**Down East: An Illustrated History of Maritime Maine (2)** Lincoln Paine, 2018-06-19 From the first explorers to the century of ships to our modern fisheries and diversification Maine's maritime story is told in engaging detail Lincoln Paine has laid down the framework for an understanding of Maine's maritime history by relating the population and landscape of today to their historic foundations This engaging overview of Maine's maritime history ranges from early Native American travel and fishing to pre Plymouth European settlements wars international trade shipbuilding boom and bust fisheries immigrant quarrymen quick lime production yachting and modern port facilities all unfolding against one of the most dramatic seascapes on the planet *Down East* can be read in an evening but will be referred to again and again When the first edition was published in 2000 Walter Cronkite a veteran Maine coastal sailor as well as *The Most Trusted Man in America* wrote that Paine's economy of phrase

and clarity of purpose make this book a delight Paine went on to write his monumental opus *The Sea and Civilization A Maritime History of the World* PW starred review but now returns to his first and most abiding love the coast of Maine to revise and update this gem of a book The new edition is printed in a large full color format with a stunning complement of historical photos paintings charts and illustrations making this a truly visual journey along a storied coast [Nature Next Door](#) Ellen Stroud,2012-12-15 The once denuded northeastern United States is now a region of trees *Nature Next Door* argues that the growth of cities the construction of parks the transformation of farming the boom in tourism and changes in the timber industry have together brought about a return of northeastern forests Although historians and historical actors alike have seen urban and rural areas as distinct they are in fact intertwined and the dichotomies of farm and forest agriculture and industry and nature and culture break down when the focus is on the history of Northeastern woods Cities trees mills rivers houses and farms are all part of a single transformed regional landscape In an examination of the cities and forests of the northeastern United States with particular attention to the woods of Maine New Hampshire Pennsylvania and Vermont Ellen Stroud shows how urbanization processes there fostered a period of recovery for forests with cities not merely consumers of nature but creators as well Interactions between city and hinterland in the twentieth century Northeast created a new wildness of metropolitan nature a reforested landscape intricately entangled with the region s cities and towns
