Resistance and Coexistence In Some of Leila Abuolela's Fictional Works Doaa Mohamed Anwer Deep,2020-08-25 This book examines three fictional works by the writer Laila Abu Al Ela including two novels The Translator and The Generosity of the Enemies and the other is a short story the Ostrich The research proposes the hypothesis that the selected fictional works present a balanced map of human relations through a perspective that calls for coexistence between cultures of multiple races and origins and does not contradict the concept of resistance to a dominant mono Western culture This thesis is divided into an introduction three chapters and a conclusion In the introduction a simplified presentation of some of the theories influencing the writing of literature such as the theory of the clash of civilizations by Samuel Huntington the clash of cultures by Mehdi El Mandjara and the difference between them are presented The introduction refers to some examples of individuals and groups recorded in history in which cultural difference has exposed them to religious and racial discrimination The conflict in the second half of the twentieth century also led to the redrawing of the cultural conflict which cast its shadow over the literature industry thus contributing to the emergence of new types of literature Such as what is called the literature of resistance and the literature of immigrants The introduction briefly discusses the possibility of finding alternatives to accommodate the differences that resulted from the sharp polarizations especially in societies that witnessed the largest rate of immigration to them and the role of Lily Abul Ela literary works in this field **X-Venture The Terrible Terror Raptor** ,2020-09-23 With orders from the Professor the X Venture Xplorers find themselves in New Zealand Investigating reports of dodos But an attack by something much larger and much much more alive places them in the middle of some fowl business Even with assistance the X Venture Xplorers are finding harder and harder not to turn chicken How will the team escape their avian adversary Is there a reason for its rampage Fly on in and read further **Bird Brains and Behavior** Georg F. Striedter,Andrew N. Iwaniuk,2025-08-19 From two avian neurobiologists a captivating deep dive into the mechanisms that control avian behavior The last few decades have produced extensive research on the neural mechanisms of avian behavior Bird Brains and Behavior marries the enthusiasm of bird enthusiasts for the what how and why of avian behavior with the scientific literature on avian biology offering the newest research in an accessible manner Georg Striedter and Andrew Iwaniuk focus on a wide variety of behaviors ranging from daily and seasonal rhythms to complex cognition

Importantly avian behavior and mechanisms are placed in the context of evolutionary history stressing that many are unique to birds and often found in only a subset of species Recipes for Vegetarians Anna Eksteen,2012 **Sturkie's Avian Physiology** Colin G. Scanes,Sami Dridi,2021-11-06 Sturkie's Avian Physiology Seventh Edition is the classic comprehensive single volume on the physiology of domestic as well as wild birds This latest edition is thoroughly revised and updated and features several new chapters with entirely new content on such topics as vision sensory taste pain reception evolution and domestication Chapters throughout have been greatly expanded due to the many recent advances in the field This book is written by international experts in different aspects of avian physiology For easy reading and searches this book is structured under a series of themes beginning with genomic studies sensory biology and nervous systems and major organs The chapters then move on to investigate metabolism endocrine physiology reproduction and finally cross cutting themes such as stress and rhythms New chapters on feathers and skin are featured as well Sturkie's Avian Physiology Seventh Edition is an important resource for ornithologists poultry scientists and other researchers in avian studies It is also useful for students in avian or poultry physiology as well as avian veterinarians Stands out as the only single volume devoted to bird physiology Features updates revisions or additions to each chapter Written and edited by international leaders in avian studies **Bird Sense** Tim Birkhead,2013-01-17 What is it like to be a swift flying at over one hundred kilometres an hour Or a kiwi plodding flightlessly among the humid undergrowth in the pitch dark of a New Zealand night And what is going on inside the head of a nightingale as it sings and how does its brain improvise Bird Sense addresses questions like these and many more by describing the senses of birds that enable them to interpret their environment and to interact with each other Our affinity for birds is often said to be the result of shared senses vision and hearing but how exactly do their senses compare with our own And what about a bird's sense of taste or smell or touch or the ability to detect the earth's magnetic field Or the extraordinary ability of desert birds to detect rain hundreds of kilometres away how do they do it Bird Sense is based on a conviction that we have consistently underestimated what goes on in a bird's head Our understanding of bird behaviour is simultaneously informed and constrained by the way we watch and study them By drawing attention to the way these frameworks both facilitate and inhibit discovery it identifies ways we can escape from them to seek new horizons in bird behaviour There has never been a popular book about the senses of birds No one has previously looked at how birds interpret the world or the way the behaviour of birds is shaped by their senses A lifetime spent studying birds has provided Tim Birkhead with a wealth of observation and an understanding of birds and their behaviour that is firmly grounded in science
