The Historical Development of West Germany's New Left after 1968

Matthias Dapprich, 2018-03-14 There is a gap in the existing literature as to why the New Left in West Germany entered a phase of rapid decline by the end of the 1970s The overarching aim of this thesis is to offer a politico theoretical explanation for the historical development of the New Left and why the red decade between 1967 and 1976/77 ended so abruptly Within this context the thesis will focus on the Maoist K Gruppen and particular emphasis will be placed on the Marxistische Gruppe which defied the general decline of West Germany's New Left and developed into its largest organisation during the 1980s Furthermore the Red Cells movement will be analysed from which both currents emerged in the wake of the student movement In conclusion this thesis will reveal that the influence of politico theoretical aspects on the historical development of the New Left has been given too little consideration and that the New Left's fate cannot be adequately explained by external factors but demands the consideration of the very development of theories and the practical conclusions organisations reached regarding their social economic and cultural circumstances This work will be the first to provide an insight into the potential of such a theoretical explanation for an understanding of the specific developments of the post 1968 West German New Left

The Psychological Development of Girls and Women Sheila Greene, 2014-11-27 Choice

Recommended Read This thoroughly revised new edition updates Sheila Greene's original transformative account of the psychological development of girls and women and the central role of time in shaping human experience Greene critically reviews traditional and contemporary theoretical approaches ranging from orthodox psychoanalysis to relational and post modern theories and argues that even those that claim to focus on development have presented a view of women's lives as

fixed and determined by their nature or their past These theories she believes should be rejected because of their inherent lack of validity and their frequently oppressive implications for women Essential but often neglected insights from the more compelling developmental and feminist theories are woven together within a theoretical framework that emphasizes temporality emergence and human agency The result is a liberating theory of women s psychological development as constantly emerging and changing in time rather than as static and fixed by their nature socio cultural context and personal history Updated for a new generation of readers The Psychological Development of Girls and Women will continue to be essential reading for students and researchers in the psychology of women developmental psychology and women s studies

Student Engagement in Neoliberal Times Nick Zepke, 2016-12-14 This book investigates origins meanings uses and effects of student engagement in higher education and addresses three core questions 1 Why is student engagement so visible in higher education today 2 What are its dominant characteristics 3 What is missing in the popular view of student engagement These questions pave the way for a fresh approach to student engagement The book argues that an elective affinity between student engagement and policies embedded in neoliberalism the dominant ideology of the early 21st century enables student engagement to transcend diverse intellectual and practice contexts This affinity encourages quality learning and teaching that enables student to succeed in their studies and future careers The book shows that focusing on neoliberal objectives for learning and teaching limits the potential of student engagement in higher education This conclusion leads to a critical and practical social
