**Nature and Empire** Roy MacLeod, 2000      **Nature and Antiquities** Philip L. Kohl, Irina Podgorny, Stefanie Gänger, 2014-12-04

*Nature and Antiquities* examines the relation between the natural sciences anthropology and archaeology in the Americas in the nineteenth and early twentieth centuries Taking the reader across the Americas from the Southern Cone to Canada across the Andes the Brazilian Amazon Mesoamerica and the United States the book explores the early history of archaeology from a Pan American perspective The volume breaks new ground by entreating archaeologists to acknowledge the importance of ways of knowing that resulted from the study of nature in the history of archaeology Some of the contributions to this volume trace the part conventions practices and concepts from natural history and the natural sciences played in the history and making of the discipline Others set out to uncover reassemble or adjust our vision of collections that research historians of archaeology have disregarded or misrepresented because their nineteenth century makers would refuse to comply with today s disciplinary borders and study natural specimens and antiquities in conjunction under the rubric of the territorial the curious or the universal Other contributions trace the sociopolitical implications of studying nature in conjunction with indigenous peoples in the Americas inquiring into what it meant and entailed to comprehend the inhabitants of the American continent in and through a state of nature

**Imperialism and Science** George N. Vlahakis, Isabel Maria Coelho de Oliveira Malaquias, Nathan M. Brooks, M. François Regourd, Feza Guner Gun, David Wright, 2006-04-26

A unique resource that synthesizes existing primary and secondary sources to provide a fascinating introduction to the development and dissemination of science within history s great empires as well as the complex interaction between imperialism and scientific progress over two centuries *Imperialism and Science* is a scholarly yet accessible chronicle of the impact of imperialism on science over the past 200 years from the effect of Catholicism on scientific progress in Latin America to the importance of U S government funding of scientific research to America s preeminent place in the world Spanning two centuries of scientific advance throughout the age of empire *Imperialism and Science* sheds new light on the spread of scientific thought throughout the former colonial world Science made enormous advances during this period often being associated with anti Imperialist struggle or as in the case of the science brought to 19th century China and India by the British with Western cultural hegemony

**Geo-epistemology** Claudio Canaparo, 2009

This book is about the formation and development of Latin America as name idea and concept as well as the wider concepts of location knowledge and the relationship between them Latin America is not only a subject or an academic construct it is also a perspective from which subjectivities are established knowledge is developed and narratives are produced This study argues that epistemology cannot exist in abstract terms despite traditional academic arguments to the contrary Therefore the author uses Latin America to anchor his more general arguments in a particular location and calls this approach geo epistemology The author discusses how the specificity of a particular location can contribute to the establishment of both a

method of formulating human knowledge and the boundaries of what can be known The text explores the relationship between philosophy geography and geometry and analyses the notions of science empire and colonialism In response to the contemporary debate on space of thinking the author proposes a new concept of reversal thinking which leads to an examination of the roles of language and writing from an epistemic point of view *Invasive and Introduced Plants and Animals* Ian D. Rotherham, Robert A. Lambert, 2012-12-06 There have been many well publicized cases of invasive species of plants and animals often introduced unintentionally but sometimes on purpose causing widespread ecological havoc Examples of such alien invasions include pernicious weeds such as Japanese knotweed an introduced garden ornamental which can grow through concrete the water hyacinth which has choked tropical waterways and many introduced animals which have out competed and displaced local fauna This book addresses the broader context of invasive and exotic species in terms of the perceived threats and environmental concerns which surround alien species and ecological invasions As a result of unprecedented scales of environmental change combined with rapid globalisation the mixing of cultures and diversity and fears over biosecurity and bioterrorism the known impacts of particular invasions have been catastrophic However as several chapters show reactions to some exotic species and the justifications for interventions in certain situations including biological control by introduced natural enemies rest uncomfortably with social reactions to ethnic cleansing and persecution perpetrated across the globe The role of democracy in deciding and determining environmental policy is another emerging issue In an increasingly multicultural society this raises huge questions of ethics and choice At the same time in order to redress major ecological losses the science of reintroduction of native species has also come to the fore and is widely accepted by many in nature conservation However with questions of where and when and with what species or even species analogues reintroductions are acceptable the topic is hotly debated Again it is shown that many decisions are based on values and perceptions rather than objective science Including a wide range of case studies from around the world his book raises critical issues to stimulate a much wider debate *The Rise and Fall of Modern Empires, Volume II* Saul Dubow, 2016-12-05 This volume reproduces key historical texts concerning colonial knowledges The use of the adjective colonial indicates that knowledge is shaped by power relationships while the use of the plural form knowledges indicates the emphasis in this collection is on an interplay between different often competing cognitive systems George Balandier's notion of the colonial situation is an organising principle that runs throughout the volume and there are four sub themes language and texts categorical knowledge the circulation of knowledge and indigenous knowledge The volume is designed to introduce students to a range of important interventions which speak to each other today even if they were not intended to do so when first published An introductory essay links the themes together and explains the significance of the individual articles *London Zoo and the Victorians, 1828-1859* Takashi Ito, 2014 London Zoo examined in its nineteenth century context looking at its effect on cultural and social life At the dawn of the Victorian era London Zoo became one of the metropolis's

premier attractions The crowds drawn to its bear pit included urban promenaders gentlemen menagerists Indian shipbuilders and Persian princes Charles Darwin himself This book shows that the impact of the zoo s extensive collection of animals can only be understood in the context of a wide range of contemporary approaches to nature and that it was not merely as a manifestation of British imperial culture The author demonstrates how the early history of the zoo illuminates three important aspects of the history of nineteenth century Britain the politics of culture and leisure in a new public domain which included museums and art galleries the professionalisation and popularisation of science in a consumer society and the meanings of the animal world for a growing urban population Weaving these threads altogether he presents a flexible frame of analysis to explain how the zoo was established how it pursued its policies of animal collection and how it responded to changing social conditions Dr Takashi Ito is Associate Professor in Modern British History Tokyo University of Foreign Studies

**Nature's Colony** Timothy P Barnard, 2018-04-27 Established in 1859 Singapore s Botanic Gardens has served as a park for Singaporeans and visitors a scientific institution and a testing ground for tropical plantation crops Each function has its own story while the Gardens also fuel an underlying narrative of the juncture of administrative authority and the natural world Created to help exploit natural resources for the British Empire the Gardens became contested ground in conflicts involving administrators and scientists that reveal shifting understandings of power science and nature in Singapore and in Britain This continued after independence when the Gardens featured in the e greening of the nation state and became Singapore s first World Heritage Site Positioning the Singapore Botanic Gardens alongside the Royal Botanic Gardens at Kew and gardens in India Ceylon Mauritius and the West Indies this book tells the story of nature s colony a place where plants were collected classified and cultivated to change our understanding of the region and world

**Tropical Nature** Guillaume Blanc, Mathieu Guérin, Grégory Quenet, 2025-03-01 Across Africa and South East Asia the impulse to protect nature often dovetails with the domination of local people From mass displacement to severe restrictions on land use and daily acts of violence conservation work risks reproducing Eurocentric modes of colonialism and worsening the effects of the climate crisis In this insightful and wide ranging study of the colonial history of conservation Tropical Nature seeks to provide a much needed history of the Global South from its own perspective Comparing case studies ranging from Ali Bongo s Gabon to the postcolonial African itinerary of the agronomist Arthur Bunting this volume advances a small scale global history that deciphers the relations binding human societies to the non

human world      **Science, War and Imperialism** Jagdish Sinha, 2008-05-31 Why could not the Second World War catalyse science in India as it did in the West This is one of the central questions of this volume on the British policy towards science and technology in India Its focus is on education research innovation and organisation of science in such sectors as industry agriculture public health and transport and communications In the process the author comes across revealing developments where science played a crucial role an Anglo American tussle for dominance in the region the clash between capitalism and socialism and the entry of neo colonialism triggering Cold War in Asia Many faces of humanity and science are on view British scientists concerned about India s development and Indian scientists planning for national reconstruction Of interest to all those aiming for a better understanding of the impact of science war and international influences on the socio economic progress in India or other erstwhile colonies      *Science in the Spanish and Portuguese Empires, 1500-1800* Daniela Bleichmar, Paula De Vos, Kristin Huffine, Kevin Sheehan, 2008-12-18 This collection of essays is the first book published in English to provide a thorough survey of the practices of science in the Spanish and Portuguese empires from 1500 to 1800 Authored by an interdisciplinary team of specialists from the United States Latin America and Europe the book consists of fifteen original essays as well as an introduction and an afterword by renowned scholars in the field The topics discussed include navigation exploration cartography natural sciences technology and medicine This volume is aimed at both specialists and non specialists and is designed to be useful for teaching It will be a major resource for anyone interested in colonial Latin America      **The Floracrats** Andrew Goss, 2011-02-01 Situated along the line that divides the rich ecologies of Asia and Australia the Indonesian archipelago is a hotbed for scientific exploration and scientists from around the world have made key discoveries there But why do the names of Indonesia s own scientists rarely appear in the annals of scientific history In *The Floracrats* Andrew Goss examines the professional lives of Indonesian naturalists and biologists to show what happens to science when a powerful state becomes its greatest and indeed only patron With only one purse to pay for research Indonesia s scientists followed a state agenda focused mainly on exploiting the country s most valuable natural resources above all its major export crops quinine sugar coffee tea rubber and indigo The result was a class of botanic bureaucrats that Goss dubs the floracrats Drawing on archives and oral histories he shows how these scientists strove for the Enlightenment ideal of objective universal and useful knowledge even as they betrayed that ideal by failing to share scientific knowledge with the general public With each chapter Goss details the phases of power and the personalities in Indonesia that have struggled with this dilemma from the early colonial era through independence to the modern Indonesian state Goss shows just how limiting dependence on an all powerful state can be for a scientific community no matter how idealistic its individual scientists may be      *Making and Unmaking Public Health in Africa* Ruth J. Prince, Rebecca Marsland, 2013-11-15 Africa has emerged as a prime arena of global health interventions that focus on particular diseases and health emergencies These are framed increasingly in terms of international concerns about security human rights and humanitarian crisis This

presents a stark contrast to the 1960s and 70s when many newly independent African governments pursued the vision of public health for all of comprehensive health care services directed by the state with support from foreign donors These initiatives often failed undermined by international politics structural adjustment and neoliberal policies and by African states themselves Yet their traces remain in contemporary expectations of and yearnings for a more robust public health This volume explores how medical professionals and patients government officials and ordinary citizens approach questions of public health as they navigate contemporary landscapes of NGOs and transnational projects faltering state services and expanding privatization Its contributors analyze the relations between the public and the private providers of public health from the state to new global biopolitical formations of political institutions markets human populations and health Tensions and ambiguities animate these complex relationships suggesting that the question of what public health actually is in Africa cannot be taken for granted Offering historical and ethnographic analyses the volume develops an anthropology of public health in Africa Contributors Hannah Brown P Wenzel Geissler Murray Last Rebecca Marsland Lotte Meinert Benson A Mulemi Ruth J Prince No mi Tousignant and Susan Reynolds Whyte

**The British Atlantic World, 1500-1800** David Armitage,Michael J. Braddick,2009-01-15 This core textbook gathers an international team of historians to present a comprehensive account of the central themes in the histories of Britain British America and the British Caribbean seen in Atlantic perspective This collection of individual essays provides an accessible overview of essential themes such as the state empire migration the economy religion race class gender politics and slavery This new and revised edition brings this text up to date with recent

work in the field of Atlantic history and extends its scope to cover themes not treated in the first edition notably the history of science and global history Placing the British Atlantic world in imperial and global contexts this book offers an indispensable survey of one of the liveliest fields of current historical enquiry This text is a primary resource for both undergraduate and postgraduate students of History particularly those taking modules on Early Modern British History Colonial American History Early American History Caribbean History Atlantic History and World History Together the essays also provide a useful starting point for researchers in British American imperial and Atlantic history New to this Edition Updated and expanded to take account of new research Two new essays treating Science and The British Atlantic World in Global Perspective Timeline of British Atlantic history A revised Introduction and updated guides to further reading **Third World Modernism** Duanfang Lu,2010-11-02 This set of essays challenge interpretations of the development of modernist architecture in Third World countries during the Cold War The topics look at modernism's part in the transnational development of building technologies and the construction of national and cultural identity Explorations and Entanglements Hartmut Berghoff, Frank Biess, Ulrike Strasser, 2018-11-16 Traditionally Germany has been considered a minor player in Pacific history its presence there was more limited than that of other European nations and whereas its European rivals established themselves as imperial forces beginning in the early modern era Germany did not seriously pursue colonialism until the nineteenth century Yet thanks to recent advances in the field emphasizing transoceanic networks and cultural encounters it is now possible to develop a more nuanced understanding of the history of Germans in the Pacific The studies gathered here offer fascinating research into German missionary commercial scientific and imperial activity against the backdrop of the Pacific's overlapping cultural circuits and complex oceanic transits Growing American Rubber Mark R Finlay, 2009-04-24 Growing American Rubber explores America's quest during tense decades of the twentieth century to identify a viable source of domestic rubber Straddling international revolutions and world wars this unique and well researched history chronicles efforts of leaders in business science and government to sever American dependence on foreign suppliers Mark Finlay plots out intersecting networks of actors including Thomas Edison Henry Ford prominent botanists interned Japanese Americans Haitian peasants and ordinary citizens all of whom contributed to this search for economic self sufficiency Challenging once familiar boundaries between agriculture and industry and field and laboratory Finlay also identifies an era in which perceived boundaries between natural and synthetic came under review Although synthetic rubber emerged from World War II as one solution the issue of ever diminishing natural resources and the question of how to meet twenty first century consumer military and business demands lingers today *The Floracrats* Andrew Goss (Ph. D.), 2004
