*Measurements*, 1988      **The Dynamic Magnetosphere** William Liu, Masaki Fujimoto, 2016-08-23 Despite the plethora of monographs published in recent years few cover recent progress in magnetospheric physics in broad areas of research While a topical focus is important to in depth views at a problem a broad overview of our field is also needed The volume answers to the latter need With the collection of articles written by leading scientists the contributions contained in the book describe latest research results in solar wind magnetosphere interaction magnetospheric substorms magnetosphere ionosphere coupling transport phenomena in the plasma sheet wave and particle dynamics in the ring current and radiation belts and extra terrestrial magnetospheric systems In addition to its breadth and timeliness the book highlights innovative methods and techniques to study the geospace      Magnetospheric Physics C.G. Fälthammar, B. Hultqvist, 2013-11-11 This book contains the proceedings of the 1989 Crafoord Symposium organized by the Royal Swedish Academy of Sciences The scientific field for the Crafoord Prize of 1989 was decided in 1988 by the Academy to be Magnetospheric Physics On September 27 1989 the Academy awarded the 1989 Crafoord Prize to Professor J A Van Allen Iowa City USA for his pioneer work in space research in particular for the discovery of the high energy charged particles that are trapped in the Earth s magnetic field and form the radiation belts often called the Van Allen belts around the Earth The subject for the Crafoord Symposium which was held on September 28 29 at the Royal Swedish Academy of Sciences in Stockholm was Magnetospheric Physics Achievements and Prospects Some seventy of the world s leading scientists in magnetospheric physics see list of participants were invited to the Symposium The program contained only invited papers After the resresentation of the Crafoord Prize Laureate Prof J A Van Allen and his specially invited lecture Active Experiments in Magnetospheric Physics follows in these proceedings two papers on the achievements of magnetospheric research hitherto The main part of the proceedings 8 papers deal with the main theme of the Symposium How we shall carry on magnetospheric research in the future The Symposium was organized by five members of the Academy representing the field of space physics Lars Block Stockholm Rolf Bostrom Uppsala Kerstin Fredga Stockholm Carl Gunne Fiilthammar Stockholm and Bengt Hultqvist Kiruna Chairman      **Origins Of Magnetospheric Physics** James A. **Magnetospheric Plasma Physics: The Impact of Jim Dungey's Research** David Southwood, Stanley W. H. Cowley FRS, Simon Mitton, 2015-08-29 This book makes good background reading for much of modern magnetospheric physics Its origin was a Festspiel for Professor Jim Dungey former professor in the Physics Department at Imperial College on the occasion of his 90th birthday 30 January 2013 Remarkably although he retired 30 years ago his pioneering and often maverick work in the 50 s through to the 70 s on solar terrestrial physics is probably more widely appreciated today than when he retired Dungey was a theoretical plasma physicist The book covers how his reconnection model of the magnetosphere evolved to become the standard model of solar terrestrial coupling Dungey s open magnetosphere model now underpins a holistic picture explaining not only the magnetic and plasma structure of the magnetosphere but also its dynamics which can be monitored in real time The book also shows how modern day simulation of solar terrestrial coupling can reproduce the real time evolution of the solar terrestrial system in ways undreamt of in 1961 when Dungey s epoch making paper was published Further contributions on current Earth magnetosphere research and space plasma physics included in this book show how Dungey s basic ideas have remained explanative 50 years on But the Festspiel also introduced some advances that possibly Dungey had not foreseen One of the contributions presented in this book is on the variety of magnetospheres of the solar system which have been seen directly during the space age discussing the variations in spatial scale and reconnection time scale and comparing them in respect of Earth Mercury the giant planets as well as Ganymede

*Earth's Magnetospheric Processes* Billy McCormac, 2012-12-06 This book contains the lectures presented at the Summer Advanced Institute and Ninth ESRO Summer School which was held in Cortina Italy during the period August 30 through September 10 1971 One hundred seventy nine persons from eight een different countries attended The authors and the publisher have made a special effort for rapid publication of an up to date status of the particles fields and processes in the earth s magnetosphere which is an ever changing area Special thanks are due to the lecturers for their diligent preparation and excellent presentations The individual lectures and the published papers were deliberately limited the author s cooperation in conforming to these specifications is greatly appreciated The contents of the book are organized by sub ject area rather than in the order in which papers were presented during the Institute School Many thanks are due to Drs J Ronald Burrows James W Dungey Harry Elliot Roger Gendrin Edward W Hones Jr Reimar Liist and J Ortner who served as session chairmen during the Institute and contributed greatly to its success by skill fully directing the discussion period in a stimulating manner after each lecture Many persons contributed to the success of the Institute School The co chairman Dr Reimar Liist was most helpful during all phases of the preparation and planning Drs J Ronald Burrows Harry Elliot Carl Gunne Fiilthammar M Giorgi J Ortner J R U Page Alois Schardt James A Van Allen and Martin Walt were especially helpful in preparing the technical program
