**The Primitive Origination of Mankind** Matthew Hale, 1677 This text explores mankind's origins as considered and examined in light of nature with particular emphasis on the following parts and assertions I That according to the light of nature and natural reason the visible world was not eternal but had a beginning II That if there could be any imaginable doubt thereof yet by the necessary evidence of natural light it does appear that mankind had a beginning and that the successive generations of men were in their original form III That this truth is evident by demonstrative reason and arguments IV That there are moral evidences of the truth of this assertion which are herein particularly expanded and examined V That those great philosophers that asserted this origination of mankind both ancient and modern that rendered it by hypothesis different from that of Moses were mistaken here the hypotheses of Aristotle Plato and others are examined and the absurdity and impossibility of their theories are detected VI That the current author's theory explaining the creation of man and of the world in general abstractly considered without relation to the divine inspiration of the writer is according to reason and preferable to the sentiments of other philosophers and VII That the author has concluded the whole of this work with certain corollaries and deductions necessarily flowing from the things thus asserted as well touching the existence the wisdom power and providence of Almighty God as touching both the duty and happiness of mankind Foreword PsycINFO Database Record c 2009 APA all rights reserved Magnus Annus Peter Rutledge Koch, 1974 History of Political Ideas Eric Voegelin, 1997 Reaching from the decline of the Greek Polis to Saint Augustine Voegelin demonstrates that the spiritual disintegration of the Hellenic world inaugurated a long process of transition in the self understanding of Mediterranean and European man At the heart of his interpretation is the powerful account of Apostolic Christianity's political implications and the work of the early church fathers Voegelin's consideration of the political philosophy of Rome and his unique analysis of Greek and early Roman law are of particular interest Annotation copyrighted by Book News Inc Portland OR , **Life and Letters in the Fourth Century** Terrot Reaveley Glover, 1924 **A Companion to Isidore of Seville** Andrew Fear, Jamie Wood, 2019-11-26 A Companion to Isidore of Seville presents nineteen chapters from leading international scholars on Isidore of Seville d 636 the most prominent bishop of the Visigothic kingdom in Hispania in the seventh century and one of the most prolific authors of early medieval western Europe Introductory studies establish the political religious and familial contexts in which Isidore operated his key works are then analysed in detail as are some of the main themes that run throughout his corpus Isidore's influence extended across the entire Middle Ages and into the early modern period in fields such as church governance and pastoral care theology grammar science history writing and linguistics all topics that are explored in the volume Contributors Graham Barrett Winston Black Jos Carracedo Fraga Santiago Castellanos Pedro Castillo Maldonado Jacques Elfassi Andrew Fear Amy Fuller Ra l Gonz lez Salinero Jeremy Lawrance C line Martin Thomas O Loughlin Martin J Ryan Sin ad O Sullivan Mark Lewis Tizzoni Purificaci n Ubric Rabaneda Faith Wallis Immo Warntjes and
