Converting Women Eliza F. Kent, 2004-04-01 With the emergence of Hindu nationalism the conversion of Indians to Christianity has become a volatile issue erupting in violence against converts and missionaries At the height of British colonialism however conversion was a path to upward mobility for low castes and untouchables especially in the Tamil speaking south of India In this book Eliza F Kent takes a fresh look at these conversions focusing especially on the experience of women converts and the ways in which conversion transformed gender roles and expectations Kent argues that the creation of a new respectable community identity was central to the conversion process for the agricultural laborers and artisans who embraced Protestant Christianity under British rule At the same time she shows this new identity was informed as much by elite Sanskritic customs and ideologies as by Western Christian discourse Stigmatized by the dominant castes for their ritually polluting occupations and relaxed rules governing kinship and marriage low caste converts sought to validate their new higher status identity in part by the reform of gender relations These reforms affected ideals of femininity and masculinity in the areas of marriage domesticity and dress By the creation of a discourse of respectability says Kent Tamil Christians hoped to counter the cultural justifications for their social economic and sexual exploitation at the hands of high

caste landowners and village elites Kent's focus on the interactions between Western women missionaries and the Indian Christian women not only adds depth to our understanding of colonial and patriarchal power dynamics but to the intricacies of conversion itself Posing an important challenge to normative notions of conversion as a privatized individual moment in time Kent's study takes into consideration the ways that public behavior social status and the transformation of everyday life inform religious conversion
