomb with the equivalent force of 20 000 tons of TNT shattered Hiroshima killing tens of thousands of civilians people who had become used to the American war planes flying overhead planes that were purposely not dropping bombs on their city to the point where the rush to the bomb shelters had become lackadaisical and the normal activities continued with little interruption getting the children up and off to school opening the many small retail stores for the daily customers perhaps stopping at a local caf for morning coffee or tea perhaps joining in on the group exercise classes This is the precise instant we entered the postmodern world one where the easy truths of centuries no longer applied Speculative Fiction projects real possibilities beyond the now shattered assumptions moving through marginalized fictional landscapes science fiction fantasy horror weird fiction supernatural fiction superhero comics graphic novels and movies utopian and dystopian fiction apocalyptic and post apocalyptic fiction Cyber Punk the New Wave as well as related static motion and virtual arts including everything from

graphic novels to video games      **Longing** Tamara S. Greeley Allienne R. Becker, 2000-08-30 The volume approaches Greeleys novels by comparing him to the 19th century French writer Honor de Balzac A prolific and popular author Balzac recorded his milieu in tremendous detail created a fictional universe peopled by hundreds of characters and explored the role of Catholicism in his world Because of his training as a sociologist Greeley brings to his novels a thorough knowledge of popular culture and social theory And because of his experience as a Roman Catholic priest he has gained special knowledge of vice virtue and the workings of the Church Like Balzac now a major canonical author Greeley has created a world of numerous fictional persons mapped the details of his culture and explored the place of Catholicism in contemporary life      **Reinterpreting**

**Exploration** Dane Keith Kennedy, 2014 Exploration was a central and perhaps defining aspect of the West s encounters with other peoples and lands Rather than reproduce celebratory narratives of individual heroism and national glory this volume focuses on exploration s instrumental role in shaping a European sense of exceptionalism and its iconic importance in defining the terms of cultural engagement with other peoples In chapters offering broad geographic range the contributors address many of the key themes of recent research on exploration including exploration s contribution to European imperial expansion Western scientific knowledge Enlightenment ideas and practices and metropolitan print culture They reassess indigenous peoples responses upon first contacts with European explorers their involvement as intermediaries in the operations of expeditions and the complications that their prior knowledge posed for European claims of discovery Underscoring that exploration must be seen as a process of mediation between representation and reality this book provides a fresh and accessible introduction to the ongoing reinterpretation of exploration s role in the making of the modern world

**Ultimate Island** Nicholas Ruddick,1993-01-26 This study confronts current influential theories that science fiction is either an American phenomenon or an international one The study rejects the idea that British science fiction is distinguishable only by its pessimistic outlook while also rejecting the idea that other designations such as scientific romance or speculative fiction better fit the British product Instead the study traces the evolution of British science fiction showing how H G Wells synthesized various strains in English literature and how later writers conscious of this Wellsian tradition built upon Wells s literary achievement An introduction defines what might reasonably be placed under the heading British science fiction and why Chapter 1 examines previous critical ideas about the nature of British science fiction revealing that

most of them are based on untested assumptions Chapter 2 explores the significance of the dominant motif of the island in British SF a motif that suggests that British SF and mainstream English literature have been long and fruitfully intertwined Chapters 3 and 4 deal respectively with British disaster fiction before and after the Second World War They focus on why British science fiction has so frequently seemed obsessed with catastrophe Chapter 5 a polemical conclusion deals with the future of British science fiction based on its current predicament Ultimate Island forms a theoretical counterpart to the author's recently published *British Science Fiction A Chronology 1478 1990* Greenwood 1992 which defines the historical scope of the field
