Empires of Ancient Eurasia Craig Benjamin, 2018-05-03 The Silk Roads are the symbol of the interconnectedness of ancient Eurasian civilizations Using challenging land and maritime routes merchants and adventurers diplomats and missionaries sailors and soldiers and camels horses and ships carried their commodities ideas languages and pathogens enormous distances across Eurasia The result was an underlying unity that traveled the length of the routes and which is preserved to this day expressed in common technologies artistic styles cultures and religions and even disease and immunity patterns In words and images Craig Benjamin explores the processes that allowed for the comingling of so many goods ideas and diseases around a geographical hub deep in central Eurasia He argues that the first Silk Roads era was the catalyst for an extraordinary increase in the complexity of human relationships and collective learning a complexity that helped drive our species inexorably along a path towards modernity

Hans Scharoun and China Liyang Ding, 2024-11-15 This book presents the first systematic overview and analysis of the deep connection between Scharoun and China offering insights into East West cultural exchange and enriching existing understandings of modernism The German architect Hans Scharoun has typically been pigeonholed as a leading figure in expressionist architecture As this book shows

however this understanding oversimplifies the multifaceted nature of Scharoun's career and overlooks his central role within the tradition of Neues Bauen. The book begins with Scharoun's early interactions with East Asian architects in the 1930s, his active involvement in the Chinese Werkbund 1941-42, and his extensive research on Chinese architecture and urban culture in the mid 1940s and 1950s. The book then examines Scharoun's postwar architectural designs and urban planning projects, most notably the Kollektivplan, the Volksschule Darmstadt, and the Berliner Philharmonie, which incorporated original spatial and urbanistic concepts such as Stadtlandschaft, Raum der Mitte, andaperspectival space, inspired to varying degrees by Chinese architectural and urban planning traditions. The book will appeal to scholars and students of modern architecture, urban planning, and architectural theory, especially those interested in modernism and East-West cultural exchange.

A Political History of the World Jonathan Holslag, 2018-10-25. A three thousand year history of the world that examines the causes of war and the search for peace. In three thousand years of history, China has spent at least eleven centuries at war. The Roman Empire was in conflict during at least 50 per cent of its lifetime. Since 1776, the United States has spent over one hundred years at war. The dream of peace has been universal in the history of humanity. So why have we so rarely been able to achieve it? In *A Political History of the World*, Jonathan Holslag has produced a sweeping history of the world from the Iron Age to the present that investigates the causes of conflict between empires, nations, and peoples, and the attempts at diplomacy and cosmopolitanism. A bird's eye view of three thousand years of history, the book illuminates the forces shaping world politics from Ancient Egypt to the Han Dynasty, the Pax Romana to the rise of Islam, the Peace of Westphalia to the creation of the United Nations. This truly global approach enables Holslag to search for patterns across different eras and regions and explore larger questions about war, diplomacy, and power. Has trade fostered peace? What are the limits of diplomacy? How does environmental change affect stability? Is war a universal sin of power? At a time when the threat of nuclear war looms again, this is a much needed history intended for students of international politics and anyone looking for a background on current events.

Learning from China Carl Fingerhuth, 2004. The powerful social and cultural transformations of recent decades, as expressed in the shape and form of the city, need to be examined and reviewed. New methods and procedures in urban planning and a new relationship between town and land are urgently required. *Learning from China* calls to mind that seminal work of the post-modern, *Learning from Las Vegas*, and relates the principles of Taoist thought and action to the perspectives for a new urban design beyond that of today's truly post-modern.

Shanghai Expo Tim Winter, 2012-10-02. In 2010, Shanghai hosted the largest, most spectacular, and most expensive expo ever. Attracting a staggering 73 million visitors and costing around US \$45 billion, Shanghai Expo broke the records in the history of world's fairs and universal expositions. With more than half of the world's population now living in cities, many of which face uncertain futures, this mega event confronted some of the key challenges facing humanity in the 21st Century, with its theme, *Better City, Better Life*. Just two years after the Beijing Olympics, Shanghai Expo encapsulated a moment in history defined by

China's rise as a global superpower and by the multiple challenges associated with developing more sustainable cities. The thirteen essays here, written by a team of interdisciplinary researchers, offer a uniquely detailed analysis of this globally significant event. Chapters examine displays of futurity and utopia, the limitations of intercultural dialogue, and the ways in which this mega event reflected its geopolitical and cultural moment. Shanghai Expo also concentrates on the interplay between declarations towards urban sustainability and the recent economic, demographic, and sociopolitical trajectories of Shanghai and China more broadly. It will appeal to students and scholars of sociology, history, politics, international relations, economics, Asian studies, China studies, sustainability, and urban studies.

Grid Planning in the Urban Design Practices of Senegal Liora Bigon, Eric Ross, 2020-01-01. This book is the first to trace the genealogy of an indigenous grid pattern, settlement design practice in Africa, and more specifically in Senegal. It does so by analyzing how the precolonial grid plan design tradition of this country has become entangled with French colonial urban grid planning and with present-day hybrid planning cultures. By thus transcending the classic precolonial/colonial/postcolonial metahistorical divides, this properly illustrated book consists of five chapters, including an introductory chapter, historiography, theory and context, and a concluding chapter. The chapters' text has both a chronological and thematic rationale, aimed at enhancing Islamic Studies by situating sub-Saharan Africa's urbanism within mainstream research on the Muslim World and at contributing directly to the wider project of de-Eurocentrizing urban planning history by developing a more inclusive, truly global urban history.

Routledge Handbook of Heritage in Asia Patrick Daly, Tim Winter, 2012-03-29. This Handbook is the first major volume to examine the conservation of Asia's culture and nature in relation to the wider social, political, and economic forces shaping the region today. Throughout Asia, rapid economic and social change means the region's heritage is at once under threat and undergoing a revival as never before. As societies look forward, competing forces ensure they revisit the past and the inherited with the conservation of nature and culture now driven by the broader agendas of identity, politics, tradition, revival, rapid development, environmentalism, and sustainability. In response to these new and important trends, the twenty-three accessible chapters here go beyond sector-specific analyses to examine heritage in interdisciplinary and critically engaged terms encompassing the natural and the cultural, the tangible and intangible. Emerging environmentalisms, urban planning, identity politics, conflict, memorialization, tourism, and biodiversity are among the topics covered here. This path-breaking volume will be of particular interest to students and scholars working in the fields of heritage, tourism, archaeology, Asian studies, geography, anthropology, development, sociology, and cultural and postcolonial studies.

Yinyang Robin Wang, 2012-09-24. The concept of yinyang lies at the heart of Chinese thought and culture. This book explores the relationship between these two opposing forces.

The Grand Documentation Eduard Kögel, 2015-11-13. Ernst Boerschmann was the most influential foreign architectural researcher in China in the first half of the twentieth century. This book concerns his three-year research expedition through the Chinese Empire, 1906-1909. He was the first Westerner to systematically

document China's religious architecture returning from his travels with thousands of photographs sketches and architectural surveys His six major publications leading up to 1931 described here alongside the reactions they caused were milestones on the path to formal study of Chinese architectural history long before Chinese academics themselves began to take interest in the subject in the 1930s

Urban Planning and Development in China and Other East Asian Countries Guanzeng Zhang, Lan Wang, 2018-10-29 This book examines urban development and its role in planning in China and other Asian cities Starting with a substantial narrative on the history development philosophy and urban form of ancient Asian cities it then identifies the characteristics of urban society and different phases of development history It then discusses urbanization patterns in China with a focus on spatial layout of the city clusters in the Yangtze River Delta since the 20th Century Lastly it explores institutional design and the legal system of urban planning in China and other Asian cities As a textbook for the Model Course in English for international students listed by the Ministry of Education in China it helps international researchers and students to understand urban development and planning in Asian cities
