

An abstract painting of a landscape. In the foreground, there's a body of water with dark blue and purple tones. A large, dark tree trunk rises from the water, leading up to a large, rounded, reddish-brown tree canopy. The background is a mix of orange, yellow, and green brushstrokes, suggesting a field or forest floor. The sky is a light blue with white clouds.

Quality of Service - IWQoS 2001 Lars Wolf, David Hutchison, Ralf Steinmetz, 2003-05-15. Welcome to IWQoS2001 in Karlsruhe. Quality of Service is a very active research field, especially in the networking community. Research in this area has been going on for some time, with results getting into development and finally reaching the stage of products. Trends in research as well as a reality check will be the purpose of this Ninth International Workshop on Quality of Service. IWQoS is a very successful series of workshops and has established itself as one of the premier forums for the presentation and discussion of new research and ideas on QoS. The importance of this workshop series is also reflected in the large number of excellent submissions. Nearly 150 papers from all continents were submitted to the workshop; about a fifth of these being short papers. The program committee were very pleased with the quality of the submissions and had the difficult task of selecting the relatively small number of papers which could be accepted for IWQoS2001. Due to the tough competition, many very good papers had to be rejected.

SCI: Scalable Coherent Interface Hermann Hellwagner, Alexander Reinefeld, 1999-10-20. Scalable Coherent Interface (SCI) is an innovative interconnect standard (ANSI IEEE Std 1596-1992) addressing the high performance computing and networking domain. This book describes in depth one specific application of SCI: its use as a high speed interconnection network, often called a system area network (SAN), for computer clusters built from commodity workstation nodes. The editors and authors, coming from both academia and industry, have been instrumental in the SCI standardization process, the development and deployment of SCI adapter cards, switches, fully integrated clusters, and software systems, and are closely involved in various research projects on this important interconnect. This thoroughly cross reviewed state of the art survey covers the complete hardware/software spectrum of SCI clusters, from the major concepts of SCI through SCI hardware, networking, and low level software issues, various programming models and environments, up to tools and application experiences.
