## Other Selves:

*Other Selves* Michael Pakaluk, 1991-01-01      *Other Selves* Paul Schollmeier, 1994-09-20 This book presents a thorough and systematic integration of Aristotle's analysis of friendship with the main lines of the rest of his work in Politics and Nicomachean Ethics. The author conveys a clear sense of the continuing illumination that Aristotle's analysis of friendship provides to contemporary ethical theorists and to students of Aristotle. *Other Selves* speaks to both audiences.      **First, Second, and Other Selves** Jennifer Whiting, 2016 In her essay collection *First Second and Other Selves* Essays on Friendship and Personal Identity, well-known scholar of ancient philosophy Jennifer Whiting gathers her previously published essays taking Aristotle's theories on friendship as a springboard to engage with contemporary philosophical work on personal identity and moral psychology. Whiting examines three themes throughout the collection: the first being psychic contingency or the belief that the psychological structures characteristic of human beings may in fact vary not just from one cultural or socio-historical context to another but also from one individual to another. The second theme is the belief that friendship informs an understanding of the nature of the self, an idea that springs from Whiting's uncommon reading of Aristotle's writings on friendship. Specifically, Whiting explains a scenario in which a virtuous agent adopts a kind of impersonal attitude both towards herself and towards her character friends, loving both because they are virtuous. This scenario ties in with an examination of the Aristotelian concept of the ideal friend as an other self or a friendship that evolves from character rather than ego, as well as Whiting's meditation on whether or not a virtuous individual should have a special sort of concern for her own future self, distinct in kind from the concern that she has for others. The third theme is that of rational egoism, a concept that Whiting critiques especially in the context of Aristotle's eudaimonism. The central tenet of the collection is the message that taking ethocentric or character-based attitudes both towards ourselves and towards our friends sheds light on the nature of personal identity and helps to combat ethnocentric and other objectionable forms of bias, a message that is becoming increasingly urgent in light of the recent deaths of Trayvon Martin and Michael Brown.      **The Death of Psychotherapy** Donald A. Eisner, 2000-01-30 Psychologist attorney Eisner puts psychotherapy on trial by critically examining its effectiveness through the lens of the scientific method. From psychoanalysis to cognitive behavior therapy, as well as the 500 or so other psychotherapies, there is not a single experimental study that supports the effectiveness of psychotherapy over a placebo or religious healing. Using both case examples and clinical research, this book challenges the conclusion that there is empirical support for the notion that psychotherapy is effective.      **The Philosophy of Merleau-Ponty** Eric Matthews, 2014-12-18 In this introduction to the life and thought of one of the most important French thinkers of the twentieth century, Eric Matthews shows how Merleau-Ponty has contributed to current debates in philosophy such as the nature of consciousness, the relation between biology and personality, the historical understanding of human thought and society, and many others. Surveying the whole range of Merleau-Ponty's thinking, the author examines his views about the nature of phenomenology and the primacy

of perception his account of human embodiment being in the world and his understanding of human behaviour his conception of the self and its relation to other selves and his views on society politics and the arts A final chapter considers his later thought published posthumously The ideas of Merleau Ponty are shown to be of immense importance to the development of French philosophy and the author evaluates his distinctive contributions and relates his thought to that of his predecessors contemporaries and successors both in France and elsewhere This unrivalled introduction will be welcomed by philosophers and cognitive scientists as well as students taking courses in contemporary continental philosophy

Ciavatta, 2010-07-02 Honorable Mention 2011 Biennial Book Prize presented by the Canadian Philosophical Association This original study of the role that family life plays in Hegel's Phenomenology of Spirit and Philosophy of Right pays particular attention to Hegel's characterization of the family as an unconscious form of ethical life rooted essentially in affectivity David V Ciavatta also looks at Hegel's account of feeling in the Anthropology section of The Philosophy of Spirit highlighting the inherently porous nature of the self and this porosity is shown to be constitutive of the distinctive unconscious form of intersubjective recognition that forms the core of family bonds The book provides a rich understanding of the role that family has in one's psychological development with respect not only to other people but also to the world and one's own identity Incorporating existential phenomenological and psychoanalytic perspectives Ciavatta offers insightful investigations of many basic Hegelian themes such as spirit perception ethical agency language and property ownership

*The Origins of Self* Martin P. J. Edwardes, 2019-07-22 The Origins of Self explores the role that selfhood plays in defining human society and each human individual in that society It considers the genetic and cultural origins of self the role

that self plays in socialisation and language and the types of self we generate in our individual journeys to and through adulthood Edwardes argues that other awareness is a relatively early evolutionary development present throughout the primate clade and perhaps beyond but self awareness is a product of the sharing of social models something only humans appear to do The self of which we are aware is not something innate within us it is a model of our self produced as a response to the models of us offered to us by other people Edwardes proposes that human construction of selfhood involves seven different types of self All but one of them are internally generated models and the only non model the actual self is completely hidden from conscious awareness We rely on others to tell us about our self and even to let us know we are a self

Ways of Thinking of Eastern Peoples Hajime Nakamura, 1981-05-01 There is hardly any book equal to Ways of Thinking of Eastern Peoples in terms of its thorough and systematic presentation of the intricate thought patterns of Asian peoples The book not only is an essential reference for the student of Asian culture but also for students of philosophy religion anthropology and art as it is an excellent source for aiding the student in gaining a deeper understanding of each facet of Oriental thought Isshi

Yamada Northwestern University The clearest discussion and analysis of these complex subjects that I have found My advanced undergraduate students find this work to be stimulating challenging and comprehensible The organization of the text enhances the usefulness of this volume but it is the high quality of the scholarship that makes Ways of Thinking a most valuable addition to Asian studies and to the academic training of upper division students Ann B Radwan University of North Florida I find Ways of thinking a most provocative source for exploring with my students certain basic themes in Eastern religion and culture Used carefully it is a most stimulating and effective source for tapping Eastern ways at a fundamental level of inquiry Wilbur M Fridell University of California Santa Barbara

**Fiction and the Ways of Knowing** Avrom Fleishman, 2014-07-03 In this highly individual study Avrom Fleishman explores a wide range of literary references to human culture the culture of ideas facts and images Each critical essay in Fiction and the Ways of Knowing takes up for sustained analysis a major British novel of the nineteenth or the twentieth century The novels are analyzed in the light of social historical philosophical and other perspectives that can be grouped under the human sciences The diversity of critical contexts in these thirteen essays is organized by Avrom Fleishman's governing belief in the interrelations of literature and other ways of interpreting the world The underlying assumptions of this approach as explained in his introductory essay are that fiction is capable of encompassing even the most recondite facts and recalcitrant ideas that fiction though never a mirror of reality is linked to realities and takes part in the real and that a critical reading may be informed by scientific knowledge without reducing the literary work to a schematic formula Fleishman investigates the matters of fact and belief that make up the designated meanings the intellectual contexts and the speculative parallels in three types of novel Some of the novels discussed make it clear that their authors are informed on matters beyond the nonspecialist's range these essays help bridge this information gap Other fictional works are only to be grasped in an awareness of the cultural lore tacitly distributed in their own time a modern reader must make the effort to fathom their anachronisms And other novels can be found to open passageways that their authors can only have glimpsed intuitively these must be pursued with great caution but equal diligence The novels discussed include Little Dorrit The Way We Live Now Daniel Deronda The Return of the Native and The Magus Also examined are Wuthering Heights Vanity Fair Northanger Abbey To the Lighthouse Under Western Eyes Ulysses and A Passage to India

*Reconstructing Political Pluralism* Avigail I. Eisenberg, 1995-08-17 This reappraisal of the pluralist tradition systematically explores accounts of political pluralism offered by James Dewey Figgis Cole Laski Follett and Dahl and shows how each variant contains a distinct account of the relation between group power individual interest and self development These historical accounts provide the resources with which Eisenberg reconstructs a democratic theory of political pluralism At the center of political pluralism she argues is a pluralist approach to self development that can address the key ambiguities of identity politics and provide a more effective means to balance the

power relations between individuals and communities than can individualist or communitarian approaches **Between God and Man** Abraham Heschel, 1997-10-21 Heschel was one of the outstanding Judaic philosophers and theologians of our time and this is more than just a comprehensive introduction to contemporary Judaism as he attempts to bridge the gap between traditions of Eastern European Jewry and the scholarship of Western civilisation *Omar Khayyam's Secret: Hermeneutics of the Robaiyat in Quantum Sociological Imagination: Book 1: New Khayyami Studies* Mohammad H.
