**Fluency in Native and Nonnative English Speech** Sandra Götz, 2013 This book takes a new and holistic approach to fluency in English speech and differentiates between productive perceptive and nonverbal fluency The in depth corpus based description of productive fluency points out major differences of how fluency is established in native and nonnative speech It also reveals areas in

which even highly advanced learners of English still deviate strongly from the native target norm and in which they have already approximated to it Based on these findings selected learners are subjected to native speakers ratings of seven perceptive fluency variables in order to test which variables are most responsible for a perception of oral proficiency on the sides of the listeners Finally language pedagogical implications derived from these findings for the improvement of fluency in learner language are presented This book is conceptually and methodologically relevant for corpus linguistics learner corpus research and foreign language teaching and learning

### **Disfluency and Proficiency in Second Language Speech**

**Production** Simon Williams,2023-01-01 This book explores the concept of disfluency in speech production particularly as it occurs in the context of second language acquisition Drawing on examples from learner speech at three levels beginner intermediate and advanced the author argues that acquiring target language norms for performing disfluency is essential to an individual being recognized as fluent in a language by fellow speakers Starting with a survey of the psycholinguistic research in this area he then applies a sociolinguistic lens to examine how a learner s social and educational background impacts the types of disfluencies in their speech This book will be of interest to readers in fields such as applied linguistics and second language acquisition psychology and education

### **Variation Across Speech and Writing**

Douglas Biber,1991-12-19 Similarities and differences between speech and writing have been the subject of innumerable studies but until now there has been no attempt to provide a unified linguistic analysis of the whole range of spoken and written registers in English In this widely acclaimed empirical study Douglas Biber uses computational techniques to analyse the linguistic characteristics of twenty three spoken and written genres enabling identification of the basic underlying dimensions of variation in English In Variation Across Speech and Writing six dimensions of variation are identified through a factor analysis on the basis of linguistic co occurrence patterns The resulting model of variation provides for the description of the distinctive linguistic characteristics of any spoken or written text and demonstrates the ways in which the polarization of speech and writing has been misleading and thus enables reconciliation of the contradictory conclusions reached in previous research
