No Orchids By Request:

No Orchids by Request Essie Summers, 1986-01-01 **Micropropagation of Orchids** Joseph Arditti, 2009-01-26 This greatly expanded and updated edition of a classic reference work comprises two volumes offering a compendium of methods for multiplying orchids through micropropagation A detailed collection of procedures and methods for multiplying orchids including organ tissue and cell culture techniques in vitro Presents classic techniques that have been in the forefront of orchid propagation since they were first developed in 1949 Detailed procedures are appended with tables and complete recipes for a large number of culture media Includes many illustrations chemical formulas historical vignettes and seldom seen illustrations of people orchids apparatus and tools an excellent resource like its predecessor both informative and captivating and served as a reminder of why we go to such extremes in our quest to propagate these plants American Orchid Society 2009 in the sense of its universal value and importance this Second Edition will undoubtedly be considered a classic if only because it will serve as a sole and invaluable resource on the subject Plant Science Bulletin 2009

Micropropagation of Orchids Tim Wing Yam, Joseph Arditti, 2017-07-05 Divided into three volumes Micropropagation of Orchids Third Edition retains the exhaustive list of micropropagation protocols for many genera and updates each section to include new and or revised information about Culture media and vessels Techniques and procedures for both orchids which were previously cultured and for those which were not Plant hormones and growth regulators Media components Methods for tissue decontamination Historical information Procedures for the cultivation for plantlets which have been removed from flasks Sources of light and illumination methods Written by two globally acknowledged experts in the field the third edition of this definitive text on the micropropagation of orchids is a detailed and comprehensive collection of procedures and methods for multiplying orchids including organ tissue and cell culture techniques in vitro and is intended for researchers in plant science and propagation professional and amateur orchid growers and plant breeding professionals Much of the general information about techniques and procedures can be applied to plants other than orchids **Beyond the BBFC** Sian Barber, 2025-04-15 This work scrutinises British film censorship from a local perspective Examining different regions and areas the work of individual councils and their relations with one another and with the BBFC it offers a broad historical exploration of the intricacies of film censorship in action Drawing on local archival material and considering the activities of local government in enforcing Cinematograph legislation this work considers the significance of film censorship apparatus and processes in shaping and informing responses to and control of film culture in different locations across the twentieth century For Love and Money: the Literary Art of the Harlequin Mills and Boon Romance Laura Vivanco, 2011-01-01 Laura Vivanco s study challenges the idea that Harlequin Mills Boon romances are merely mass produced commodities churned out in accordance with a strict and unchanging formula She argues that many are well written skilfully crafted works and that some are small masterpieces For Love and Money demonstrates the variety that

exists beneath the covers of Harlequin Mills Boon romances They range from paranormal romances to novels resembling chick lit and many have addressed serious issues including the plight of post Second World War refugees threats to marine mammals and HIV AIDS The genre draws inspiration from Shakespearean comedies and Austen's novels as well as from other forms of popular culture Laura Vivanco's *For Love and Money* is an impressive study of the popular fiction of Harlequin Mills and Boon that is a must read for any student of popular fiction and for those who write and love the genre Liz Fielding author of over 50 Harlequin Mills Boon romances Deep learning wide reading and clear thinking are very much in evidence in Vivanco's exploration of HM B A welcome addition to popular romance criticism Professor Pamela Regis author of *A Natural History of the Romance Novel* Laura Vivanco's analysis of the category romance is both meticulous and inspiring And while Vivanco limits her examples and discussions to category romances by Harlequin Mills Boon and the HQN imprint her application of Frye's mimetic modes begs for expansion to texts and authors across the genre This piece of literary criticism should serve as a template for romance scholars to move from defending the genre to discussing its values and complexity as a literary art Maryan Wherry *Journal of Popular Romance Studies*
