Kong Modernity Man-Fung Yip, 2017-09-05 At the core of Martial Arts Cinema and Hong Kong Modernity Aesthetics Representation Circulation is a fascinating paradox the martial arts film long regarded as a vehicle of Chinese cultural nationalism can also be understood as a mass cultural expression of Hong Kong's modern urban industrial society This important and popular genre Man-Fung Yip argues articulates the experiential qualities the competing social subjectivities and gender discourses as well as the heightened circulation of capital people goods information and technologies in Hong Kong of the 1960s and 1970s In addition to providing a novel conceptual framework for the study of Hong Kong martial arts

Science fiction and the United States military often inhabit the same imaginative space Weapons technology has taken inspiration from science fiction from the bazooka and the atomic bomb to weaponized lasers and drones Star spangled superheroes sold war bonds in comic books sent to GIs during World War II and adorned the noses of bombers The same superheroes now appear in big budget movies made with military assistance fighting evil in today's war zones A missile

shield of laser satellites dreamed up by writers and embraced by the high command is partially credited with ending the Cold War. Sci fi themes and imagery are used to sell weapons programs, military service and wars to the public. Some science fiction creators have willingly cooperated with the military; others have been conscripted. Some have used the genre as a forum for protest. This book examines the relationship between the U S military and science fiction through more than 80 years of novels, comics, films and television series including Captain America, Starship Troopers, The Twilight Zone, Dr Strangelove, Star Trek, Iron Man, Bill the Galactic Hero, The Forever War, Star Wars, Aliens, Ender's Game, Space Above and Beyond and Old Man's War.

A Critical History of Doctor Who on Television John Kenneth Muir, 2015-09-15. Since its inception in November 1963, the British science fiction television series Doctor Who has exerted an enormous impact on the world of science fiction. Over 1,500 books have been written about the show. The series follows the adventures of a mysterious Time Lord from the distant planet Gallifrey who travels through time and space to fight evil and injustice. Along the way, he has visited Rome under the rule of Nero, played backgammon with Kublai Khan and participated in the mythic gunfight at the O.K. Corral. Predating the Star Trek phenomenon by three years, Doctor Who seriously dealt with continuing characters, adult genre principles and futuristic philosophies. Critical and historical examinations of the ideas, philosophies, conceits and morals put forth in the Doctor Who series, which ran for 26 seasons and 159 episodes, are provided here. Also analyzed are thematic concepts, genre antecedents, the overall cinematography and the special effects of the long-running cult favorite. The various incarnations of Doctor Who, including television, stage, film, radio and spin-offs, are discussed. In addition, the book provides an extensive listing of print, Internet and fan club resources for Doctor Who.

The Swords of Faith Richard Warren Field, 2010-07. An epic novel steeped in action, intrigue and romance. July 1187, the forces of the Muslim sultan known as Saladin have defeated the army of the Kingdom of Jerusalem, allowing Saladin to achieve his lifelong ambition of recapturing the Holy City for Islam. This sets the stage for the Third Crusade, the confrontation between Saladin and the legendary Christian warrior Richard the Lionheart. Both men believe they are destined by God to lead their holy armies to complete victory. Richard, a legendary warrior with a keen military mind, finds his vow to retake Jerusalem complicated by infighting over succession to the British throne, a rivalry with the French king and a choice between two potential queens. Meanwhile, Saladin struggles to keep his fractious forces together while remaining true to the noblest principles of Islam. These events are also portrayed through the eyes of two common men: Pierre of Botron is a Christian knight who is captured on the battlefield and subjected to the indignity of slavery; Rashid of Yenbo is a Muslim trader who finds prosperity in Saladin's triumphs. The relationship between Rashid and Pierre offers the possibility that people of good will can overcome polarizing conflicts. As events build toward the Battle of Jaffa, one of the most well-known conflicts of the Crusades, the fates of the characters depend on the choices they make between the compassionate and fanatical aspects of their faiths. The Swords of Faith offers an eye-opening comparison and contrast of the tenets of Christianity and Islam, insights that reverberate into the

and the influences of his Chinese theater and martial arts training on his work Szeto outlines the similarities and differences between the three artists films especially their treatments of gender sexuality and power She concludes by analyzing their films as metaphors for their working conditions in the Chinese diaspora and Hollywood and demonstrating how through their works Lee Woo and Chan communicate not only with the rest of the world but also with each other Far from a book simply about three filmmakers The Martial Arts Cinema of the Chinese Diaspora investigates the transnational nature of films the geopolitics of culture and race and the depths of masculinity and power in movies Szeto s interdisciplinary approach calls for nothing less than a paradigm shift in the study of Chinese diasporic filmmakers and the embodiment of cosmopolitical perspectives in the martial arts genre
