Oscar Niemeyer Library Of Contemporary Architects:

Oscar Niemeyer Oscar Niemeyer,1985 *Housing and Planning References* ,1972 Contemporary Architects Muriel Emanuel,2016-01-23 **Realization of Forms in Contemporary Architecture** Pallavi Tiwari,2024-03-20 Realization of Forms in Contemporary Architecture takes a captivating journey through the minds of visionary architects who push boundaries and redefine what's possible From the philosophies and methodologies driving these architectural masterminds to cutting edge trends in the field this book unravels the secrets behind these awe inspiring structures The book uncovers how digital technology is revolutionizing this process opening doors to unimaginable possibilities and explores material based forms that challenge traditional norms as well as the hurdles faced in conceptualization construction and societal acceptance It also provides thought provoking insights into where contemporary architecture is headed Whether you're an architecture student enthusiast or simply curious about ground breaking design this book will leave you inspired and eager to push the boundaries of what is possible in the world of architecture Contemporary Architecture Marta Tobolczyk,2021-07-05 This book offers an exciting journey into the most recent architectural achievements seen in their complexity and plurality and described in the most objective and truthful way The development of contemporary architecture is presented as it commenced more than a century ago as it tried to reconcile democratic ideals with the forces of the Industrial Era In contrast to many books on the modern day art of building the development of architecture is not described chronologically here but rather independently for each selective architectural trend This allows a better explanation of some evolutionary processes and the continuity of each trend Thanks to such an approach this book will serve as a convenient tutorial for courses on history of contemporary architecture in all art and architectural schools The Eclectic Odyssey of Atlee B. Ayres, Architect Robert James Coote,2001 During the three decades Coote examines Ayres designed nearly two hundred homes in the fashionable San Antonio suburbs of Monte Vista Olmos Park and Terrell Hills homes that even now rank among the most charming in the area **A Critical History of Contemporary Architecture** Elie G. Haddad,David Rifkind,2016-12-05 1960 following as it did the last CIAM meeting signalled a turning point for the Modern Movement From then on architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi and gave rise to the first revisionary movement following Modernism Bringing together leading experts in the field this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 It consists of two parts the first section providing a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects **Contemporary Curtain Wall Architecture** Scott Charles Murray,2009-10-07 In Contemporary Curtain Wall Architecture building

technology historian and architect Scott Murray traces the evolution of the curtain wall from early skeleton frame structures of the past to today's complex and technologically advanced configurations. Presenting twenty-four detailed case studies of exemplary structures completed in the last decade, he reveals the curtain wall as one of the most enduring and malleable concepts of contemporary architecture, capable of adapting intelligently to site constraints, utilizing resources efficiently, and offering unprecedented opportunities for innovations in digital design and fabrication, material detailing, and aesthetic expression. Book Jacket The Aesthetics of Contemporary Architecture Michel Ragon, 1968 *Constructing the Architect* Leonard R. Bachman, 2019-01-22 Unlike books that concentrate on the monuments and other artefacts that architects produce, *Constructing the Architect* focuses on architecture as a disciplinary and professional process, an institution of society, and a career of learning and mastery. In doing so, it offers a lens into the architecture of architecture, mapping architecture as a coherent whole. Leonard Bachman shows that the field must be understood as four mutually reinforcing modes of inquiry: design, research, strategy, and education. Within this framework, he explains how institutions and actors hold differing perspectives on the critical discourse that advances architecture and identifies the various tensions and leverage points for change within the discipline. Featuring over 100 illustrations to support understanding of this highly visual subject, this is an essential introduction for any student seeking to understand what it means to be an architect and to enter the professional discourse. Modernist Paradise Michael Webb, 2007 Celebrating the finest examples of mid-century modernist design, a lavishly illustrated tribute, captures both the architectural features of the homes as well as notable collections of modernist furniture, accessories, and other key elements. **The Work of Oscar Niemeyer** Oscar Niemeyer, Stamo Papadakis, 1950 Architecture Beyond Criticism Wolfgang F. E. Preiser, Aaron T. Davis, Ashraf M. Salama, Andrea Hardy, 2014-11-27 For the first time, this book demonstrates that the two paradigms of architectural criticism and performance evaluation can not only co-exist but complement each other in the assessment of built works. As architecture takes more principled stances worldwide, from environmental sustainability to social, cultural, and economic activism, this book examines the roles of perceived and measured quality in architecture. By exploring in tandem both subjective, traditional architectural criticism and environmental design and performance evaluation, and its objective evaluation criteria, the book argues that both methodologies and outcomes can achieve a comprehensive assessment of quality in architecture. Curated by a global editorial team, the book includes contributions from international architects and critics based in the UK, USA, Brazil, France, Qatar, Egypt, New Zealand, China, Japan, and Germany. Global case studies which illustrate both perspectives addressed by the book, and comparative analyses of the findings. A six-part organization which includes introductions and conclusions from the editors to help guide the reader and further illuminate the contributions. By presenting a systematic approach to assessing building performance, design professionals will learn how to improve building design and performance with major stakeholders in mind, especially end users, occupants. *Contemporary Architects* Ann Lee Morgan, Colin Naylor, 1987 To

strengthen the contemporary focus of this volume we have added about forty architects and have deleted some whose activity ceased before World War II In making these decisions we have been assisted by an Advisory Board As in the first volume we have continued to define the word architect very broadly so as to include planners theorists structural engineers and landscape architects whose work seems to be central to the enterprise of creating habitable spaces in our day Editor s note
