A Lot of Give Catherine M. Walker, Catherine Pharoah, National Council for Voluntary Organisations (Great Britain), 2002-01-01 What makes people give to charity Is the wealth divide prompting a new age of philanthropy Or is the spirit of giving drying up in an increasingly fragmented individualistic materialistic global society A Lot of Give is the first book to provide up to date information on both the art and science of giving in the UK today Decisions to give are not only about values or faith They result from good charity communications personal finance planning and evidence that donations can make difference to social needs The current climate is seeing a decline in charitable social giving amidst growing social wealth Many people could give much more than they do And all those involved in charities should be asking themselves why don't Charities need to capture a new spirit of giving though developing more imaginative and appropriate techniques of giving This book aims to provide a significant resource for all those involved in stimulating a new age and culture of giving It pulls together for the first time a wide range of information and research on trends in who gives why people give how much people give how people give e philanthropy tax incentives and tax effective giving pub New Sources of Development Finance World Institute for Development Economics Research, 2005 As their Millennium Development Goals world leaders have pledged by 2015 to halve the number of people living in extreme poverty and hunger to achieve universal primary education to reduce child mortality to halt the spread of HIV AIDS and to halve the number of people without safe drinking water Achieving these goals requires a large increase in the flow of financial resources to developing countries double the present development assistance from abroad Examining innovative ways to secure these resources this book sets out a framework for the economic analysis of different sources of funding applying the tools of modern public economics to identify the key issues It examines the role of new sources of overseas aid considers the fiscal architecture and the lessons that can be learned from federal fiscal systems asks how far increased transfers impose a burden on donors and investigates how far one can separate raising resources from their use In turn the book examines global environmental taxes such as a carbon tax the taxation of currency transactions the Tobin tax a development focused allocation of Special Drawing Rights by the IMF the UK Government proposal for an International Finance Facility increased private donations for development purposes a global lottery or premium bond and increased remittances by emigrants In each case it considers the feasibility of the proposal and the resources that it can realistically raise In each case it offers new perspectives and insights into these new and controversial proposals **The Business of Giving** P. Grant, 2011-12-06 The Business of Giving reviews current thinking and surveys the key techniques any philanthropist or grantmaker should adopt It also outlines a generic social investment process that can be utilized for all philanthropic or grantmaking programmes Essential reading for all engaged in or with an interest in philanthropy or civil society in general *The Routledge Companion to Philanthropy* Tobias Jung, Susan D. Phillips, Jenny Harrow, 2016-05-17 Philanthropy the use of private resources for public purposes is undergoing

a transformation both in practice and as an emerging field of study Expectations of what philanthropy can achieve have risen significantly in recent years reflecting a substantial but uneven increase in global wealth and the rolling back of state services in anticipation that philanthropy will fill the void In addition to this experiments with entrepreneurial and venture philanthropy are producing novel intersections of the public non profit and private spheres accompanied by new kinds of partnerships and hybrid organisational forms The Routledge Companion to Philanthropy examines these changes and other challenges that philanthropists and philanthropic organisations face With contributions from an international team of leading contemporary thinkers on philanthropy this Companion provides an introduction to and critical exploration of philanthropy discussing current theories research and the diverse professional practices within the field from a variety of disciplinary perspectives The Routledge Companion to Philanthropy is a rich and valuable resource for students researchers practitioners and policymakers working in or interested in philanthropy

Engaging With Stakeholders Adam Lindgreen, Francois Maon, Joelle Vanhamme, Beatriz Palacios Florencio, Christine Vallaster, Carolyn Strong, 2018-08-15 Engaging with Stakeholders A Relational Perspective on Responsible Business contends that meaningful and constructive stakeholder engagement efforts should be rooted in a deep relational process of shared understanding expectations and viewpoints through honest continued dialogue between stakeholders and company management This anthology follows and reaffirms this view which also establishes the increasing need to explore the subtleties of how companies can respectfully engage their stakeholders in ways that reflect the corporate strategy and contribute to the ongoing development of business activities and creation of value for themselves and stakeholders from social environmental and economic perspectives Stakeholder engagement practices however remain highly complex and difficult to manage their ability to generate value in an inclusive way requires critical consideration Sound stakeholder engagement efforts also constitute a keystone for responsible business activities Drawing on a wide range of literature and studies this book addresses key dimensions of stakeholder engagement through a responsible business lens and thereby contributes to identifying the opportunities challenges and key organizational implications associated with their unfolding The four main topics covered are Delineating the nature and multiple reasons d tre of stakeholder engagement Dialogical and communicational foundations of stakeholder engagement Engaging with diverse stakeholders throughout the value chain Reaping organizational returns and relational rewards of stakeholder engagement efforts **Reporting Disasters** Suzanne Franks, 2014-03-01 The media reporting of the Ethiopian Famine in 1984 5 was an iconic news event It is widely believed to have had an unprecedented impact challenging perceptions of Africa and mobilising public opinion and philanthropic action in a dramatic new way The contemporary international configuration of aid media pressure and official policy is still directly affected and sometimes distorted by what was as this narrative shows also an inaccurate and misleading story In popular memory the reporting of Ethiopia and the resulting humanitarian intervention were a great success Yet alternative interpretations give a radically different picture of misleading journalism and an aid effort which did more harm than good Using privileged access to BBC and Government archives Reporting Disasters examines and reveals the internal factors which drove BBC news and offers a rare case study of how the media can affect public opinion and policymaking It constructs the process that accounts for the immensity of the news event following the response at the heart of government to the

pressure of public opinion And it shows that while the reporting and the altruistic festival that it produced triggered remarkable and identifiable changes the on going impact was not what the conventional account claims it to have been
