The Convent of Wesel Jesse Spohnholz, 2017-09-28 The Convent of Wesel was long believed to be a clandestine assembly of Protestant leaders in 1568 that helped establish foundations for Reformed churches in the Dutch Republic and northwest Germany However Jesse Spohnholz shows that that event did not happen but was an idea created and perpetuated by historians and record keepers since the 1600s Appropriately this book offers not just a fascinating snapshot of Reformation history but a reflection on the nature of historical inquiry itself The Convent of Wesel begins with a detailed microhistory that unravels the mystery and then traces knowledge about the document at the centre of the mystery over four and a half centuries through historical writing archiving and centenary commemorations Spohnholz reveals how historians can inadvertently align themselves with protagonists in the debates they study and thus replicate errors that conceal the dynamic complexity of the past

Gender and Divorce in Europe: 1600 - 1900 Andrea Griesebner, Evdoxios Doxiadis, 2023-08-18 Getting divorced and remarried are now common practices in European societies even if the rules differ from one country to the next Civil marriage law still echoes religious marriage law which for centuries determined which persons could enter into marriage with each other and how validly contracted marriages could be ended Religions and denominations also had different regulations regarding whether a divorce only ended marital obligations or also permitted remarriage during the lifetime of the divorced spouse This book deals with predominantly handwritten documents of divorce proceedings from the British Isles to Western Central and Southeastern Europe and from 1600 to the 1930s The praxeological analysis reveals the arguments and strategies put forward to obtain or prevent divorce as well as the social and above all economic conditions and arrangements connected with divorce The contributions break new ground by combining previously often separate fields of research and regions of investigation It makes clear that the gender order doesn't always run along religious lines as was too often assumed This book will be of interest to all scholars and students of economic social religious cultural legal and gender history as well as gender and well being in a broader sense

Formative Modernities in the Early Modern Atlantic and Beyond Veronika Hyden-Hanscho, Werner Stangl, 2023-02-14 This book offers a new perspective on the concept of modernity Since its invention as a contrast to

Antiquity or the Middle Ages modernity has been tied to ideas of superiority progress and efficiency As a counterpart to the Marxist history of class struggle modernization theories have transformed modernity into an almost teleological concept of historical development These strong connotations obstruct a clear look at other forms of modernity The contributions of the volume will show in a comparative perspective how modernity can also be understood and analyzed as multiple responses of societies and polities to organize themselves in facing ever more complex and integrated interactions at ever larger scales

Library & Information Science Abstracts ,1998 Performance gaps of machines Wilhelm Nüßer,Thilo Steckel,2018-01-18 In this publication a widespread phenomenon is studied in many usage scenarios modern complex machines show a significant difference between the maximum sustainable performance available in well specified environments and the average performance many users experience in their everyday interaction with the machine This performance gap appears to be increasing with technical progress and performance of machines Although this situation is probably well known to many readers and very often not so quietly endured it was not studied systematically so far This publication describes the conceptual background of the performance gap in a very general way It develops a semi quantitative description and points to approaches to reduce the performance gap in current and future environments Process executives engineers and system analysts will hopefully benefit from this approach especially in the dynamic environments envisioned in initiatives like the German Industrie 4 0 In the technology network Intelligent Technical Systems OstWestfalenLippe short it s OWL around 200 companies universities research institutions and organisations have joined forces to jointly shape the innovative leap from mechatronics to intelligent technical systems Together they develop approaches and technologies for intelligent products and production processes smart services and the working world of the future The spectrum ranges from automation and drive solutions to machines vehicles automats and household appliances to networked production plants and platforms This creates a unique technology platform that enables companies to increase the reliability resource efficiency and user friendliness of their products and production systems and tap the potential of digital transformation *The Zoological Record* ,1999 *Northern Ireland: An Agony Continued* Ken Wharton,2015-05-19 This book is called An Agony Continued because it was simply that an agony It was an agony which commenced at the end of the 1960s and as the new decade of the 80s arrived so the pain the grief the loss and the economic destruction of Northern Ireland continued Little did any of us know at the time but it was to do so for almost a further two decades Between January 1980 and December 1989 around 1 000 people died many were soldiers and policemen some were Prison Officers some were paramilitaries and some were innocent civilians The Provisional IRA PIRA and their slightly more psychopathic cousins in the Irish National Liberation Army INLA would continue to kill innocent civilians by the score during this decade Across the sectarian divide the Ulster Freedom Fighters UFF and the equally vicious Ulster Volunteer Force UVF would continue to slaughter Catholics in streets in pubs and in restaurants This book will look at the period which encompassed the 48 months

of 1980 and 1983 It was a near half decade which saw the Hyde Park and Regent s Park massacre of soldiers and horses from the Blues and Royals and the cowardly bombing of the Royal Green Jackets band It further witnessed the murder of 18 people by the INLA at a disco held in the Droppin Well in Ballykelly and also the death of the leader of the Shankill Butchers Lenny Murphy The years under study include the 1981 deaths of ten Republican paramilitaries who starved themselves to death in protest against the loss of their status as political prisoners As ever this book pulls no punches in its absolute detestation of both Republican and Loyalist paramilitaries This book continues Ken Wharton s epic journey through the Troubles in Northern Ireland viewed primarily through the eyes of the British Army squaddies on the ground

Figures of Authority Peter Becker, Rüdiger von Krosigk, 2008 This book is about authority more precisely about figures of authority The editors have put together an international group of renowned scholars to discuss the emergence of modern notions of authority from different angles Modern authority is no longer legitimated by status and social position but rather by institutional affiliation and performance To research the genealogy and intricacies of this kind of authority the chapters in this volume cast a closer look at the various institutional actors on whom authority has been bestowed The authors use a case study approach to look at the instances in which modern authority emerged was ridiculed contested or even failed Taken together the individual contributions shed new light on the intricate relationship between the subjects and their organisations they challenge any Whig historiography of rationalisation and modernisation and they help us to rethink the inter relationship between modern and even postmodern institutional arrangements on the one hand and their subjects on the other
