Magic by Design Taylor Ellwood, 2020-01-04 Do you want magical workings that get consistent results? In *Magic by Design*, I teach you how to create your own magical workings instead of relying on magick spell books that aren't providing you the results you want. I'll show you how to simplify or enhance an existing magical spell to get better results. I'll walk you through how to apply the principles of magical design to create your own unique workings that get consistent results. I'll share multiple case studies where I show you how the principles of magical design were applied to create original magical workings that got results and explain why they got results. And as a bonus, you'll also learn how to create long-term magical workings and how to design your own magical systems. This is a practical magic book that shows you how to create your own magical workings and get better results with your magical workings.

Trithemius and Magical Theology Noel L. Brann, 1999-01-01 An examination of Trithemius's magical theology, which argued for the compatibility of magic and Christian doctrines and its influence during the Renaissance and Reformation.

The Anthropology of Magic Susan Greenwood, 2009-11-01 Magic is arguably the least understood subject in anthropology today. Exotic and fascinating, it offers us a glimpse into another world, but it also threatens to undermine the foundations of anthropology due to its supposed irrational and non-scientific nature. Magic has thus often been explained away by social or psychological reduction. *The Anthropology of Magic* redresses the balance and brings magic as an aspect of consciousness into focus through the use of classic texts and cutting-edge research. Suitable for student and scholar alike, *The Anthropology of Magic* updates a classical anthropological debate concerning the nature of human experience. A key theme is that human beings everywhere have the potential for magical consciousness. Taking a new approach to some perennial topics in anthropology, such as shamanism, mythology, witchcraft, and healing, the book raises crucial theoretical and methodological issues to provide the reader with an engaging and critical understanding of the dynamics of magic.

universe were everyday methods of coping with the difficulties of life in antiquity While ancient magic is most often studied through texts like surviving Greco Egyptian spellbooks and artifacts like lead curse tablets for a Greek or Roman magician a ritual was a rich sensual experience full of unusual tastes smells textures and sounds bright colors and sensations like fasting and sleeplessness Greco Roman magical rituals were particularly dominated by the sense of smell both fragrant smells and foul odors Ritual practitioners surrounded themselves with clouds of fragrant incense and perfume to create a sweet and inviting atmosphere for contact with the divine and to alter their own perceptions they also used odors as an instrumental weapon to attack enemies and command the gods Elsewhere odiferous herbs were used equally as medical cures and magical ingredients In literature scent and magic became intertwined as metaphors with fragrant spells representing the dangers of sensual perfumes and conversely smells acting as a visceral way of envisioning the mysterious action of magic The Scent of Ancient Magic explores the complex interconnection of scent and magic in the Greco Roman world between 800 BCE and CE 600 drawing on ancient literature and the modern study of the senses to examine the sensory depth and richness of ancient magic Author Britta K Ager looks at how ancient magicians used scents as part of their spells to put themselves in the right mindset for an encounter with a god or to attack their enemies through scent Ager also examines the magicians who appear in ancient fiction like Medea and Circe and the more metaphorical ways in which their spells are confused with perfumes and herbs This book brings together recent scholarship on ancient magic from classical studies and on scent from the interdisciplinary field of sensory studies in order to examine how practicing ancient magicians used scents for ritual purposes how scent and magic were conceptually related in ancient literature and culture and how the assumption that strong scents convey powerful effects of various sorts was also found in related areas like ancient medical practices and normative religious ritual

Magic and Magicians in the Middle Ages and the Early Modern Time Albrecht Classen, 2017-10-23 There are no clear demarcation lines between magic astrology necromancy medicine and even sciences in the pre modern world Under the umbrella term magic the contributors to this volume examine a wide range of texts both literary and religious both medical and philosophical in which the topic is discussed from many different perspectives The fundamental concerns address issue such as how people perceived magic whether they accepted it and utilized it for their own purposes and what impact magic might have had on the mental structures of that time While some papers examine the specific appearance of magicians in literary texts others analyze the practical application of magic in medical contexts In addition this volume includes studies that deal with the rise of the witch craze in the late fifteenth century and then also investigate whether the Weberian notion of disenchantment pertaining to the modern world can be maintained Magic is oddly but significantly still around us and exerts its influence Focusing on magic in the medieval world thus helps us to shed light on human culture at large

The Doctrine of Transcendental Magic Eliphas Levi, 2013 This is the complete English version of Eliphas Levi's treatise on ritual magic This work is in two parts in this one we establish the kabalistic and magical doctrine in its entirety the other one called *The Ritual of Transcendental Magic* is consecrated to the cultus that is to Ceremonial Magic The one is that which the ancient sages termed the Clavicle the other that which people on the country side still call the Grimoire The numbers and subjects of the chapters which correspond in both parts are in no sense arbitrary and are all indicated in the great universal key of which we give for the first time a complete and adequate explanation Let this work now go its way where it will and become what Providence determines it is finished and we believe it to be enduring because it is strong like all that is reasonable and conscientious Contents Introduction The Candidate The Pillars Of The Temple The Triangle Of Solomon The Tetragram The Pentagram Magical Equilibrium The Fiery Sword Realization Initiation The Kabbalah The Magic Chain The Great Work Necromancy Transmutations Black Magic Bewitchments

Astrology Charms And Philtres The Stone Of The Philosophers Elagabalus The Universal Medicine Divination Summary And General Key Of The Four Secret Sciences The Decline of Magic Michael Hunter, 2020-01-07 A new history which overturns the received wisdom that science displaced magic in Enlightenment Britain In early modern Britain belief in prophecies omens ghosts apparitions and fairies was commonplace Among both educated and ordinary people the absolute existence of a spiritual world was taken for granted Yet in the eighteenth century such certainties were swept away Credit for this great change is usually given to science and in particular to the scientists of the Royal Society But is this justified Michael Hunter argues that those pioneering the change in attitude were not scientists but freethinkers While some scientists defended the reality of supernatural phenomena these sceptical humanists drew on ancient authors to mount a critique both of orthodox religion and by extension of magic and other forms of superstition Even if the religious heterodoxy of such men tarnished their reputation and postponed the general acceptance of anti magical views slowly change did come about When it did this owed less to the testing of magic than to the growth of confidence in a stable world in which magic no longer had a place **The Journal of Mental Science** ,1926
