nor was it intended to be and while Americans had professed to create a democracy they had in fact created a plutocracy Industrialization of America under the leadership of the middle class and the rise of critical attitudes towards the ideals and handiwork of that class are examined in great detail Parrington's interpretation of the literature during this time focuses on four divisions of development the conquest of America by the middle class the challenge of that overlordship by democratic agrarianism the intellectual revolution brought about by science and the appropriation of science by the middle class and the rise of detached criticism by younger intellectuals A new introduction by Bruce Brown highlights Parrington's life and explains the importance of this volume
