Other Landscape:

Landscape Ecology in Agroecosystems Management Lech Ryszkowski, 2001-12-27 Successful management of agricultural landscapes depends on the recognition of the relationships between the processes and the structures that maintain the system The rapidly growing science of Landscape Ecology quantifies the ways these ecosystems interact and establishes a link between the activities in one region and repercussions in another A

Landscape Interfaces Hannes Palang, G. Fry, 2013-06-29 This book has been initiated by the workshop on Cultural heritage in changing landscapes held during the IALE International Association for Landscape Ecology European Conference that started in Stockholm Sweden in June 2001 and continued across the Baltic to Tartu Estonia in July The papers presented at the workshop have been supported by invited contributions that address a wider range of the cultural heritage management issues and research interfaces required to study cultural landscapes The book focuses on landscape interfaces Both the ones we find out there in the landscape and the ones we face while doing research We hope that this book helps if not to make use of these interfaces then at least to map them and bridge some of the gaps between them The editors wish to thank those people helping us to assemble this collection First of all our gratitude goes to the authors who contributed to the book We would like to thank Marc Antrop Mats Widgren Roland Gustavsson Marion Potschin Barbel Tress Tiina Peil Helen Soovali and Anu Printsmann for their quick and helpful advice opinions and comments during the different stages of editing Helen Soovali and Anu Printsmann together with Piret Pungas thank you for technical help

Forest Landscapes and Global Change João C. Azevedo, Ajith H. Perera, M. Alice Pinto, 2014-07-11 Climate change urban sprawl abandonment of agriculture intensification of forestry and agriculture changes in energy generation and use expansion of infrastructure networks habitat destruction and degradation and other drivers of change occur at increasing rates They affect patterns and processes in forest landscapes and modify ecosystem services derived from those ecosystems Consequently rapidly changing landscapes present many new challenges to scientists and managers While it is not uncommon to encounter the terms global change and landscape together in the ecological literature a global analyses of drivers of change in forest landscapes and their ecological consequences have not been addressed adequately

That is the goal of this volume an exploration of the state of knowledge of global changes in forested landscapes with emphasis on causes and effects and challenges faced by researchers and land managers Initial chapters identify and describe major agents of landscape change climate fire and human activities The next series of chapters address implications of changes on ecosystem services biodiversity conservation and carbon flux A chapter that describes methodologies of detecting and monitoring landscape changes is presented followed by chapter that highlights the many challenges forest landscape managers face amidst of global change Finally we present a summary and a synthesis of the main points presented in the book Each chapter will contain the individual research experiences of chapter authors augmented by review and synthesis of global scientific literature on relevant topics as well as critical input from multiple peer reviewers

Evolutionary Aesthetics Eckart Voland, Karl Grammer, 2003-06-12 Evolutionary aesthetics is the attempt to understand the aesthetic judgement of human beings and their spontaneous distinction between beauty and ugliness as a biologically adapted ability to make important decisions in life The hypothesis is both in the area of natural beauty and in sexuality with regard to landscape preferences but also in the area of artificial beauty i e in art and design that beauty opens up fitness opportunities while ugliness holds fitness risks In this book this adaptive view of aesthetics is developed theoretically presented on the basis of numerous examples and its consequences for evolutionary anthropology are illuminated

Wildlife Management and Landscapes William F. Porter, Chad J. Parent, Rosemary A. Stewart, David M. Williams, 2021-05-11 Wildlife management specialists and landscape ecologists offer a new perspective on the important intersection of these fields in the twenty first century It s been clear for decades that landscape level patterns and processes along with the tenets and tools of landscape ecology are vitally important in understanding wildlife habitat relationships and sustaining wildlife populations Today significant shifts in the spatial scale of extractive agricultural ranching and urban land uses are upon us making it more important than ever before to connect wildlife management and landscape ecology Landscape ecologists must understand the constraints that wildlife managers face and be able to use that knowledge to translate their work into more practical applications Wildlife managers for their part can benefit greatly from becoming comfortable with the vocabulary conceptual processes and perspectives of landscape ecologists In *Wildlife Management and Landscapes* the foremost landscape ecology experts and wildlife management specialists come together to discuss the

emerging role of landscape concepts in habitat management Their contributions make the case that a landscape perspective is necessary to address management questions translate concepts in landscape ecology to wildlife management explain why studying some important habitat wildlife relationships is still inherently difficult explore the dynamic and heterogeneous structure of natural systems reveal why factors such as soil hydrology fire grazing and timber harvest lead to uncertainty in management decisions explain matching scale between population processes and management discuss limitations to management across jurisdictional boundaries and balancing objectives of private landowners and management agencies offer practical ideas for improving communication between professionals outline the impediments that limit a full union of landscape ecology and wildlife management Using concrete examples of modern conservation challenges that range from oil and gas development to agriculture and urbanization the volume posits that shifts in conservation funding from a hunter constituent base to other sources will bring a dramatic change in the way we manage wildlife Explicating the foundational similarity of wildlife management and landscape ecology Wildlife and Landscapes builds crucial bridges between theoretical and practical applications Contributors Jocelyn L Aycrigg Guillaume Bastille Rousseau Jon P Beckmann Joseph R Bennett William M Block Todd R Bogenschutz Teresa C Cohn John W Connelly Courtney J Conway Bridgett E Costanzo David D Diamond Karl A Didier Lee F Elliott Michael E Estey Lenore Fahrig Cameron J Fiss Jacqueline L Frair Elsa M Haubold Fidel Hern endez Jodi A Hilty Joseph D Holbrook Cynthia A Jacobson Kevin M Johnson Jeffrey K Keller Jeffery L Larkin Kimberly A Lisgo Casey A Lott Amanda E Martin James A Martin Darin J McNeil Michael L Morrison Betsy E Neely Neal D Niemuth Chad J Parent Humberto L Perotto Baldivieso Ronald D Pritchert Fiona K A Schmiegelow Amanda L Sesser Gregory J Soulliere Leona K Svancara Stephen C Torbit Joseph A Veech Kerri T Vierling Greg Wathen David M Williams Mark J Witecha John M Yeiser
