Reconciliation Steve Sparks, 2011 In a new ground breaking memoir Reconciliation A Son's Story the author reflects back on his father's war time experiences as the context underlying his own family dynamics and abuse Through the author's research and study of Post Traumatic Stress Disorder he comes to an understanding of his father's behavior and how this deeply impacted the family which eventually leads to healing Steve Sparks writes I owe my success in part to my Dad but not without a high price I call this collateral damage from living in a family culture affected by Post Traumatic Stress Disorder PTSD At that time men at war and coming home from war were too proud to share their stories and admit that anything in the way of mental illness was on the table for discussion My Dad was no different than thousands of veterans with similar symptoms especially those who were battle weary and emotionally damaged The children and wives and others close to these men would have to experiment and learn how to navigate our way through a terrible circumstance We did it well but not without scars that often show WWII has been in our past for well over a half century and most of the Greatest Generation passed on but the effects of PTSD carry forward just like bad genes We are still feeling the effects of WWII when PTSD was not studied and treatment was minimal As a result we are just beginning to address the realities of PTSD including diagnosis and treatment along with complete recovery from this unfortunate mental illness is now possible This is a true American story about father who went to war and came back changed by what he saw and by what he experienced How this impacted his family was profound yet unrecognized for what it

was back then Today we know much more about the effects of PTSD on the individual but what about the family members closest to that person This story of living through a toxic environment yet ultimately coming to an understanding leads to the long sought reconciliation of a son with his father A very timely book this may help the thousands of families of veterans of our own current generation returning from their war experiences to better understand the effects of PTSD on the family About the Author Steve Sparks is a retired information technology sales and marketing executive following over 35 years beginning with the US Navy as a radioman in 1963 He Graduated with a BA in Management from St Mary s College Moraga California Steve is married to his soul mate and business partner Judy and lives on the Oregon coast He is the proud father of 3 grown daughters and 4 grandchildren and 1 great grandchild In addition to writing Steve s current passion and life work is mentoring and improving the education of K 12 kids including helping the responsible non profit agency Neighbors for Kids achieve sustainability

The Origins Of Neuro Linguistic Programming John Grinder,2013-05-09 The Origins of NLP brings together the recollections and thoughts of some of the main protagonists from the very early days of NLP In 1971 Richard Bandler and Frank Pucelik were students at Kresge College at the University of California Santa Cruz They had a strong mutual interest in Gestalt Therapy Frank because of his traumatic time in Vietnam and because he had been working with some disaffected and drug addicted kids and Richard because he had been working with Science and Behavior Books on transcribing and editing Fritz Perls seminal work The Gestalt Approach and Eyewitness to Therapy They started a local Gestalt group and ran 2 3 sessions a week collaborating and experimenting with the language of therapy They started achieving some brilliant results but were

having problems transferring their skills to others and so Richard invited one of their college professors John Grinder to observe what they were doing in order that he would hopefully be able to deconstruct what they were doing that was so effective John was a professor of Linguistics and was instantly impressed with the work that they were doing He was able to add more structure and in due course the three of them formalised what is now known as the Meta Model NLP or Meta as it was known then was born *The Art of Reading Minds* Henrik Fexeus,2019-10-15 The internationally bestselling guide to mind reading by influencing those around you via non verbal communication from human psychology expert Henrik Fexeus How would you like to know what the people around you are thinking Do you want to network like a pro persuade your boss to give you that promotion and finally become the life of every party Now with Henrik Fexeus s expertise you can The Art of Reading Minds teaches you everything you need to know in order to become an expert at mind reading Using psychology based skills such as non verbal communication reading body language and using psychological influence Fexeus explains how readers can find out what another person thinks and feels and consequently control that person s thoughts and beliefs Short snappy chapters cover subjects such as contradictory signs and what they mean how people flirt without even knowing it benevolent methods of suggestion and undetectable influence how to plant and trigger emotional states and how to perform impressive mind reading party tricks Fexeus gives readers practical and often fun examples of how to effectively mind read others and use this information benevolently both in personal and professional settings *Accelerated Learning in Practice* Alistair Smith,1998-01-01 This work offers nine principles for brain based approaches to accelerating learning improving motivation and raising achievement It offers the reader a coherent structure and describes guaranteed ways to motivate learners esteem building tools for schools teachers and parents how to access and teach to different types of intelligence and 17 different ways in which schools can make accelerated learning work *The Alchemy of Intelligence* H.
