Nuclear Science Abstracts ,1966 The Last Dove E.S. Hines,2012-01-27 Enira a region encircled by the mountains of Aeir is home to ferocious warriors and devoted clansmen who all share one special ability that of the Change The Change allows them to shed their human form and assume an animal one based on their clans heritage But peace is not theirs the feuds between clans are becoming steadily more intense and each clan has their own ambitions for the future of their country In this time of impending civil war a girl named Bria whose own shapeshifting abilities still have yet to manifest runs away from the cruelty of the village she grew up in As she travels across Enira she becomes embroiled in a generations old plot and discovers secrets about her past and the past of her country that soon force her to decide who to trust and who to love even as she becomes the unexpected keystone of a revolution that will affect all of Aeir **Heku** CD Moulton, **Climate Change and Coastal Ecosystems** Robert J. Crow,2012-12-06 Perhaps the title of

this conference Crystalline Electric Field and Structural Effects in f Electron Systems reflects best the growth and direction of the field The title and the conference itself go beyond CEF in two broad and important respects First the inter relations between CEF and mode softening distortions due to quadrupolar ordering or the Jahn Teller effect have gained greater focus hence the inclusion of Structural Effects Second much greater emphasis on the actinides and in particular comparisons between actinides and the lighter rare earths is seen in this conference hence the more general terminology f Electron Systems It seems clear that this comparison will lead to an extension to the actinides of mixed valence and Kondo considerations as well as CEF effects The emergence of a broader discipline which includes all f electron systems and which is concerned with unstable as well as stable valence reflects the maturation of the field and a coming to grips with the complexity as well as the unity of f electron systems This maturation is also seen in the growing realization of the effects of CEF on transport thermodynamic properties and superconductivity and its co existence with magnetic order This volume contains 63 articles all but two of which were presented at the Conference held in Philadelphia U S A on 12 15 November 1979 About 100 conferees from 13 countries attended the meeting which consisted of four full days of lecture presentations
